I find that it acts like a charm upon the whole nervous system, and in scrofula and all cutaneous diseases. Its curative properties are fully equal to the claims made for it, and I do not know of one instance where it has not fulfilled

all its claims. In cases of General Debility and Nervous Prostration it has proved itself invaluable. It also gives quick relief in Dyspepsia and Canker of the stomach, and is a remarkable fine restorative remedy. It is a great pleasure to be able to recommend such a remedy, as the results following its use are so wonderfully satisfactory. NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application.

on the Sugar Schedule.

Thin people are thin because the food they eat doesn't make them fat. Reasons: wrong food; right food ill-digested.
Fats, oil and grease will not make anybody fat. They keep a fat person fat, but they make thin people grow thinner. The reason is because they are indigestible. The thin person finds it hard to digest his food. Fatty food makes it harder still for him.
Dectors forbid dyspeptics food cooked in grease, yet they will prescribe a full dose of cod liver oil three times a day! The best doctors know that cod liver oil is just as indigestible as any other oil or grease. They

tion, by a strict party vote, of an amendment offered by Mr. Allen (Pop., Neb.), striking out paragraph 181, fixing the paragraph to the free list.

No opportunity was offered for the discussion of this amendment, as the senate was acting on the amendments to the lumber schedule, without debate, under an agreement made on Tuesday.

The sugar schedule was reached, but

contrary to expectation, it was not taken Before the tariff was taken up, a resolu-tion reported from the foreign relations

committee, declaring for non-interference with Hawaiian affairs, but saying nothing on the subject of annexation, was passed by a unanimous vote. The day's proceedings in the house were

dull, and there was a small attendance of members on the floor.

The chief event of interest was the passage of a resolution introduced by Mr. Sickles, authorizing the secretary of war to purchase or condemn certain lands at Gettysburg, for the purpose of preserving the lines of battle and the topography of the field from the inroads

of a trolley railroad line.

The Brawley state bank tax bill was again taken up, and Mr. Black of Georgia finished his speech in advocacy of the repeal of the present law.

He was followed by Mr. Walker (Rep.,

Mass.), whose speech evoked rounds of Democratic applause, on account of the advanced position he took in favor of an extension and enlargement of the bank note system. The other speakers of the day were

Messrs. McLaurin of South Carolina and Mr. Wheeler of Alabama, who favored the repeal of the state bank tax. Goods Will Be Released.

HILL ON INCOME TAX.

Regards It as Un-American and a Mean Compromise.

ENDORSED BY BUSINESS MEN

At a Representative Gathering at New York.

NEW YORK, June 2.-The business men of this city turned out in great numbers last night, at Carnegie Music hall, to protest against the income tax. Every available seat in the immense hall was filled; the platform was thronged with representative citizens, and great enthusiasm

was displayed. Evan Thomas, president of the New York Produce Exchange, was chairman. Among the vice presidents were the presidents of all the life insurance companies the savings banks, the trust companies and the heads of the principal dry goods corporations, jewelry houses and other business concerns.

Mr. Thomas was received with great cheering. He made an address in which, among other things, he said:

"Taxation and tariff should be considered simply as business matters, and not as political. An income tax is so un-American and so partial in its injury that should not be tolerated among free peo ple. That it will finally become a law I cannot and will not believe.

The secretary then read letters of regret ment by Senators Hill and Murphy and Congressmen Quigg, Mervin and Covert, and telegrams of regret from Congressmen Sickles and Hendrix. Senator Hill's letter was received with great applause. Senator Hill's Letter.

"I need hardly assure you that I am in hearthy smypathy with the purpose of your meeting. An income tax feature has no proper or legitimate place in a tariff reform bill. It endangers and embarrasses an honest and an equitable revision of our tariff laws, which was expected, if not desired, by the citizens of all parties. "The unfortunate effort to incorporate it in the pending measure has delayed a speedy disposition of the tariff subject and induced a surrender of nearly every correct and consistent principle upo which a tariff reform measure should be

Un-American In Theory.

"An income tax is a scheme of mo archical governments only, which always sanction class legislation, but which i never adopted by republics, except from dire necessity during the emergency o war. It is neither a Democratic nor Republican principle, but it is socialis in its inception, un-American in its theory, unequal in its operation, and neces sarily offensive in its execution.

"It is unjust because it is unnecessary for purposes of revenue. It is an illy-dis guised sectional attack upon the industry. thrift, enterprise and vast business interests of the Empire state, which should be vigorously resented by the men of all parties. It is an odious tax for which the in this. Our methods of pull-devil, pull- induced to leave her home by a fashionpeople have never expressed their approval at the polls. sides. Though the score does not show an unusual number of errors, many of them were extremely costly ones. The High school team played a Weymouth Institute man for pitcher, but he did not prove at all effective. He was inclined to sulk and hurt the team he played for instead of assisting it. The umpiring of Mr. Worster seemed erratic at times but his intentions were good.

The game started in with a double play by Barker, Hall and Holden, which retired Clapp at second and Killowey at first. Then the Academy boys thought best to have their "fatal innings" early in the Masters Charles W. Wilder, Jr., and game. Consequently before the third man Houghs Neck Sunday. For the Weymouths, Clapp, who played first base, and Baker, the centre-fielder, did the best work. It was evident that the first baseman was in a totally different class from the rest of the nine. His fielding record was perfect and in batting his work was almost up to first place, one player only making more hits.

Barker struck out four men, and Sulli van, of the Weymouths, struck out two. Below is the score in full:

The car was filled with those interested in the road from both Quincy and Weymouth and judging from the noise which disturbed the still night, we should say a good time was had. The residents along the line rushed to window and door to witness the first car that ever passed on North street. Many of the citizens of Weymouth Heights were aroused by the demonstration and some even, were so excited that the flash light caused by the dirt on the track, was located by them as flash lights at Minots light. Ebenezer Francis E. Thayer died at the family residence, on the corner of Washington and River streets, after a severe and painful illness of only a few weeks.

The cause of death was a complication of diseases, none of them chronic, superinduced, chiefly, we believe, by the approach of old age, and the giving way of the physical energies under the strain of a long active business life. Struck down, somewhat suddenly, it was

thought, at first, that Mr. Thayer would, through dint of his fine constitution, come out of his sudden sickness; but when it became known that he would have to undergo a surgical operation his friends feared that this, with a man at his time of life, would prove a very grave matter; discounting his chances of recovery to a serious extent.

The operation, which was the removal of an internal abscess, was successfully and skilfully performed, relieving Mr. Thayer and making him comfortable. So much so Are we to have more rain. It should that hopes of recovery were entertained anew by his friends, but this fond expecta tion was soon destined to be disappointed, for a relapse befalling, death took place Mr. Thayer was born in Braintree, June

15, 1815, and was the son of Ebenezer F. and The South Quincys will play the Marions Lucinda (Soapper) Thayer. He was one three girls; two of them dying young; the eldest, Rachel R. Thayer, an intelligent old maiden lady, now in her 821 year, being the only surviver.

Mr. Thayer began his business career by engaging in the retail grocery business in the store at present occupied by J. Marcus Arnold. Afterwards he went into the boot and shoe business in Boston, carrying The new fire alarm boxes ordered some on the same for fifteen years; giving up weeks ago by Chief Engineer Williams this he was appointed an inspector in the have not arrived as yet, but are expected Boston custom house, the duties of which position he faithfully discharged for eight

There is a charm for all in the appearance of a neat and tasty cottage, with an abun-dance of fresh air, sunlight and foliage, which is not possible to be enjoyed by those in all walks of life. The amount of room in the plan which we present today is as

cost. One cannot reasonably expect that

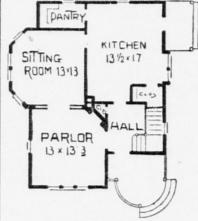

cheap house can be as large or present as pretentious an appearance as its more costly neighbor, but by employing a style of ex terior neat, but plain, and using good pro portions we may obtain a home that is entirely satisfactory on all these points. It is easy enough to build one that is cheap, but it is another matter to build one that has this feature and a fair share of the comfort and conveniences desired. Of course everything must be done on a more or less educed scale. The rooms cannot be s large, for we must reduce the amount of ground covered to the smallest amount possible, as it is the entire area of ground overed we must take into the estimate of cost. The height of stories must also be

moderately low ceilings are preferable, as they are more easily heated. The demand for attractive low cost houses has become so great that architects have been forced to give them their attention. This plan has six good rooms besides accessories. It will be observed that they are all of fair size, both above and below and that direct access is had to all the chambers from the stairway and hall. The

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences does not agree the existing deficiences does not remain the affairs of government. alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and observed. of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventions, design, waters, trade marks, labels, constitution with any firm in securing foreign patents.

Mr. Hoar took occasion to arraign Mr. Peffer for appealing to the excitable people in the country, and was met by the Kansus senater with the boast that he gloried in being the defender and charms the year round, as it has all the power of a coal range. Has Four Powerful Burners which can be used singly or together, according to the work to be done.

It is complete with Stand on Castors, Oven, Laundry Attachment, Extension Top, Shelves, etc. Ordinary stove furniture can be used. It is unlike all other oil stoves and owes its Superiority to a Patented Form of Construction not found on other stoves.

The "Famous" will do more work, and at less expense than any other oil stove made. Nothing like it has ever been seen in this place. Call and see this Wonderful Stove in Operation.

THE SUGAR SCHEDULE

Monoplizes the Close Attention of Rival Senators.

PEFFER FAVORS SUGAR BOUNTIES.

The House Succeeds In Passing the Seal Bill.

WASHINGTON, June 2.—The battle royal over the sugar schedule was begun ye terday. The entire day was occupied by Senators Manderson and Petfer, both of whom favored a bounty instead of a

It is probable that the hard hand-to hand fighting over this schedule will not begin until Monday. It is not considered possible on the floor of the senate that the sugar schedule can be defeated outright, as the Republicans are not absolutely united, but there is believed to be a pos sibility that the discriminating of duty in favor of the sugar refiner may be par tially or wholly defeated. It is the intention of the Democratic managers, as indicated by the notice given by Mr. Harris just prior to adjournment, to force st.l. longer sessions, beginning on Monday next. The senate is now sitting from 1 a. m. until 6 p. m. The sessions hereafter will probably be protracted until 10

p. m. Mr. Manderson gave notice that at a proper time he would offer as a substi tute, for the sugar schedule the bounty provision of the McKinley bill, continung it in force until July 1, 1905.

Having completed the legal aspects of the bounty question, Mr. Manderson maintained strongly that if there was no FAMOUS OIL RANGE legal obligation there was at least moral obligation on congress not to b guilty of repudiation, not to tear down vested rights, especially when in thos vested rights were bound up so much

benefit to the country. Peffer's Advocacy of Sugar Bounties, When Mr. Manderson concluded, M. Peffer (Pop., Kan.) took the floor. Whi Mr. Peffer was advocating a bounty for the sugar growers, Mr. Aldrich inte rupted him to call attention to the fa that the Democrats in supporting the Gorman-Brice bill, were advocating pro-tection in the form of tariff for revenue with incidental protection. The Republican party, on the other hand, called protection pure and simple. The Populis party, now speaking through the senato from Kansas, also advocated protectio Thus Mr. Aldrich declared party line

Fridays are usually private bill days is the house, but vesterday the private cal endar was sidetracked, and the Browley state bank bill was given right of way after a brief struggle, led by Mr. Enlee and Mr. Reed. The speakers were Mr. Brosius of Pennsylvania and Mr. Hender son of Illinois, against the bill, and Messrs. Swanson and Tucker of Virginia

and Izlar of South Carolina in favor of it In the morning hour several measure of little importance were passed. At 5 o'clock a recess was taken until 8 o'clock when a few pension bills were passed.

A BATTING CONTEST.

The Cleveland Team Drive Boston's Boston, June 2 .- The Cleveland Baseball club beat the champion Bostons yesterday 22 to 8. The visitors pounded Stivetts from the very start, and at the conclusion of the sixth inning, with a score 22 to 4 in their favor, "Happy Jack" retired and McCarthy finished the game. It was the biggest thing in batting seen in this city for many a day. Every mem-ber of the Clevelands made a hit, while Zimmer, Tebeau, O'Connor and Ewing made home runs, doubles and singles in a way that fairly astonished the spec-

On May 29, I sent a telegram to Mr. Ridgway, asking him to attend a meeting with Mr. McBride, with a view to ending the strike. He replied on the same day that he had the meeting under consideration, and thought he would be able to bring about such a settlement as would be for the best interests of the miners and the Consolidated Coal company.

Yesterday I received a long telegram from Mr. Ridgway, stating that he did not attend the meeting, as he had concluded it best to let the miners alone and they would go back to work. That's just where the matter stands,

but I think Mr. Ridgway has got the thing well in hand. He came out all right in the strike four years ago, and I have no doubt he will this time. Rumor of Embarrassment Denied.

LACONIA'S BIG BLAZE

The Car Works and Iron Foundry Nearly Destroyed.

THE LOSS WILL REACH \$100,000.

Over 150 Workmen Thrown Out of Employment.

at the Laconia car works destroyed over \$100,000 worth of property. The car co npany's loss includes three large buildings in the passenger car department, their entire malleable iron foundry plant, with patterns, etc.; also two small dwelling

Considerable damage was done to a large tenement building and other shops, and several passenger coaches and electric street cars in the process of construction and nearly completed were burned. General Manager Pearley Putnam esti mates the value of the property destroyed at \$75,000, on which was an insurance of \$49,500. A large refrigerator building and office, owned by the Swift Beef company, is a total loss, with contents valued at \$10,000 and insured for \$5500.

A three-story tenement, owned by Or ville A. Atkinson of Boston, is also a total loss; value estimated at \$4500; insured for about \$3000 in Massachusetts. The fire started in the paint shop at the car works. There are indications of incendiarism, as the watchman inspected the building just previous to the discovery of the flames. Manager Putnam states that the car works and foundry will be

joining buildings saved the city from a general conflagration. Outside Aid Summoned.

Chief Engineer George A. Sanders, finding the fire spreading beyond control, telephoned to the city of Concord for aid. A steamer and hose carriage with 30 men, Chief Davis and Assistant Engineer Brown came on a special train, making the run of 28 miles in 35 minutes. The south-bound Canadian express was held here to keep the line clear. The Concord firemen were not needed,

however, as the flames were under con-trol when they arrived. In addition to the losses already reported, scores of workmen in the carshops lost valuable kits of tools, the individual losses in some cases running as high as \$200, on which there was no insurance. Nearly all of the furniture and house-hold goods in the Atkinson tenement

block were consumed, as the fire spread so rapidly that there was no time to remove the goods, which were not insured. John Kelley and James Gilpatrick, tenants in the tenement adjoining the paint shop, where the fire started, lost everything, their families barely escaping with their lives in their night clothes.

The most serious blow is the destruction of the malleable iron foundry, which was crowded with orders. A temporary structure has been erected over the large ovens, and the whole available force were put to work today to clear the debris. Orders for lumber are already given, and the work of rebuilding will commence to-

The Wollaston Shoot.

Saturday's shoot of the Wollaston Trap Club averaged but 8.63. This was owing to the gale which was blowing at the time the shoot was held.

Morse, who has nearly always been high man, jumped down to the fifth place. This was a big surprise. His score was 11 against 20 and 21 at Wednesday's shoot, Bates fell back from his scores of 9 and 12 on Wednesday to 2.

Daniel B. Lincoln was high man and scored 15, breaking 9 straight. Starrett came near getting whitewashed

PATENTS

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful ing the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventions, design patents, trade marks, labels, copyrights, interferences, infringements, valuable. tions generally, including mechanical inven-tions, design patents, trade marks, labels, copyrights, interferences, infringements, va-lidity reports, and gives especial attention to rejected cases. It is also prepared to enter into competition with any firm in securing foreign patents.

THE SUGAR SCHEDULE

To Monopolize the Attention of the Senate This Week.

EVENING SESSIONS PROBABLE.

State Bank Question to Be Pushed In the House.

WASHINGTON. June 4.- The sugar schedule will again this week be the central point around which the proceedings in the senate will devolve.

Among numerous senators who were asked for their opinion as to when the de-bate on this schedule would cease, not one would attempt to fix a definite time. The discussion has already proceeded for three days, which is the utmost time the Democratic senators would admit before the debate was begun, would be neces sary or allowed to it. Some think it will be possible to reach a verdict tomorrow, while others assert that there are contingencies which may postpone the disposition of the schedule until the latter

The Plan of Campaign.

Among other lines of policy which have been conversed among the opponents of the bill, is that of allowing the sugar schedule to be accepted as amended by the committee on finance, without taking any vote on the schedule in commit-tee of the whole, the object being that the opponents of the bill shall not be forced to show their hands at this time, and especially that they may refrain from exhibiting their superior strength among Democratic and Populist senators.
Senator Harris adheres to his determina-

tion to ask the senate to prolong its daily sessions into the evening. Some of the Republican senators have taken his notice to mean that he will ask the senate to sit until the sugar schedule shall be disposed of, but conversation with him and with other Democratic senators in dicates that his purpose is hardly so definite, but indicates that the intention is to press as near to the goal as it may be possible to do. They say that the speeches of the past few days indicated that the sugar subject is one prolific of talk, and that they want to give opportunity to dispose of as much of the talk as possible within reasonable hours.

The House Program. The outlook for the week in the house of representatives is so much in doubt that

Democratic caucus may be necessary to agree on a plan of action.

The state bank question has been de bated until the leaders are anxious for a

As the state bank principle was incorporated in the Democratic platform, the leaders are loath to see the bill defeated, so that a caucus tomorrow may be called for the purpose of formulating a party plan which will command united support. It s probable that the final vote on the bili will be taken early in the week unless the whole question is allowed to go over until a caucus committee can frame a satisfac

tory bill.

What President Dole Has to Say on the Annexation Policy.

SAN FRANCISCO, June 4 .- Walter G. Smith, formerly editor of the Hawaiian Star, sends from Honolulu a copy of the following self-explanatory letter received by him from President Dole, dated Hono-Iulu, May 25:

My Dear Sir:—Your letter enclosing communication of Mr. Humphrey, secretary of the National Republican League of the United States, which suggests that some political organization and the provisional government should delegate you to speak for Hawaii and the policy of annexation before the league convention soon to be held in Denver, has waited too long for an answer. While I agree with you that it would be unwise for the provisional government

or the political organizations which support it to become identified with any political party in the United States, when all contain friends and advocates of the annexation policy, I feel that it would be no easy matter to find one who could represent the cause of Hawaii before the convention with more eloquence and enthusiasm than yourself. Our request for political union with the United States is to the whole American people, and it is not for us to encourage any tendency that may exist to make a party matter of that. With America, it is an America n question, and many of the best minds in all parts are fully en-listed in its favor, not to speak of the great public sentiment which is rapidly mastering the situation.

HELD IN CHECK.

Indiana State Troops Now Hold th Upper Hand Over the Miners,

WASHINGTON, Ind., June 4 .- State troops marched into Clark's Station yesterday,500 strong, with a gatling gun, to find that only about 50 miners had stayed to face the music. The militia was drawn up in line along the edge of the woods, and the sheriff read the warrant against the miners for riotous conspiracy, and put three of the leaders under arrest, placing them in jail.

As soon as the troops were in line the railroad men at once repaired the track and the loaded cars were taken on west. The miners who were reported en route to Clark's Station did not materialize, neither had they collected at any point along the Baltimore and Ohio and Southwestern. The certainty that the officers intended to force the law seemed to quell

The miners say that as soon as the troops are withdrawn, they will again stop all coal cars, but anticipating all this, two companies will be stationed at Clark's until all fear of trouble is passed. Everything in this city is now quiet, and there is a general feeling of relief among

Johnson Island the Prize.

SAN FRANCISCO, June 4.—Johnson Island, the prize for which the provisional government and England are striving in an ocean race between the steamer Illand and H. M. S. Champion, has been the subject of considerable discussion in the past two years. The island was discovered in 1820 by H. M. S. Cornwallis, and named after the captain of that ship. It was examined in 1859 by Lieutenant Brooke of the United States schooner Fenimore Cooper. It is situated 16.44 north, 169.30 west, and is described as being a lagoon island.

Editorial Comment.

THE WIDENING of Coddington street came near going by default at the Council hearing, but finally brought forth some discussion. It was noticeable that no one opposed, even those who claimed their estates would be damaged. These abutters were fearful that the Council would see the matter in its true aspects, as a great benefit to each and every one. As all of Mr. Furnald's land is taken, he must be paid liberally, but in all other cases there should be betterments rather than damages,

A SOUVENIR Y. M. C. A. number will be issued by the DAILY LEDGER tomorrow, illustrated with Association buildings, a portrait of George Williams, the founder, etc. An interesting sketch has been prepared.

COUNCILMAN Lennon was certainly on the wrong track last night. He will realize more fully than ever the dangers of the Water street crossing.

THE TAXATION order was offered in the Council last evening, and the LEDGER will comment on the same tomorrow.

NARROW ESCAPE.

Councilman Lennon Regards the Water Street Crossing as Dangerous.

Conneilman Edward J. Lennon had a narrow escape Monday evening from causing a funeral to be held from his house. He was on his way down to Grand Army hall and as he approached the Quincy Adams depot an outward train was stopping at the depot. He heard no warning of any other train and went under the gates and was about to cross the inward track when an inward train dashed by, coming so close to him as to brush his coat. It was a narrow escape, for had he gone one step further he would have been

He now wants to know what right an express train has to pass a depot when another train is stopping there, and will probably investigate.

Councilman Lennon it will be remembered is the member who introduced the resolution at the Council meeting last week | Quincy. in regard to the removal of the warning bells at this, the most dangerous crossing on the Old Colony system.

He of course was to blame for crossing under the gates, but he further says that ler. had the bells been in place he would have heard them and thus been warned.

The gentleman is a member of the committee from the Council appointed to wait on the railroad in regard to the matter and now that he has had such a narrow escape he can put a little more force into his argument and he will also have the backing of every person who uses this crossing.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a imminent risk, as the breadth and strength of the patent is never considered in view of a of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. THE TARIFF DEBATE.

Democrats Confident That the Sugar Schedule Will Go Through.

A QUIET DAY IN THE HOUSE.

A Vote on the State Bank Tax Tomorrow.

WASHINGTON, June 5 .- By an agreement reached just before the adjournment of the senate last night, all am andments to the sugar schedule will be voted upon today.

According to both sides, the bill de pends upon the disposition of the sugar schedule, and the fact that the Republi cans have agreed to allow the issue to go to a vote indicates that the end of the tariff debate in the senate is not far dis-

All sorts of amendments will be of fered, the two on which the Republicans base most of their hopes of breaking the lines of the Democrats being those to change the date on which the schedule is to go into effect, and to wipe out the 1-8 o a cent differential given by the schedule o the refiners of sugar.

The Democratic managers, however claim to be entirely confident that the schedule will go through without mate rial change. The debate yesterday was not sensational, its most important feat ure being the explanation of the schedule by Mr. Jones. This was the first public interpretation of it by a Democratic member of the finance committee, and totally varied with the interpretation put upon it by Republicans, especially as to the amount of protection afforded by it to the

Mr. Hoar suggested that it was too much to ask the senate to vote without debate on all the amendments offered to the sugar schedule. He suggested that a vote be taken on the amendments to the bounty paragraph today, and that then the debate on the other amendments be under the 10-minute rule, with the understanding that the entire schedule be dis

This was finally agreed to, and at 6:10 the senate, on Mr. Harris' motion, went nto executive session, and a few minutes later adjourned.

The Day In the House. The galleries of the house were unusually well filled yesterday, and on the floor there was a good array of unoccupied desks during the early part of the day. As the afternoon wore on, the attendance thinned out, and when adjournment came there was not a half hundred mem

bers on the floor. The senate bridge bills were passed one to authorize the construction of a bridge across the Delaware river by the Pennsylvania and New Jersey Railway company, and the other extending the ime for construction of a bridge across

the Calumet river.

The Brawley state bank tax bill was discussed by Representatives Dalzell (Rep., Pa.) and Raynes (Dem., Md.) for the opposition, and by Representatives Cobb (Dem., Ala.) and Oates (Dem., Ala. in favor of it, and then the house agreed to a senate joint resolution appropriating \$10,000 to defray the expenses of the sugar nvestigating committee. At 4:30 the nouse adjourned.

The final vote on the state bank question will be taken tomorrow afternoon. This conclusion was reached after a conerence in Speaker Crisp's room. A rule was thereupon drawn by the rules committee providing for a continuance of general debate under the five-minute rule

Editorial Comment.

THE LEDGER is pleased to call attention to the hearing advertised by the Council Committee on Industries, to be given next Monday evening. The city is without a board of trade or commercial club, and it is fitting that the city government should look over the field and hear all persons with ideas to offer. Something can be done to help Quincy in a business way. Why should not something be done. The committee has a sphere of usefulness, and we hope it may do effective work.

THE PROMISED comment on the taxation order introduced in the Council is delayed today by rush of business, but will probably appear tomorrow.

AN OUTING.

Supt. Weeks Entertains the Lazy Club a Anderson's.

Last winter, when the little son and heir was born to Supt. and Mrs. Benjamin J. Weeks, he announced that as soon as the weather was suitable that he would take the members of the Lazy club to Anderson's at Fort Point, for one of his famous shore dinners. Suitable weather having arrived the members have been anxiously awaiting the expected call.

Tuesday the call came and at 1.35 the party embarked on the electrics for North son, superintendent for New England Weymouth.

In the party were the well known faces of the genial officers of the club, all of whom are also well known for their Quincy.

When Quincy Point was reached some of the party who were not afraid of sea sickness sailed across to Fort Point, while the others continued on to North Weymouth and completed the journey in Anderson's barge which was awaiting

Owing to the non-arrival of those in the yacht, the dinner was delayed somewhat themselves in picking up chips by the sad sea waves, and although some of the party were a little shy at times, several had se cured pretty buttonhole ornaments when the yacht arrived and dinner was announced. And such a dinner it was; All did it justice, especially "Gene" O'Connors who, it was asserted ate a bushel or more of clams.

Dinner over and cigars lighted, an hour or more was passed in a social manner and then their faces were turned homeward, all Mrs. P. R. Blackmur, soprano; Miss Agnes returning thanks to the bost and requesting him to do it some more.

The closing prayer was fitting to the occasion, and another hymn, and benediction by the new pastor, closed the ser-

The committee was fortunate in securing the able divines who assisted, and they did not find it necessary to go to Boston to secure them all. Good sermons as well as good printing can be obtained at home. The First church endeavors to furnish good sermons and might lose courage if its people thought they must go to Boston to secure them. Boston sermons and printing are among the best, but home sermons and printing are often as good. The programmes furnished on this occasion by a Boston press would have been many per cent. better if scored and folded.

Your prohibition arguments are in direct opposition to our republican form of government. Yesterday you worshipped Governor Tillman when he addressed you, and today you repudiate him. This shows you are flexbile, and gives me hope that in time you may change about in your views, and come to a sensible view of the late question.'

During his address, Dr. Wakeman was several times interrupted by cries of disapproval and contradiction, and when he finished a number of delegates jumped to their feet to answer. Chairman Baker, however, forbade dis-

cussions, until the set program had been finished. A number of delegates then again took the floor and denounced the chairman as an autocrat. The committee appointed to consider the advisability of organizing a national temperance board reported that such boards should be established in the to be composed of the first two officers of

THERE was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a cuick endeavor to get an allowance and chemics.

What Manufacturer Gaston Overheard In a Washington Hotel.

WASHINGTON, June 6 .- Walter Guston, the wire manufacturer of Wilkesbarre, Pa., testified to the senate bribery committee yesterday that early in March he occupied a room in the Arlington hotel a living witnext to the room of H. L. Terrell of the Sugar trust, and in the night he heard loud talk therefrom.

The conversation related entirely to the Mrs. Pinksugar schedule, and he heard enough to ham's Vegesatisfy him that the Wilson tariff bill table Comcould not pass the senate unless the dedicinal properties. THE TOBACCO RATES.

Unstemmed and Stemmed Wrappers \$1.50 and \$2.25 Per Pound.

OUTLOOK FOR THE TARIFF BILL.

The Tax on State Banks to Remain in Force.

WASHINGTON, June 7 .- The senate sat antil 7 o'clock last evening, disposing of the tobacco schedule and one paragraph

of the agricultural schedule. The finance committee sprang a complete surprise on the senate in a proposal to go back to the house rates on stemmed and unstemmed leaf wrapper tobacco, but the amendment was so unexpected that it was finally agreed to adopt it pro forms and relegate the determination of the rates in this paragraph to the senate when the bill was reported from the committee of the whole.

The house bill made leaf wrapper tobacco dutiable at \$1 a pound if unstemmed and \$1.25 per pound if stemmed. The "compromise" amendment increased these rates to \$1.50 and \$2.25, respectively.

Some time was spent discussing the proposed reductions on live stock, but these were agreed to. The paragraph containing the reciprocity clause with reference to wheat, rye, corn, flour and other breadstuffs excited much debate, but was not disposed of when the senate adjourned.

The Outlook For the Tariff Bill, The sugar schedule being the pivotal point of the tariff bill, and the Democrats having preserved their lines on that schedule, the passage of the measure is now assured. It is expected, therefore, to go through the senate in the form decided upon by the managers without much delay. This fact is now freely admitted by the Republicans, and with all hopes of defeating the bill dissipated, the incentive for opposition is removed, and it is probable its future progress will not be impeded by dilatory methods.

There will be considerable contention over the cotton and woolen schedules and the sections relating to the income tax, but the remainder of the bill is likely to be completed within the coming two

Editorial Comment.

SHOULD QUINCY have a high tax rate this year? A year when it will be difficult, if not impossible, for a great many to pay the assessments. Some say the taxpayers should take the medicine, but the LEDGER believes in a homeopathic dose this time. It is not necessary to reduce the city debt this year \$89,730. The LEDGER has already pointed out that the payment of this over what it would be for current expenses only. We may be excused for harping on this question, if some so regard it, because we are working for the best interests of the city. A high tax rate will not only be pronounced the case as chicken pox, burdensome, but it will give Quincy a bad although the Board of Health are conname. It will stop building, stop the growth of the city and drive out rich men and personal property. Let us show by figures the increases, and what the tax rate of 1894 may be:

City tax (by Council), \$160,000.00 \$175,000.00 City tax(debts maturing)62,962.00 64,730.00 City tax (interest), 16.000.00 15,000.00 Water debt, 24,000 00 Park debt, County tax (less polls), 7,795.24 10.042.00 State tax (less polls), 11.066.00

6,082.10

Overlayings,

\$273,947.50 \$315,657.76 The figures for 1894 are liable to slight changes in some item but are practically correct. The first item is the amount proposed in the taxation order now in the City Council, of which we will comment later. The second, third, fourth and fifth have been determined. The county tax has been apportioned and the amount given will be increased or decreased as the numbers of polls decrease or increase, but only a few hundred dollars at the most. The State tax is given at last year's figures and may be reduced about

\$3,000. Deducting the revenue from polls, the sum of \$304,591.70 is to be raised against \$262,881.50 in 1893, an increase of \$41,710.-26, which on the valuation of 1893 would

To borrow for current expenses would case since. reduce the amount (\$175,000) in the pending order. To extend the debt would re duce the item of \$64,730.00.

The LEDGER will be pleased to receive communications on the subject from the Mayor and ex-Mayors, the Councilmen and ex-Councilmen, assessors, financiers, citizens and taxpayers. It is the LEDGER's mission now to reduce everybody's tax bill from \$1 to \$2 per \$1,000 of valuation.

MANY COMPLIMENTARY words have been spoken of the Y. M. C. A. souvenir LEDGER issued Wednesday. Praise encourages the editors and publishers to renewed efforts.

THE CASE IN BROCKTON.

The City Seems to Have a Greater Fear Than Quincy. The Brockton Enterprise had a scare

A successful strawberry festival was given at the Wollaston Unitarian church vestry on Wednesday evening. There was a very good entertainment before the strawberries and cream were served. Mrs. Pendleton and Mr. Edward E. Bullock line at prices so low, \$25.00 to opened the entertainment with a vocal \$90.00, covered in Plush Hair duet and afterward sang solos. Miss Bergeron of Weymouth, a pupil of Mrs. Alma Faunce Smith, also rendered with marked skill several piano solos.

Resignation of Pastor.

Quincy is to lose one of its rising and popular young clergymen, Rev. W. Sherman Thompson of the Washington street Congregational church, who has resigned to accept a call to the Mission church connected with the Mayerick Congregational church of East Boston.

Mr. Thompson came to Quincy about two years ago and at once became popular with his people. He is an earnest preacher and almost as rapid in his delivery as the late Phillips Brooks.

On the recent Memorial Sunday the Grand Army attended services at his church and listened to one of the ablest sermons ever preached before them. His departure for a new field of labor will be regretted by all.

The Pest House

Gutierrez Proclaimed President of the Republic of Salvador.

THE BENNINGTON TAKES A HAND

In Protecting American Citizens and Their Property.

NEW YORK, June 7 .- The Herald's La Libertad dispatch says: General Gutierrez has been proclaimed president of and day of excitement, in which the ice cream parlor. forces from the warship Bennington played a prominent part. The American consulate was a harbor of refuge for crowds of women and

children, who sought the protection guaranteed by the United States. All of the government officials fled last night, giving the town in charge of Lieutenant Coffin of the United States navy, who, at the head of a small force, had been sent ashore by Commander Thomas during the day to protect the

consulate and American interests. The Rebels In Charge. The barracks had been deserted, abandoning 300 rifles, 400,000 rounds of ammunition and two cannon to the rebels. General Colocho, at the head of 500 men, arrived and took charge of the town. He looted the barracks, shelled the woods at the west of the town and then all was quiet, and the Bennington's men with

drew to their ship. Another force of 150 men arrived, and it was reported that a body of 2000 rebels was following. The soldiers that had already entered the town after looting the barracks, turned their attention to houses, and had pillaged many when the American sailors landed again and stopped

Fort Wayne Electric Matters. FORT WAYNE, June 7. - R. T. Mc-Donald, general manager and a heavy stockholder in the Fort Wayne Electric company, applied in court here yesterday

for a receiver for the plant, valued at \$500,000. Judge Dawson appointed H. J. Miller of Fort Wayne and E. J. Hawthorne of Boston receivers. Immediately articles of incorporation of the Fort Wayne Electric corporation, with a capital of \$1,000,000, were filed. It is believed Mc, Donald has taken this method of preventing the Electric trust gobbling the original company.

Affairs at McKeesport. McKeesport, Pa., June 7.-The mayor has issued a proclamation commanding all persons not employed to stop congregating on the streets under penalty of arrest, and ordering all saloons closed. The situation is more critical, and it is feared that the mobs now marching to Camden and DuQuesne will burn all the tipples between those points.

McDuffee Near Death Boston, June 7 .- P. J. McDuffee, the well-known Malden rider, who was in-jured last Saturday afternoon in the bicycle race at Jamaica Plain, is very low a day or two. Besides having his collar one broken and receiving internal injuries, it is found that his skull is more dangerously fractured than was at first

LONDON, June 7.-The Times' correspondent at Berlin says it is impossible to give even the roughest outline of the pro ceedings of the silver commission, as the meetings were all held in secret. Generally speaking, there is no inclination to believe that the maintenance of the gold currency is in any way jeopardized by the

arguments adduced. Candidates Announced. NEW HAVEN, June 7.-The following names of the successful candidates for the Townsend prize oration, to be held during commencement week, were announced on the campus last night: R. D. Paine, E. B. Reed, J. L. Hall, R. H. Nichols, C. D. Kyle and G. F. Vonslyke. This is one of the highest honors attained during the senior year.

SALE AND ENTERTAINMENT.

Christ's Church Working for Funds to

Purchase an Organ. The annual two days' sale and entertainment of the guilds and choir of Christ's Church was opened in Faxon hall Wednesday evening, and fully equals the expectations as a financial success and pleasant

The hall looked attractive, the various tables and booths being trimmed in different colors: the Rector's Aid Association table in green, the Daughter's of the King in pink, the Southern Cross in yellow, the Reaper's circle of King's Daughter in purple, the candy booth in lavender, and the flower booth in pink with ferns. There the republic of Salvador, after a night was also a tea table, lemonade well, and

A musical programme of great merit was presented. The Robin Hood chorus which opened and closed the entertainment, could not satisfy the audience, although encored four times. The members were W. W. Osborne, William Mead, A. W. Ferguson, Howard Spear, Walter Hersey. Walter Burke, W. S. Osborne and H. W. French. The violin solo by Mr. Schirmer and duet with W. S. Osborne were beautiful. A boys chorus sung "Tenting Tonight," and there were fine solos by W. G. Esson, W. H. Hersey and A. W. Ferguson. Tonight the operetta of "A Dress Rehearsal," will be given, to be followed by dancing.

Presentation from Ladies.

Wednesday evening in accordance with the established custom of the Granite City club the ladies of the members were present and as usual on such occasions refreshments were served.

The club not being possessed of any dishes of its own, it has always depended upon the caterer to furnish these things. The ladies knew this and determined to give the club a little surprise which came during the early part of the evening and consisted of an oak cabinet stocked with a handsome set of ice cream china consisting of plates, saucers, sugar bowls, silver

spoons, and forks and water glasses. The affair being a surprise was none the were said they were put to use.

ialist of Augusta, Maine, after giving it a thorough trial in his practice, writes the following convincing letter of praise:

I have of late been using some of your medicine in my practice with the most pleasing and satisfactory results. I find that it acts like a charm upon the whole nervous system, and in scrofula and all cutaneous diseases. Its curative properties are fully equal to the claims made for it, and I do not know of one instance where it has not fulfilled all its claims. In cases of General Debility and Nervous Prostration it has proved itself invaluable. It also gives quick relief in Dyspepsia and Canker of the stomach, and s a remarkable fine restorative remedy. It is a great pleasure to be able to recommend such a remedy, as the results following its use are so wonderfully satisfactory. One great thing in its favor is its freedom from superfluous alcohol, and all injurious ingredients. DR. H. F. MERRILL.

What the Dutch Representative Has to Say on Reorganization.

NEW YORK, June 7 .- A. A. H. Boissevain, the representative of the Dutch bond stockholders of the Union Pacific railway and auxiliary lines, and an active member of the reorganization committee, sailed for Europe this morning. Mr. Boissevain made the following statement

"It is my opinion that the system can be reorganized upon a safe basis, and with justice to all security holders, pro-vided the claims of the United States can be settled substautially upon the following terms: First - The delivery to the United

States of 100 year bonds, bearing interest at the rate of 2 per cent per annum, for the entire amount of the debt, including both principal and interest, computed to maturity, such bonds to be secured by a mortgage on the main line and Kansas Pacific division of the Union Pacific railway; including the Omaha bridge and the terminals as a sinking fund, to be provided for the redemption of the entire issue within 100 years by annual payments after the year 1905. This would create a charge of \$1,400.000 per annum for interest until 1905, and thereafter the annual charge would be \$1,150,000 for interest and sinking fund combined.

Second-The securities now held by the United States in the sinking fund under the Thurman act, to be applied to the redemption of underlying first mortgage bonds, and the balance of the underlying bonds, amounting to about \$20,000, 000, to be extended or renewed at a rate of interest not exceeding 5 per cent, a sinking fund being provided for the re-demption of those bonds.

Nursery Men's Meeting. NIAGARA FALLS, N. Y., June 7.—Seventy-five members of the Association of the American Nursery were present at the Cataract House, when the 19th annual convention was called to order. The report of the treasurer shows a handsome balance in the treasury. J. H. Hale of Connecticut closed the morning session with a paper on the most profitable method of introducing new fruits. The following officers were elected: President, J. H. Hale of South Glastonbury, Conn.; vice president, Hon. N. H. Aldburgh of Todmor, O.; treasurer, N. A. Whitney of Franklin Grove, Ills.; secretary, George Buy VEGETABLES of Johnson Bros. Z. Sager of Rochester, N. Y.

May Start a Rival Board. CHICAGO, June 7.—The elevator men have declared war on the board of trade because of the recent adoption of an amendment prohibiting regular elevator owners from trading in grain on change. A manifesto has been issued, signed by the Armour and other big firms, announcing that they refuse to submit. The warehouse men will deal in grain with producers, consumers and investors, and the system of grain dealing will be changed. There is talk among the ele-vator people of starting a rival board to crush out the present one.

The Cripple Creek Situation. CRIPPLE CREEK, Colo., June 7 .- The deputies a re in camp at Gillette. The miners on Bull Hill are ready for an attack, and declare they will fight to the death rather than surrender any of the strikers before the militia arrive. One hundred mounted men on both sides are drawn up in battle array. The miners have offered to lay down their arms when the militia arrive. If the sheriff agrees to this there will be no battle.

Hoke Smith Honored.

CHAPEL HILL, N. C., June 7.-Fully 3500 persons attended the commencement exercises of the University of North Carolina here yesterday. Hon. Hoke Smith, who delivered the oration of the day, was given a hearty welcome, and his remarks were warmly applauded. In the course of his speech Secretary Smith said that he believed the tariff bill would become a P. S. Inquiries by mail cheerfully and law by July 1. The degree of LLD. was conferred ou Secretary Smith.

New Presbyterian League Proposed. NEW YORK, June 7 .- It is intended to form within the membership of the Pres byterian churches of New York and its vicinity a league of workers, who, while defending no individuals, will insist on the maintenance of liberty within constitutional limits in the church. The league expects to heal differences instead of dividing the church, and make it possible for all to remain in common loyalty to the church.

Strikers Block Coal Trains.

WHEELING, June 7 .- Five coal trains of the Baltimore and Ohia road were stopped by strikers west of Bellair, and the tracks blocked. The sheriff has gone to the scene, but as he has no deputies will not be able to accomplish much. Coal trains on the Wheeling and Lake hrie were stopped at Laurelton Tuesday night, and no West Virginia coal is now being shipped by any of these routes.

An Autorsy to Be Held. PAWTUCKET, R. I., June 7.—Medical Examiner Garvin of Cumberland has ordered an autopsy on the body of Clara Curtis, who died so mysteriously in that town Saturday evening. The remains were exhumed, and Medical Examiner Palmer of Providence will assist at the autopsy. The police have been able to locate three unknown men who were concerned in her death.

Ladas Captures the Derby London, June 7.- The Derby of \$30,000. the winner to receive \$25,000, the nominator of the winner \$2500, the owner of the second \$1500 and the owner of the third \$1000, out of the race for the 3-year-olds, was won by the Earl of Roseberry's Ladas, Lord Allington's Matchbox finished second and Mr. Cannon's Reminder

Gloomy Prospect of Settlement. PITTSBURG, June 7.—The prospect for settlement of the miners' strike by a oint conference meeting at Columbus has come to naught so far as the Pittsburg district is concerned. The Pittsburg committee is divided. A majority will oppose the Columbus conference, and will insist upon a 65 cent rate.

Why does the air of the pine woods have such a beneficial effect on consumptives? It is on account of its purity and of the antiseptic substances contained in the exhalations from the trees.

Guaiacol

represents these exhalations in a concentrated form. Although taken in through the stomach, in

THE CENTRAL PACIFIC

Against Refunding Its Debt.

HE MAKES SARCASTIC ALLUSIONS.

of a Foreclosure.

WASHINGTON, June 8 .- The house compittee on the Pacific railroads gave a hearing yesterday to the Califorians who are opposed to refunding the debt of the Central Pacific.

Ex-Congressman Charles G. Sumner said that he protested for the people of California against any funding scheme which would perpetuate the present management, one which had brought de plorable moral, political and financial calamity upon that state. He went into an exhaustive history of the road, declared that its cost had not exceeded \$30,-000,000, and that he thought it could be shown to have been about \$15,000,000. Stanford, Huntington, Hopkins and Crocker had not been worth \$400,000 all told in 1861, and in 1869, when the road was finished, they were worth \$10,000,000

Crocker has resigned from the directorate to make construction contracts with the others. For 500 miles over the plains the road, exclusive of materials, had not cost as much as the average turnpike. Eighty per cent of the enormous dividends had gone into the pockets of Stanford, Crocker, Hopkins and Huntington. Mr. Sumner explained the California law Mr. Sumner explained the California law which made stockholders responsible for debts of a corporation.

Representative Maguire explained that the statute of limitations of California which made stockholders responsible for debts of a corporation.

the statute of limitations of California did not apply to the government.

Representative Boatner of Louisiana

repeated a statement made to him recently by President Huntington that he (Huntington) had never held more than four or 10 shares of Central Pacific stock, his stock being in the finance and construction company.

Sumner's Suggestion.

Mr. Sumner's Suggestion.

Mr. Sumner held that it was not necessary for the government to take control sary for the government to take control he admitted, as President Huntington had said, that the present traffic rates could not be reduced without impairing the value of the property, since it had to pay 6 per cent per annum on an indebtedness double its cost and three times its

'distinguished saint who appeared before you a few days ago in behalf of the 10,-000 orphans and widows who were stockholders.

Again he spoke of "the atrocious highway robbery which had been perpetrated by Messra. Huntington, Hopkins & Co."
When Representative Powers of Vermont asked how the government could make good its claim, Mr. Sumner said the first mortgage would eat up the road. and the branch lines were bonded for two or three times their value, so that the government had no recourse except by

suits against the individual stockholders. Representatives Kyle and Powers pushed the question as to whether the estates were sufficient to cover the government debts. The Crocker estate, Mr. Summer said, had been incorporated, and was estimated at from \$2,000,000 to 30,000,-000; the Hopkins estate approximated \$3,000,000: the Stanford estate admittedly at \$17,000,000, and the Huntington the

Must Wait Until Bonds Mature.

It was suggested by Representative Bell of Colorado that proceedings could not be brought against the stockholders of the road until the security, the road it-self, had been exhausted, and in the discussion it was said by Chairman Reilly that no proceedings could be taken against the estates until bonds matured; that only notice could be given of the

claim against the estates.

Mr. Sumner said that Mr. Huntington had admitted of having spent over \$1,-000,000 in past congresses for legislation. Incidentally Mr. Sumner charged that the Central Pacific had corrupted judges and legislatures, and had debauched the politics of California.

Representative Geary of California said he could not subscribe to the charges that the judiciary of California was debauched, and spoke briefly in favor of a foreclosure of the mortgage by the gov-ernment. Hopkins and Crocker had been long dead, he said, and it was a question whether the government could recover anything from their estates.

If the right of action did not mature until the debt matured, there could be no action against the Stanford estate until some of the bonds matured, and there was no money forthcoming to pay them.

AT THE PEST HOUSE.

The New Building Completed and Patient

The pest house is completed, and before this reaches the public the patient with those who have been quarantined with yesterday. him, will have been removed from Houghs Neck, and the people there will breathe

more freely. The pest house is situated east of the almshouse, near where the one destroyed fire was situated. It is a one-story building, 23x24 and is made after the style of beach houses, without any plastering. The building is divided into four rooms, which can be used as three sleeping rooms and a kitchen.

Ever since the building was completed an officer has had a roaring fire to get the house dry, so that at 10 o'clock this morning, when the parties were removed, it was in good condition.

CADMUS' TESTIMONY.

His Statement In Regard to His Interview With Manufacturer Gaston.

WASHINGTON, June 8.-The testimony of Representative Cadmus was made public

Mr. Cadmus said that he knew Mr. Gaston, the Wilkesbarre (Pa.) wire manufacturer, and that on the 6th or 7th of March Mr. Gaston came to him and said: "I do not believe the tariff bill will pass."

When asked why he thought so, he said: "I was in my room last night and there were a number of sugar men, and I think senators among them, in the adjoining room, and from what I heard, I do not believe the bill will pass."

When asked whether Gaston had mentioned the names of any persons present in the room, Mr. Cadmus said: "I do not remember about that. He may have mentioned some names, but I do not

recollect now." Then he added: "I want to say post-tively that if I did recollect names, I teries—Taylor and Grady; Clarkson and Zimshould not give them to the committee,

but I do not remember any." He said, after further examination, that he did not think any names were mentioned. He said he had repeated the conversation with Mr. Gaston to Mr. Shriver of the New York Mail and Express two months after it occurred, but he said he At Baltimore: months after it occurred, but he said he names. NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration government does not affect the progress government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. HOUSE BUSINESS VERY DULL.

by a Michigan Member.

WASHINGTON, June 8 .- The senate, in considering the agricultural schedule of the tariff bill yesterday, agreed to paragraph 190, putting a duty of 20 per cent ad valorem on buckwheat, corn or maize oornmeal, oats, rye, rye flour, wheat and wheat flour, and of 15 per cent on oatmeal; but admitting each of these products free of duty from any country which imposes no import duty on the like prod-uct when exported from the United States. The 15 per cent on oatmeal was offered as an amendment from the finance commit-

It is more than probable that the agreement which Mr. Harris and Mr. Aldrich sought to make in the senate, but which was objected to by Mr. Quay, will be made today. Under this agreement, all the succeeding schedules of the tariff bill lown to wool will be discussed under the

five-minute rule.

This, the Republicans say, does not indicate that they have given up the fight, but does show their desire to get to the wool schedule, where a contest, unsuc-cessful, but none the less vigorous, will

Religious Squabble In the House. The house had the Indian appropriation bill under discussion yesterday.

The main feature of the debate was an attack on the Catholic church, made by Mr. Linton of Michigan, in which he argued against the contract Indian schools, saying that under this system the largest share of the appropriation for educating the Indians went to the Catholic Indian schools.

The other point of interest was the debate on the location of the Indian sup-ply warehouse, the New York delegation protesting against the abandonment of the warehouse at New York for one at Chicago. This gave rise to a spirited debate between the champions of the two

Several Lives Lost. BRIGHTON, Colo., June 8.-Seven boats body has been recovered.

The New Cruiser Minneapolis ar Honor to the Navy.

COMPARED WITH THE COLUMBIA

She Shows a Better Average of Speed and Power.

PHILADELPHIA, June 8.—The new United o'clock last night from her preliminary, or builders' trial trip.

The big cruiser acquitted herself most creditably, proving herself the equal, if not the superior, of her sister ship, the Columbia. While it is true that the Minneapolis did not equal the record of 22:87 knots an hour made by the Columbia on her official trip, she did better than her sister ship did on the preliminary trip of the latter, the speed of the Minneapolis being 21:75 knots, while that of the Columbia was but 20:98.

This was accomplished in spite of the fact that the new ship had to burn anthracite coal, which is regarded as a handicap. As a result of this trial it is freely predicted that the Minneapolis will make at least 23 knots on her official trip. Early in the morning, anchor was weighed, and the Minneapolis steamed out to sea the from Delaware Breakwater, a distance of about 50 miles. Then she turned, and at 10 o'clock started back again. Now she was under forced draught, and the cinders were flying from her funnels like hail.

Her Trial a Success. The shafts were whirling round at the rate of 136 revolutions per minute, and the screws were churning the blue water into buttermilk. Picking up her heels, the vessel flew along in the face of a spanking breeze, that flung the spray in showers clear over the bridge.

On she sped, like a frightened deer, while the guests on board watched the logs, watch in hand, to see what she was doing. When Cape Henlopen was reached, Captain Sargent said the Minneapolis had made 21:25 knots an hour. She had done this, he added, in water the mean depth of which is 18 fathoms, and

can do better in deeper water.

The record made by the Columbia on her preliminary trial was 20:98 knots, so that the Minneapolis had beaten it by about three-quarters of a knot, and still has something up her sleeve. In horse-power, too, she excels the Columbia, hav-ing developed 20,800, while that of the Columbia is about 18,000.

Oregon's Disastrous Floods. PORTLAND, Or., June 8 .- No accurate estimate of the damage by floods along the Columbia and Willamette rivers can be made. It is certain, however, to run into millions of dollars. The entire north-west, including Idaho, Washington and Oregon and British Columbia is virtually shut off from the east by the floods. The

WASHINGTON, Ind., June 8.-The mine workers' strike is virtually ended, as far as this section is concerned, and the miners will probably resume work Monday, as they have no grievance, and only quit work in order to help the movement along. A meeting is to be called tomorrow, and prominent miners say that a resolution to go to work will be the re-

FOR INVENTIONS.

Equal with the interest of those having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not motion, which was eventually rejected by entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys, and of seeing that inventions are well protected by valid patents, we have re-

tained counsel expert in patent practice, and therefore are prepared to

Obtain Patents in the United States and all Foreign Countries, Conduct Interferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to Scope and Validity of Patents, Prosecute and Defend Infringement Suits, Etc., Etc.

If you have an invention on hand send a sketch or photograph thereof, together with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are seldom necessary. If others are infringing on your rights, or if you are charged with infringement by others, submit the matter to us for a reliable OPINION before acting on the

A rule providing for debate under the five-minute rule and a vote at 5:30 was brought in by the committee on rules and adopted by the house, but was subsequently amended to allow two hours' general debate.

The advocates of state banks concede defeat on the vote to be taken in the house today on repealing the tax on state bank currency. At the outset of the de-bate the state bank men counted on 140 votes. Their ranks are thinned by absence and pairs, however, and they now admit that the majority against the state banks will be very large.

PROMINENT SENATORS JOIN IN.

But Little Moment.

WASHINGTON, June 9 .- An agreement was reached yesterday in the senate to proceed with the agricultural schedule, covering about 10 pages of the tariff bill, under the five-minute rule, but the progress was almost as slow as before the arrangement was made. Eight paragraphs, 190-198, comprising about a page and a half of the bill, was disposed of. Before the tariff was taken up, Mr. Hoar's resolution to inquire into the advisability of releasing the claim of the government against the Leland Stanford estate was laid on the table.

Mr. Aldrich (Rep., R. I.) took occasion, early in the debate, to make an explanation concerning newspaper reports Central depot, where they took the 3:45 printed about a quarrel alleged to have train for Sing Sing. Just before leaving taken place between himself and Senator | Dr. Myer said: "I am going to spend the Pettigrew, relative to his (Aldrich's) rest of my life in prison. He was apparently in good

Before taking his seat, however, Mr. Aldrich announced that as a protectionist he would, if opportunity afforded in the consideration of the bill, vote for any rate of duty he thought just and reasonably

protective in its character. Mr. Hale called attention to the fact that when it was proposed by exactly the same reciprocity provisions to deliver the northern farmer into the hands of his Canadian rival, all the Democrats had voted aye, but when it came to the southern article of rice they voted no. The Republicans believed in the protection of both sections, and had voted against both provisions. He denounced the bill as sec-

Mr. Mills said, rather hotly, that whenever he heard the cry of sectionalism it was to him the cry of "Stop thief." It was always the cry of the man flying before the police, with the stolen plunder under his shirt. Why had the Republicans not cried out when the rate on Sumatra tobacco was fixed at 80 per cent? That duty as well as duty on rice had been yielded by the Democratic majority as a protective duty, because it was forced upon them. Not a pound of Sum-

atra tobacco was gr wn in the south.

A rather heated debate grew out of an attempt on the part of Mr. Hoar, at this point, to induce Mr. Mills to tell the senate who it was that had applied so much pressure to the Democratic majority that they were forced to break their platform pledges. Who was it, he asked, who would not vote for the bill if it contained free coal, free iron ore or free sugar? Who was it forced this high duty on rice? The senators from the coal states had declared, on the floor of the senate, that they would have voted for the bill,

free coal or not. Mr. Mills replied that observations like the McKinley bill was codidered, the then senator from Vermont (Mr. Edmunds) had insisted on and had obtained for consuls general, consuls and vice a duty on maple sugar and maple syrup as the price of his support of the measure The power of organization was greater on the Republican side than the Democratic side, yet the Republicans had lately expressed surprise at the evidence of organization on his side. He admitted they had made concessions. They intended to stand together and pass this bill in spite of Republican filibustering. Bad as it might be, it was infinitely better than the

Mr. Hoar thought Mr. Mills' reply to his question no reply at all. It was a cry of agony. He recalled that a few days ago Mr. Mills had described himself as between the devil and the deep sea. After this cry of rage, he thought there was in the sea or in danger of drowning. Everyone knew who had him. With much sarcasm, Mr. Hoar proceeded to try to goad Mr. Mills into a direct reply to the question as to who had forced the main concessions in the bil

Mr. Hale Joins In. Mr. Hale joined forces with him, and when he sat down Mr. Mills sought an

opportunity to reply. Here Mr. Berry remonstrated in an undertone, and Mr. Mills left the chamber with some indications of irritation. Mr. Berry then stated that he had remonstrated because he did not want to see a Democratic senator follow the example of a Republican senator in a course he considered a violation of good faith, under a unanimous agreement.

Mr. Hoar replied very deliberately that a man who took this view of the case displayed gross ignorance, and Mr. Berry asserted that the Massachusetts senator had wilfully and knowingly done that which no honorable man could afford to do, and he expressed his surprise that the benator from Massachusetts should have done such a thing, which he had never known him to do before. Mr. Hoar West Quincy. briefly defended his action, and the episode closed.

The Day In the House.

The day's proceedings in the house were enlivened by Mr. Walker's (Rep., Mass.), complaint of the poor ventilation of the house and the incapacity of the architect of the Capitol, and by Mr. Weadock's (Dem., Mich.) reply to the attack of Mr. Linton on the Catholic church.

The business transacted in the morning hour was the passage of a bill for the registry or enrollment of the Bark tion of the Columbus conterence. Skudenaes, and of a bill to define the present units of electrical measurements The conference report on the Pennsy vania and New Jersey railway bridge bill was adopted, and a resolution authorizing the Maryland state courts to oc cupy for five years the old United States regard to the objections which she had court house in Baltimore was agreed to The question of continuing the Indian

Dr. Henry C. F. Meyer was convicted of murder in the second degree May 18, 1893, for the poisoning of Ludwig Brandt, otherwise known as G. H. M. Baum. The trial began on Dec. 4, 1893. The death of Baum is alleged to have been the outcome of conspiracy between Dr. and Mrs. Meyer and Carl Muller to defraud the Washington, the Ætna, the New York, and the Mutual Life Insurance companies, in which Baum's life was insured for \$8500.

After a great deal of difficulty in procuring the jarors, and innumerable de-lays from various causes, the trial was brought to an abrupt conclusion on Dec. 18 by Alexander B. Low, one of the jurors, becoming insane while Charles W. Brooke was summing up for the defense. The jury was then dismissed and a new trial ordered.

The case was called up again April 13 1894. A jury was finally secured April 25, since when the trial has dragged along, relieved by the sensational incident of May 13, when Mr. Chandler suggested that his client would plead guilty to manslaughter. Assistant District Attorney McIntrye refused to receive the plea, and then Mr. Chandler explained that he had only been joking.

PATENTS

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and the state of the s ventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceivement to deter him from quickly conceivement to deter him from quickly conceivement. ficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventions, design patents, trade marks, labels, copyrights, interferences, infringements, validity reports, and gives especial attention to rejected cases. It is also prepared to enter into competition with any firm in securing foreign patents. foreign patents. Write for instructions and advice.

will do all the Cooking, Washing and Ironing of the family and satisfy the trust and how he came to be in Washington at that time, Mr. Terrell said he the most exacting. liked Washington and usually spent his winters here, as it was a delightful city. Mr. Havemeyer, the president of the Sugar trust, was, he said, an old friend of his and had asked Terrell to let him know if he discovered anything during his stay here of interest to him. Naturally, when Mr. Havemeyer came here he occupied Mr. Terrell's rooms. So it hap-

pened that this meeting occurred. While it was in progress the general tariff situations was discussed between the two senators and Mr. Havemeyer, Mr. Terrell taking little part in it. Mr. Terrill said that sugar was mentioned. He denied, though, that any such conversation as was related by Mr. Edwards ever occurred, or that anything that could be construed as such, took place between the gentlemen. Reference was also made to a meeting

between certain senators and members of the trust that was said to have been held at the rooms of Senator Camden. Mr. Terrell said that he attended one such meeting, and there were present beside Mr. Havemeyer, Senators Camden and Jones, chairman of the sub-committee. Strikers Endeavoring to Wreck Trains. Uniontown, Pa., June 9.—Two attempts have been made by strikers to wreck coal and coke trains here. A frog hooked tightly over the rail was discovered near and a switch was broken open and wedged apart. The strikers seem to be determined to stop the shipment of coal and coke from the regions.

Buildings Washed Away by Floods.

BONNER'S FERRY, Ida., June 9.-Main street is now under water from five to 10 feet. More than 20 buildings have been washed down the river. The heavy log jail was floated a distance of a mile, and is lodged in the trees. Every day parts of buildings, furniture, etc., are picked up, coming from higher up! the river. Ranches in the valley have suffered incalculable damage. All the valley crops are ruined.

STIVETTS' PITCHING

THE SUGAR INQUIRY. Proves an Enigma to the St. Louis Team While Clarkson Was Batted Freely.

BOSTON, June 9. - Jack Stivetts pitched a great game yesterday against the St. Louis team. Seven hits were all the visitors could get, two of these coming in the sixth, which with three bases on balls and an error by Nash gave the nine of Von de Ahe three runs. It was all Boston after this, the home team finding Clarkson for five hits in the seventh, including two baggers by Bannon and Duffy.

General Brooks' Prompt Action Prevents a Clash at Cripple Creek.

CRIPPLE CREEK, Colo., June 9.—General Brooks, at the head of the state troops, intercepted the deputies on the east slope of Carbondale hill and ordered Sher ff Bowers to send them back to camp in Only a few moments of parleying took

place, during which Brooks notified Bowers that unless he sent his men back to camp he (Brooks) would take them back. The state troops made remarkably quick time up the east side of Cow moun-

tain, and headed by General Adams and his company of deputies, just as they were taking up their position on the northeast side of Grassy Gulch, preparatory to opening fire on Bull mountain, three-quarters of a mile away on an air line, and in open view of the fortifications. The militia now hold the key to the situation, and are camped at the head of Grassy Gulch, in full view of the miner's fortifications. This last experience of the deputies

with the militia probably ends the struggle, as General Brooks has absolute control of the situation, and his orders are for the state troops to prevent a meeting of the miners and deputies.

The Armor Plate Investigation.

WASHINGTON, June 9. - Lieutenant Ackerman of the United States navy was heard yesterday by the house committee on armor plate frauds. He had heard that Superintendent Schwab and other officials and employes had an interest in the Carnegie company and had a motive in passing off plates not up to standard. He found that certain lines of work would be stopped when he entered a shop. One of the superintendents, Mr. Kline, had Evans' Station on the Baltimore and Ohio road. A little further north, iron and ties were found piled across the rails. works had influenced him to look with suspicion on every plate.

A New Debt Funding Scheme.

SAN FRANCISCO, June 9 —A special from Washington to The Examiner gives what purports to be a synopsis of the new bill funding the debt of the Central and Union Pacific railroads. The new plan provides for the issuance of 3 per cent bonds, interest payable semi-annually, and to run 50 years. Besides the com-panies are to be required to pay the United States semi-annually 1-2 of 1 per cent of the entire debt for 10 years, or a total of 10 per cent for that period, thus liquidating 1-10 of the total indebtedness in the next 10 years.

England's Representative Going Home. The British warship Champion about to depart for Victoria, B. C., but at the solicitation of some of the residents the commander had promised to defer sailing until relieved by another British warship.

Proceedings Probably Ended.

WASHINGTON, June 9.-The court of appeals of the District of Columbia dis missed the appeal from the decision of Judge McComas quashing the indictment charging Colonel Ainsworth with responsibility for loss of life in the Ford's theater horror. This probably ends the criminal proceedings against Colonel Ainsworth.

New York's Rapid Transit Commission. NEW YORK, June 9.- The new board of rapid transit commissioners met yesterday and organized. William Steinway was made chairman. The other members are Mayor Gilroy, Alexander E. Orr, president chamber of commerce; Controller Fitch, J. H. Inman, Seth Low, John H. Storm, John Claffin.

About the Size of it!

You can always judge a town and its people by its newspaper, says the Chicago Inter Ocean. Never buy town lots or land where a poor, half-starved newspaper is published. Newspapers these days are a necessity, not a luxury. They are so cheap that the poorest man can have one-unless he is running a bill at a saloon. It matters not how many city papers a man may take, he should give an honest support to his home paper.

An Interesting Srory of the Race the Winners.

The Quincy Yacht Club sailed its 117th and opening race of the season off the yacht club house, Houghs Neck, on Saturday afternoon.

Seventeen boats entered, five being in the new cruiser class.

A smoky sou' wester was blowing when the preparatory gun was fired. Several of the boats put in reefs and one or two had double reefs. Before the race was finished the wind began to fag and the reefs were shaken out and at the finish there was

The White Fawn protested the Beatrice could not undertake large enterprises, but for fouling the buoy on Channel rock. The crew of the Beatrice claim that they did tended and what was for their good was not foul the buoy. The protest has been referred by the judges to the Regatta committee. The first prize, \$7, goes to the Beatrice if the protest is not sustained, and the second, \$3, to the Nudjekeens.

In the second class there was a lively race between Harrison Grey Otis' Magpie, Commodore Faxon's Aurisa, and Burlser's the Opeechee at 4-22-58, and the Aurisa at 4-23-29. The Magpie then had a lead of 52 seconds over the Opechee and 1 minute and 33 seconds over the Aurisa, but at the finish the Opechee had cut her down to 35 seconds, and the Aurisa had fallen behind two minutes.

The first prize of \$7 goes to the Magpie,

and the second of \$3 to the Opechee. Those who remember the Wildfire in her palmy days regretted to see her so easily outsailed by Williams' newboat, In It.

The cruiser class made a good showing. The Smoke and Niobe had a hot fight for the first prize. On the first time around the course the Smoke crossed the line 1 minute, 49 seconds ahead of the Niobe and at the finish 1 minute, 19 seconds ahead. As the Smoke has not been officially measured it is impossible to tell which boat beat on corrected time.

The judges were Mr. Geo. E. Pfaffmann, Mr. James S. Whiting and Mr. Luther W.

Each of the winners has a leg in the club championship.

PATENTS

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. DISCUSSION.

The Program For the Week In Both Legislative Branches.

WOOL AND COTTON IN THE SENATE

Indian Question Has the Right of Way In the House.

WASHINGTON, June 11.-It is expected on both sides of the senate chamber that the woolen schedule will be reached durng the present week in the consideration f the tariff bill.

There is a tacit agreement among the Republican and Democratic leaders that the debate shall be continued under the five-minute rule on the cotton manu-

doubt that many Republican senators

The Democrats, while not expecting or hoping to secure consideration of this schedule under the five-minutes' rule, are

resort to night sessions for that purpose.

The House Forecast. The Indian question in its various ramifications on schools, agents, rations, sup-

ply depots, will continue to occupy the attention of the house the early days of Judge Heman, in charge of the bill,

said that he expected to pass the bill by tomorrow night After that there are a number of important bills struggling for priority. The general deficiency will will be reported to the house tomorrow, and Chairman Sayers of the appropriation committee will urge its immediate consideration in

tion bills. Representative Sayers will be in charge the fact that Representative Breckinridge s chairman of the deficiency suo-com-

It is expected that Representative Hatch ill try to have the anti-option bili folow the Indian bill. Representative Cooper also expects to have a day set apart for his bill, authorizing the taxation of greenbacks.

Representative Livingston is pressing the bill for government aid to the cotton exposition in Atlanta.

Chairman Culberson of the judiciary committee also wants early recognition for several important bills affecting federal court procedure, and the territorial statehood bills are being vigorously pressed to the front.

No exact order of priority for these bills has yet been made, but they are the

THE COAL STRIKES.

West Virginia's Governor Determined to Protect the Coal Traffic.

CHARLESTON, W. Va., June 11.-Governor MacCorkle is evidently perplexed at the condition of affairs at Boggs Run. A telegram received yesterday stated that a coal train had just been brought past the strikers without any trouble, and a dispatch received a short while after contained the information that a train had just been stopped by strikers a short distance below Moundsville, and that two companies of military would be sent at once to disperse the mob.

The character of all information which the governor had received up to the reception of this last telegram, indicated that the trouble had practically ended, and he hoped to be able to withdraw the military within a very short time.

This outpreak, however, only confirms his original view, that the trouble is too leep seated to be settled by the show of force on the scene. He says the entire state militia will be used in moving coa nto Ohio and Pennsylvania.

CONFIRMATION.

First Visitation of Bishop Lawrence .- Ar Excellent Sermon.

The morning service at Christ's church it became necessary to place chairs in the The Quincys Lose Their First Game isles to accommodate those who would otherwise have been obliged to stand.

The occasion of the large congregation was doubtless due to the fact that it was the first visitation of Rev. William Lawrence, D. D., Bishop of Massachusetts.

Previous to his discussion Bishop Law rence spoke briefly upon the many changes that had taken place in Quincy during the past twenty-five years and the changes in the parish. He then took for his text the words found in the twenty-seventh chapter of St. Matthew, the 41 and 42 verses: "He saved others, himself he cannot save."

A young man graduates from college with many bright prospects before him, but he devotes himself to the work of saving people. When he is fifty he is aged, tired and worn out. He has been doing a hard and thankless piece of work. There is no romance about it. His friends say, he has spent his whole life to save other people but has not saved anything himself. We have not got to go back half a century to find those who have given up their lives to save others, classed fanatics. Christian changes in positions : life affords the most beautiful and picturesque features of self sacrifice. Some time or other one has to make his choice betwentieth, when the new steamboat makes tween the spirit of priests or the spirit of Christ. There can not be gain without losses or losses without gain. If a man will live his life for others he will find it. but if he is living his life for himself he will loose it.

There are certain sorrows and sins part of Christians.

When there is work to be done the modern society turns to the church. In every place there are a class of degraded people. There is not one feature in London or the North End, Boston, that does not exist in some form in every town, no matter how small. Any man or woman who has not the deep sense of responsibility for the salvation of some one, has not the element of Christian life. Why should there not be in a society like this, this work. Our imagination cannot grasp the good work that might be done, if some would only give themselves up to the work of saving souls. Our church calls for women who will pass through a three years' course, for work among the low classes. They are called deaconesses and are free to lay down their work at any time when they are required for home duties. Have we that feeling that the great work of life is not to keep well fed and nicely clothed but to help other people and try and make them better and happier, and can they say of us when we die. " He saved others: but did not save himself.

After the sermon Bishop Lawrence administered the rite of confirmation to eighteen candidates and afterward briefly addressed them.

A Protest Against Terrible Explosions on Paper by an Investigator.

Naval men must be amused at the terrible explosions on paper caused to warships as portrayed in the recent editions of "penny dreadfuls." A torpedo discharged from a torpedo boat is supposed to have blown her majesty's steamship Narcissus, a vessel of 5,600 tons, into the trips. twain, which ship "then plunged stern foremost into the sea, and with the union jack still flying disappeared without a Boston by electrics for 20 cents. soul on board being able to save him-

I was present when, I believe, two torpedoes, with 100 pounds of gun cotton in each, were discharged against her majesty's steamship Resistance, protected by hers, as an experiment in Portsdown creek. The Resistance was spenearly as many separate compartments line is established. Weymouth and Quincy as our new ships. She certainly sank at | will assist. the last discharge when the nets had no "blowing out of the water" about it at all. The Resistance was, if I remember rightly, of about 4,500 tonnage. As to the actual effect of gun cotton

employed in blowing vessels into the air, I can call to mind one case which happened to my personal knowledge. A slave dhow of about 40 tons burden had been chased by the boats of one of our cruisers and escaped immediate capture by running up a creek in the north part of Pemba island, near Zanzibar. She arrived at the top of spring tides and had been lightened beforehand. Although condemned in the Zanzibar prize court, she could not be floated for several days. A party of men was therefore sent on shore to destroy her, and two 16 pound charges of gun cotton were placed under her keel, holes being dug out and tamped down, one under the mast and the other 12 feet from the stern. Instantaneous fuses were fitted in pistols, and the party retired about 50 vards into the bush. The Arabs were in numbers looking on, not offering any resistance. When the pistols were fired together, by the fall of a flag, the dhow was hoisted bodily up into the air some 30 or 40 feet, broke in two in a V form and fell in pieces. The Arabs rushed away, crying out "Ajib. Shaitan!" (Wonderful, the devil!) And this incident struck a considerable blow against the proceedings of the Pemba slave importers. Still there is a great visiting friends. difference in blowing up a vessel of 40 tons, almost on land, with 32 pounds of gun cotton, and blowing up a ship of 5.000 tons in water, if even with 200 pounds of gun cotton - Westminster

A SMOOTH ENGLISHMAN.

& Specimen of the Scamps Who Slip Into

A young Englishman, "of good familv." of course—all Englishman are left from prominent New York families who had received him on terms of intimacy. The funny part of the business is that the young Englishman was a self confessed thief in his own country, had received letters of introduction to New York people and been shipped over here in order that he might make a living. His name is withheld out of consideration for the families with whom he has associated here and whom he has robbed. Having been exposed, he has re til he finds another opportunity to re

This pathetic tale leads me to make a few remarks as to how these foreign scamps obtain a foothold in our "best society." Suppose the scene is the opera. Mrs. A. notices a stranger in Mrs. B.'s box.

"Who is that over there with Mrs. B.?" she asks.

"Oh, that's a young Englishman. met him at the club last night. I think his name's Cremorne. Seems a jolly fel-

low. "He's nice looking. You may bring him to my box if you choose.

So Cremerne, the scamp, is duly passed on from one family to another, no one knowing a thing about him, or caring, for that matter, so long as he is presentable and a novelty. He may have got his first introductions through accident, mistake or a chance acquaintance on shipboard. It matters not. He is soon in the swim, and being an iron pot is very apt to get the best of the earthenware families who have taken him up. In this recent incident the people who petted the pilferer are to be congratulated that he didn't get away with a daughter or two as well as with their money and bric-a-brac. - Chollie Knickerbocker in New York Recorder.

SHAVED HER HUSBAND

How a Baltimore Lady Raised Money to Assist In Improving Church Property. The ladies of Memorial Protestant

Episcopal Church of the Holy Comforter are industriously working to improve the church property. Some time ago they got together, and after discussing ways and means each pledged herself to raise a certain sum of money within two months. The time having expired, a meeting was held Tuesday night to relate experiences and to learn the result of the various undertakings. Each lady returned her card with a larger sum than she pledged herself for.

The methods used to raise the money were almost as varied as the numbers primary department marching up and down of the cards. One lady made and sold soup, the profit from which supplied her with money to redeem her pledge. Another sold cakes, another candy, and good. Miss Small, principal of the another made and sold dresses. One lady Woodward Institute, gave a charming adopted a novel plan to raise the promised money. She has not only strong nerves and a steady hand, but a husband who has great faith in her, for he has allowed her to shave him and paid her the price which he usually paid his The report does not say anything about the condition of his face after the two months had passed. By the united efforts of the ladies a large sum was realized, which will be used Station. to renovate the church.—Baltimore Sun. Police Call,-3 three times

All mail matter, including that from Montreal and Toronto, posted on Thursday, was burned, as was also all express matter and baggage.

Tons of Ice Melted.

FALL RIVER, Mass., June 11.-Fire destroyed three large icehouses owned by William Durfee, located on the shore of North Watuppa Pond, in a section of the city about two miles from City Hall, yesterday. There were 2000 tons of ice in the buildings, valued at \$8000. There is very little insurance on it, and it is thought that more than half will be a loss. During the progress of the fire a number of horses were released from a near-by barn. One of them fell and broke a leg and had to be shot.

SHOCKING FATALITY.

Fire Chief Meets Death While In the

NEWTON, Mass., June 12 .- A terrible accident occurred here yesterday, whereby Newton fire department, lost his life, and his driver received probably fatal in-

The department was responding to box 23 shortly after 3 o'clock. Between West Newton and Newtonville, on Brookside avenue, the street is very narrow. An electric car stopped just as the department was coming down the street, and an icecart drove out of a side street, thoroughly blocking up one side.

The chemical engine, in the lead, got safely by on the other side. District Chief W. B. Randlett turned the corner suddenly, and in his efforts to avoid the car he struck a pole, throwing him out and demolishing his wagon. Chief Bixby came tearing along just then and endeavored to avoid the wreck of the assist ant district chief's wagon, but struck the cecart with terrific force.

He fell out on his head, and Driver P.
A. Rawson fell on top of him. The horse
was thrown several feet into the air, and the wagon was smashed to kindling wood. The chief was taken to the truck house near by, and asked to be sent home. Physicians were called and pronounced him uninjured, but last night at 8:50 he breathed his last. Driver Rawson was taken to the Newton Cottage hospital, where he lies in a dangerous condition. Chief Bixby was 50 years old and was chief of the Newton department since 1878. He was born in Framingham, and has been a fire fighter since his boyhood. He was president of the Firemen's Relief ssociation and a prominent member o the National association. He was also a Mason. He leaves a widow, two sons and

Judge Call's Injunction to Be Reviewed. JACKSONVILLE, Fla., June 12.-Information comes from Tallahassee that the su-preme court of Florida will review the injunction which Judge Call granted the \$1.50 Duval Athletic club in January last, restraining the sheriff from interfering with the Corbett-Mitchell fight. It is understood that Governor Mitchell is behind \$1.25 the case, as he is convinced that Call's de cision was contrary to law, and he wants the supreme court to finally pass upon the question of the legality of prizefights in Florida.

The finance committee reported to the house in favor of a resolve appropriating \$300,000 for building state highways, with an amendment providing for raising the amount by a state loan instead of making it a part of the state tax.

The Armor Plate Frauds. WASHINGTON, June 12.—In the armor plate investigation, Lieutenant Ackerman said the investigations disclosed no serious defects in bolts. He believed the superintendent of the works responsible for the irregularities, and while this super intendent was too shrewd to give orders for such irregular work, his indirect influence brought it about. This closed Lieutenant Ackerman's evidence. Th committee regard it as the most valuable yet given. The next meeting will be held tomorrow, when the Ackerman evidence will be gone over in executive session.

Did not believe the city had power to abate The annual contest for the Adams gold taxes. Quincy has fine natural privileges taken advantage of. As a general thing manufactories that spring up near cities are of advantage. To illustrate this the speaker said : A manual laborer coming into town will perhaps have 3 or 4 children who will attend school making an annual tax of \$20 on each child. He has to live here in town and the city gets from him a tax of \$30. He is worth in his working prime \$100 a year to the town which is therefor about \$50 better off by every ablebodied man who comes into the city. power, and was satisfied that the railway could if it had authority furnish it 60 per cent cheaper than it was today. The trouble is transportation facilities and power. Quincy has as good a chance on her water way as any other place in the State. Henry H. Faxon

Said every one of these schemes is for som selfish interest. The best thing is to get live men to go into business for themselves. The people who have been the most benefited by the street railway are the ones who find the most fault. He believed that they should be made to pay their taxes. He hoped the city would not take hold of any enterprise as a city.

R. F. Claffin Said the introduction of electric cars h pushed Quincy along and we have advanced in every line. You cannot illiminate competition and if Barre does better than you you had better study their methods.

Henry H. Faxon Said it made his blood boil to hear people talk about the electric railway when it had done so much.

Believed we had the weakest city charter in existence and that the committee should consider that also.

Thought we had an industry here, but the facilities are inadequate. If the N. Y., N. H. & H. R. R. could be induced to provide better facilities at South and West Quincy

it would be of great benefit. Councilman Moxor

Believed if we had the necessary qualifications in the way of transportation we could compete with other manufacturing places. For a residential city he believed in the city owning its lighting plant and having a system of sewerage. He would suggest that the committee request the Council to petition the railroad for fivecent fare and better facilities for freight. James McGrath

Said it was impossible for Quincy to become dustry and it would be a grand good thing an entire residential city. We have an industry here and it is increasing. We must therefore be a manufacturing city. He also believed in getting other industries here. He believed in a board of trade which would consider all matters and report at a future time.

There is some complaint in central and northern Maine of the seeds rotting in the ground. Senate With a Rush.

And Said to Be Satisfactory to Manufacturers.

WASHINGTON, June 12. - The senate's tapidity in dealing with the cotton schedale yesterday attracted the notice of Mr. Dolph (Rep., Ore.), who expressed his smazement at the fact that 10 pages of it had not occupied 80 minutes. Not a senator from New England, he said, had opened his mouth in protest against it. He wanted to know what arrangement

had been made to satisfy those senators. Mr. Aldrich said that the schedule was the most scientific ever prepared, and although the rates were not so high as cotton manufacturers desired, they were on the whole, satisfactory.

Receives the Highest Praise from the Best Physicians.

DR. H. F. MERRILL, the wonderful specialist of Augusta, Maine, after giving it a thorough trial in his practice, writes the following convincing letter of praise: GENTLEMEN :-I have of late been using some of your medicine in

my practice with the most pleasing and satisfactory results. I find that it acts like a charm upon the whole nervous system, and in scrofula and all cutaneous diseases. Its curative properties are fully equal to the claims made for it, and I do not know of one instance where it has not fulfilled all its claims. In cases of General Debility and Nervous Prostration it has proved itself invaluable. It also gives quick relief in Dyspepsia and Canker of the stomach, and is a remarkable fine restorative remedy. It is a great pleasure to be able to recommend such a remedy, as the results following its use are so wonderfully satisfactory. One great thing in its favor is its freedom from superfluous alcohol, and all injurious ingredients.

PROP. W. H. MORSE, M. D., F. B. S. So. of Westfield, N. J., author of "New Thera peutical Agents", the standard text book of the newer materia medica, Consulting Chemist and Therapeutist, one of the most widely known men among the medical profession gives it his highest endorsement, as testified by the following voluntary statement: "Allen's Sarsaparilla commends itself to me thera-

Its therapeutical power, physilogical activity, and chemical purity, are all noteworthy; and the reason is to be found in the fact that it is true to its name, or honest, as the word goes. That is, it is vegetable alterative, and tonic. Perhaps the highest praise that may be given it is that its action represents that of mercury, less the faults of that drug; for, has not Pereira said, "A perfect mercury would be a perfect

WILL COME TOGETHER

Oxford and Yale to Contest For Supremacy In Athletics.

NINE EVENTS TO BE CONTESTED.

The Conditions Considered Fair and Sportsmanlike.

London, June 12.—The Oxford Athletic club has sent a long letter to the Yale athletes concerning the conditions of the Yale-Oxford games. The letter contains

the following statements:
All difficulties of forming the Oxford team have been removed, and Oxford is fully prepared to accept Yale's challenge. The first condition of this acceptance is that there shall be nine events, namely: Flat races of a mile, a half mile, a quarter mile and 100 yards; a hurdle race of 120 yards, with 10 flights, a broad and a high jump and weight putting and ham mer throwing.

The second condition is that there shall be no more than two contestants from each university in any one event. The

other conditions are: That all contests shall be conducted in accordance with the rules governing the annual contests between Oxford and Cam-bridge, excepting only the weight-putting and hammer throwing, in which rules observed between Oxford and Cambridge and between Harvard and Yale, respectively, may be followed, that the referee's decision be final, and no appeal may be taken; that the contestants be chosen soley from the Englishmen and Americans sharing or qualified to share, respectively, in the foregoing contests in 1894; that Yale and Oxford mutually certify that none of the competitors ever shared in any competition with or against professionals within the definition and laws of the Amateur Athletic association of England; that both clubs accept the Queen's club's financial proposals, namely, that the Yale and Oxford and Queen's clubs divide equally the net profits or losses of the

Yale Accepts.

New Haven, June 12. - At a mass meeting of Yale university students held last night, it was unanimonsly voted to send a representative team to meet Ox ford at the Queen's club grounds next

President W. S. Wolcott of the Yale Athletic association presided and introduced C. H. Sherrill of Washington, Yale '89, as a representative of the Yale alumni. Mr. Sherrill & tailed the efforts of captains of former teams to arrange a meet with Oxford, and stated that the project was one that appealed to the college spirit of all Yale men as highly desirable especially this year, when Yale had the strongest team which has represented the university in years.

Mr. Sherrill mentioned the efforts of Mr. Van Ingen and other Yale athletes, which terminated with the acceptance by Oxford of Yale's challenge, and stated in conclusion that nothing apparently prevented a glorious extension of Yale's honorable athletic career from a national to an international affair.

President Wolcott asked for other speakers, but none volunteered, and a yea and nay vote was then called for. A hearty "Yes" was the response, without a dissenting voice.

President Wolcott then gave out some of the details of the proposed match. It will take place at Queen's club, July 16. President Wolcott stated furthermore that the Yale Financial union stood sprinter; Morgan, mile runner; Woodhull, middle distance runner; Brown and Hickok, shot putters and hammer throwers; and Sheldon, jumper. The team will sail from New York on the steamer City of New York, June 20. The contest will take place on the

A CLOSE GAME.

Boston Pulls Out of a Small Hole Against

Boston, June 12.-The local baseball team came within an ace of being beaten out at the finish yesterday. They scored 12 runs in the first four innings and then went to sleep, but Anson kept the Colts working, and at the end of his half of the ninth it looked all day for the boys in red, but they managed to win out however. Except for the fielding of Jimmy Ryan and Dahlen the visitors played a lifeless game, except at the bat, where they lined out Stivetts' curves in great shape. For

Some Things the Residents Like and Others They Don't. To the Editors of the Daily Ledger :

In the able speech Mayor Hodges de livered when he stepped in as Mayor of Quincy, he spoke quite forcibly about the laying out of a boulevard between Houghs Neck and Quincy, The residents of Houghs Neck would be very glad if it was done, but would like some other things first. In talking with one of my neighbors the other day he said he would like to put a little paint on his veranda but did not dare to, as he cut the grass in his front yard last year and was taxed one hundred James Dignan, administrator; bond, \$1,000. dollars more than the year before, and when he protested, was told that he had made improvements, for that reason the value of his property was more.

How have we been treated during this small pox scare? Not until repeated efforts on the part of Houghs Neck citizens was the patient removed.

Now if Quincy wants to do anything for Houghs Neck, just give us a Board of Health we can talk to without being insulted, and if we must be vaccinated, send us a doctor of the body, instead of a doctor H. A. BARKER. of the soul. Houghs Neck, June 12.

East Weymouth people are not anx ious for it either, but would very much like to see an extension to South Weymouth which is now nearly a day's journey by steam cars with changes at Braintree and South Braintree. The distance by street is about two miles and a line of electric would do much to unite the town and ac commodate the people.

Children's Day at Atlantic.

"Children's day was kept in Memorial church, Atlantic, last Sunday. In the morning a special service of song was held and a sermon by Rev. J. H. Yeoman from the text: "How much then is a man of more value than a sheep?" Several infant children were baptized, and Bibles were presented to those who were baptized during the year.

In the evening the Sunday School gave a carefully prepared programme in a concert appropriate to the day. Both services were enjoyed by congregations that packe the house to the doors. The decorations were by Mr. Natt Cnurchill.

At the First Church.

Children's Sunday was observed in an appropriate manner at the First church Sunday morning. The desk was very prettily trimmed with cut and potted flowers and the services were largely attended. The exercises commenced with the bap-

tism of the following infants: Grace Frederick Spear, Walter Nicol, Harold Franklin Mitchell, Paul Blackmur, Mary Elizabeth Dewson, Harvey Field Dewson and Hubert Lincoln Johnson.

Following the baptism Rev. Mr. Butler the pastor, delivered an interesting ser mon to the children, in which were in troduced several humorous stories.

Poverty. The city woke. Down the long market place Her sad eyes wandered, but no tears they shed In her bare home a little child lay dead. Yet she was here, with white impassive face, And hands that had no beauty and no grace,

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who being on the the American inventor, who, being on the alert, and ready to perceive the existing der alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable interests that counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. THE WOOL SCHEDULE

Democrats and Republicans Likely to Reach an Agreement.

MODIFICATIONS IN INCOME TAX

May Make It Acceptable to Opposing Democrats.

WASHINGTON, June 18 .- Senator Harris, Democratic manager, says that he has the requis te number of Democratic senators, 43, on his list, who have agreed to remain and make a quorum in the event that any attempt is made by the Republicans to obstruct or to delay the tariff bill.

He says that he does not believe that the Republican managers, Aldrich, Allison, Hoar and Sherman, are disposed to attempt any unnecessary delay. In fact, be says these senators have assured him that they are disposed, after reasonable debate on free wool and the woolen schedule, to aid in getting the bill through the senate as speedily as possible,

In the event that wool should be put on the dutiable list, which the Republicans and Populists will strive to do, the wool schedule will have to be very much mod-ified. This latter schedule has not yet been fully settled. The Democratic managers are waiting to see if any change is to be made in free wools. If it remains on the free list, as is likely, the Democratic managers have indicated a willingness to make nearly the same concessions to the local manufacturers that they have made to the cotton manufacturers. Senators Hoar, Lodge, Hawley and Platt, whose states are so deeply interested in this industry, say that if the Democrats will do as well for wool as they did for cotton, no serious opposition will be made to that schedule. If an equitable arrangement be agreed upon in regard to the woolen schedule it will greatly facilitate the passage of the tariff bill.

Figuring on Changes. There is some prospect of important changes in the internal revenue part of the tariff bill, and of further modifications of the income tax feature. The finance committee has been considering a suggestion looking to the dropping of all the purely administrative part of the bill, which would result in leaving the present administrative law on the statute books.

The question was under further consideration yesterday, the long speeches made on the floor of the senate rendering it unnecessary for the members of the committee to be present in the senate, but no decision has yet been reached. The committee is also uncertain whether any change will be made in the incometax, but is considering the proposition for its modification, which it is believed will make the bill acceptable in this respect to Democratic senators who oppose the tax. Details are difficult to obtain, but it

is understood that if any changes are made there will be a shorter limitation of time for the bill to remain in effect. Quay's Long Spaech. The absolute blockade of the tariff cill

made the day previous. Not a cog was turned. The entire eight hours were devoted to set speeches pre-liminary to the consideration of the wool schedule. Mr. Quay, who has been quies-cent for five weeks, resumed the delivery of his speech, which has already occupied four days, and after speaking four hours yesterday his manuscript seemed unappreciably diminished. Then he yielded from sheer exhaustion, and Messrs. Pettigrew, Power and Peffer made set speeches against free wool.

It is probable that the actual consideration of the wool schedule will be reached before adjournment today. During a lull in the debate yesterday, Mr. Mitchell moved to lay the tariff bill on the table. The motion, however, was without special significance, and was defeated by a strict party vote.

Mr. Chapman, the Wall street broker, who refused to answer questions, was re-ported as contumacious to the senate by the sugar investigating committee, and a resolution was introduced to bring him to the bar of the senate for contempt.

Silver Again. Senator Squire of Washington introced a bill for the free coinage of silver. It provides that the owner of silver bullion may deposit it at the mints, receiving n payment standard silver dollars, equal to the value of bullion on day of deposit, the difference to be retained by the government as seigniorage as a reserve fund. and used by the secretary of the treasury in maintaining the parity of silver dol-

The coinage of silver dollars shall not exceed \$4,000,000 each month. When the ggregate amount of money in the country reaches \$40 per capita, further silver coinage shall be discontinued, and shall be resumed when it falls below that

Provision is made for coining silver half dollars of the present size and maintaining their parity in the same manner as other silver. They are also made legal

Slow Work In the House

Two hours were consumed in the house over a bill reported by Mr. Outhwaite, setting aside \$100,000 from the fund belonging to the estates of deceased colored soldiers of the civil war, for the purpose of erecting in the District of Columbia a national home for aged and infirm colored people. The bill was passed. The Indian appropriation bill was then taken up, but the house adjourned at 5:57 p. m., without completing its consideration.

STARTLING ARRAY OF FIGURES

Presented to the Public by a New York Newspaper.

NEW YORK, June 14.-A New York paper, which has heretofore been regarded as favorable to Tammany, prints

It is sought to be shown in this article the amount of illegitimate revenue said railroad-bill to a third reading by a vote to have been received by the police of of 121 to 29, with 21 pairs. All amend-New York annually, and this showing is ments were rejected, except the proposition based upon the testimony thus far taken to substitute the bill proposed by the

• The paper starts out with a statement of the number of men employed in the cited that the amount appropriated by the board of estimate in the budget of 1894 is \$5,139,147. This amount is en-

"The testimony brought out by the Lexow investigating committee shows that the police, in addition to their salaries from the city, have had an addihouses, merchants and pushcart ped-The police probably call it perquisites."

Astounding Figures. The fact is cited that there are 7000 saloons in the city of New York, and the paper reckons that the police charges for protection for side doors, open on Sunday, is \$10 a week for each saloon. Allowing that one-half of the saloons paid these charges, the total for one year is estimated at \$1,820,000. The paper quotes in a conversation held with an official of the police department, who estimates the number of degraded women in the city to

Upon the basis of the last census an estimate of five persons to a house is made, and upon this basis it is stated that the 45,000 immoral women in New York are quartered in 9000 disorderly houses. According to the alleged police schedule of prices for opening disorderly

houses, according to the evidence before to develop the closest possible relations the Lexow committee, the keepers of the houses are required to pay from \$50 to \$100 a month, and the paper making these estimates reckons that from this source the police receive annually incomes of \$8,100,000. About \$450,000 a year is estimated the amount of the alleged extra charges for special favors and protection from the police.

Gamblers Chip In,

The estimated income from gambling \$1.50 houses and policy shops is \$165,000 a year.
There are reckoned to the other special rates levied upon merchants for the privilege of putting boxes on their sidewalks, \$1.25 merchants who want to keep open on Sunday and push cart peddlers who want to evade the city ordinance that prohibits them from standing more than five minutes in one place.

The paper which is quoted states that 200 new policemen are placed on the force each year, and estimates upon the basis of the alleged rate of \$300 to get on the force, that the income from this source is

Mr. Kelley opened the debate in the house upon the bill requiring specifications to be furnished to persons employed in worsted and woolen factories. He charges that the great corporations were taking money from their employes by cheating them, in securing more work than they paid for. By investigation he has come to the conclusion that this was going on. He asked the house to pass the bill in the name of the vast numbers of textile workers of Massachusetts.

The manufacturers' side of the matter was espoused by Mr. Alden, who presented a telegram from one of the mill cities, protesting against the passage of labor legislation the present year. The house refused to reject the bill as recommended an article under the head of "Police by the finance committee, and substituted a bill proposed by Mr. Kelley.

Professor Zelickovitz, in recent issues of his paper, strongly hinted that the books of the institution were not reliable, and that all expenditures were not satisfactorily accounted for.

The professor, although he has only been in this country six months, has many friends among his countrymen. He was the interpreter for the party that undertook to rescue General Gordon at Khartoum, and served in the same capacity for Henry M. Stanley in Africa. He was challenged by the accused officers to appear at the meeting and prove

his charges. He appeared, as did several hundred of his sympathizers. Their opponents were about equal in numbers. President Slupsky of the home was the first speaker. He made remarks uncomplimentary to the editor. Immediately there was an uproar, and harmony was a missing factor the remainder of the evening. The president was obliged to give up the floor, and Secretary Barofsky undertook to speak. He charged Pro-fessor Zeleckovitz with bringing a crowd

An Exciting Struggle. When the noise subsided, the chairman ordered the officers to clear the hall of all disorderly persons. The professor mounted the platform to defend himself. One section wanted him to speak in Hebrew, the chairman said he would allow only English. The dispute grew exciting, and the crowd made a rush for the platform. The Professor and Secretary Bar-ofsky clinched, and after a struggle were separated. Policemens' clubs and canes were brought into play. Furniture was smashed to kindling wood, and the grand square piano was badly used in the melee. The police sent for re-enforcements, and from issuing bonds, which was set for a most in darkness when the opposing party came to the rescue and interfered.

doubt will draw spectators from all parts of the country, occurs on the 18th, when Joe Choynski and Bob Fitzsimmons will meet at the Boston theater. Fitzsimmons and Choynski are both in training, and reports from their headquarters indicate that both men will be in the finest condition on the 18th. The second mill, and the one which is

by far the most promising for a royal "slugging" bout, is set for the night of June 22, Joe Walcott, the pet and pride of colored Boston, at 135 pounds, and Mike Harris of New York, who can give the best the Bowery affords, being the contestants. Both men are punchers pure and simple, and it is just a question who is the quickest. .

At last it seems settled that George Dixon and young Griffo will meet. Representatives of both boxers met last night and partly arranged. Another meeting will be held and articles will be signed. Griffo can weigh all he wants to. The contest will be at catchweights. This bout will take place at the Casino on July 29. The Kentucky Rosebud was to have boxed Dixon's opponent, but he has thrown up the contract.

The last of the big battles is scheduled for the night of July 2, when Dick O'Brien of Lewiston, Me., and Joe Walcott will battle for the gate receipts, 65 and 35 per cent, at the Casino: O'Brien is picked for On Saturday, June 9th. a winner, but if he beats Walcott he will have no doubt but what he has been in a

A BLIAD STUDENT.

Remarkable Young Man Who is Secur ing an Education at Harvard.

Although completely blind, Everett Chauncy Bumpus of Quincy, Mass., is now a member of the freshman class of Harvard university and intends to take the full four years' course and obtain his degree of A. B. at the close. He is only twenty years old now and has

been totally blind since he was six years old. He was deprived of his sight by spinal meningitis. There is hardly a brighter young man in the freshman class than this member who has to depend almost entirely upon remembering what is read to him and by dictating to others to work his way through the course.

Before he entered Harvard all of the blind student's textbooks were specially prepared for him on the Braille system, instead of the older plan of raised letters. It is much more convenient to read, and it can be read much quicker. The typewriter, too, on which he does most of his writing is made expressly with reference to

He has given up now, however, nearly all the appliances made especially for the blind, except his typewriter. He depends almost entirely upon having his exercises read to him. His course is in Latin, French, English, Italian, Greek and Germar.—what may be termed a literary course, as he is studying it with a view to becoming a journalist, Later on in the course he will give his attention to history, philosophy and political economy.-New York Herald.

Sundays at Lovell's Grove.

Editors of the Daily Ledger: I have looked in vain for comment and condemnation in your valued paper of the actions of picnic parties and others the last two Sundays at Lovell's Grove and the Pine Point House. Sunday before last the grove was hired by a crowd of Jews from Boston, called the Sarlight club. They came down on the good ship Clifford and brought beer, a German band, and plenty of conversation with them.

With utter disregard for the Christian Sabbath they proceeded to enjoy themselves in the manner usually prescribed for Sunday picnics. Bicycle races were run with the usual enthusiasm and boisterousness, the band playing at intervals the entire afternoon.

Dancing was also indulged in for some two hours to the music of the aforesaid

It was, to sum all up, a disgraceful at hand. Many were obliged to go to Boston via the electrics: the Clifford that we sell. Boston via the electrics; the Clifford leaving the wharf before her cargo had gone aboard. These proceeded to make things lively on the Quincy cars until one officer getting suddenly conscientious as they neared the centre of the city, called the offenders down.

The Boston Post of the next morning gave an account of their trip to Boston which would be disgusting to reprint. Last Sunday there was no picnic in the

Now, I am not a crank on Sunday closing, neither am I on the strict obser vance of the blue laws; but I do protest

While I am aware it is not in Quincy, still our officers have as much authority in

Weymouth as here. Picnics are already assured for every Sunday this summer and if no steps are taken we may well expect to have a lively season, which would augment the probability of a license in Weymouth next year. The young men who so early started on the Sunday closing prosecution business have now an opportunity to display their talent and honesty of purpose, and to them Three blows calls Chief to the Central this communication is respectfully dedi-SWEET MARIE.

At Her Loom.

While the water cresses slumber. While the birds are few in number. Spring is busy at her loom. Weaving for the time of bloom; For the 'rees, a bright green awning, For the time of vernal dawning; With a warp of living green, With a weff of flowery sheen, Bright the wreaths to deck her pillow-Hanging from the oak and willow-Soon her robes of living green In their beauty will be seen.
Watch the swiftness of her fingers Weaving, where the sunlight lingers In the mossy meadow nook, By the gently purling brook. Soon we'll see the sweet unveiling Of the pink arbutus trailing; Then the snowdrops will peep up And the yellow buttercup— When the d. s are soft and hazy— Smile beside the nodding daisy, And her shuttle she will ply 'Neath a sunny, azure sky, Till her weft and warp she closes Till her welt and warp sac With the blooming of the roses. —Boston Globa.

> The temperature in the chamber was stiflingly hot, and the senators spoke to empty benches on the floor and a few list less auditors in the galleries. Altogether it was one of the dullest and most wearisome days of the long three months' de-bate. Not a vote was taken. Those who made set speeches were Messrs. DEMOCRATS WILL "COME DOWN'

To Facilitate the Passage of the

Tariff Bill.

Democrats Are Hustling. The Democratic managers are bending every energy to the work of securing vote on the final passage of the tariff bill before the end of this month.

In order to ward off further prolongation of debate they are conceding all that is possible, and it is said, upon apparently good authority, that it has been agreed that the amendments heretofore made by the committee to the administrative fea tures of the bill will be withdrawn, and the provisions of the administrative act of 1890, under which the duties are now collected, permitted to stand. The Republicans were prepared to

make a vigorous fight against the committee amendments. If the committee decides to do as is here indicated, they will shorten the debate very materially. The Republican senators, however, have not given any encouragement to the friends of the tariff bill, who want an arrangement for a vote on the woolen schedule without delay. A number of speeches have been prepared by Republicans on the subject of free wool, and until these have been got ridfof, no progress can be made with the schedule. Other Ridden by J. Dunn, Jr., Quincy Championship, 8 items of the schedule will not cause much

Not a single appropriation bill has been acted upon by the senate, and there is now apparently no chance that any will be passed in time to meet the emergencies of the new fiscal

by resolution before June 30, otherwise there will be no money to meet the ex-penses of any of the branches of the gov-The Probable Concessions

The Republican senators have asked that certain increases be made all alor the line of woolen schedules. The requests have been rejected, in part, but certain concessions will probably be made on some of the paragraphs at least, including those providing for a duty on woolens and children's dress goods, coat linings, Italian cloth, tunting, ready-made clothing and on wool and worsted yarns.

The probabilities are that on women's

and children's goods and other articles included in the same paragraph, the dividing line will be chan ;ed from \$1.60 and made to read so that goods of this class, valued at not over 60 cents, shall pay a duty of 50 per cent ad valorem, instead of 40 as in the present law. In the paragraph relating to ready

made clothing the present bill provides a uniform ad valorem rate of 40 per cent. It is proposed to increase this rate to 50 per cent on these goods where they are valued at more than \$1.50 a pound, leaving the rate at 45 per cent on goods of this class of less value.

A similar change is to be made on voolen and worsted yarns, on which, as the bill stands, an ad valorem duty of 30 per cent is provided. As the paragraph will be changed it will probably increase the duty on goods of this class, valued at more than 40 cents a pound, to 40 per cent ad valorem, leaving those of less value at

80 per cent. These changes have been advocated by a large number of manufacturers, and while the committee has not absolutely decided upon making them, all the inications are that they will be made. Senator Aldrich is pressing very hard for a still greater change, especially on women's and children's dress goods. He is asking that in this schedule the divid-

ing line be made at 40 cents, and that the rate on goods worth less than 40 cents a pound shall be placed at 45 per cent, and above at 50 per cent. Our Red Brethren. The small crowd in the galleries of the house was well repaid for its attendance, for at times the proceedings were very in-teresting. While but 10 pages of the Indian appropriation bill were read, some

very interesting discussions were precipi-tated, notably one by Mr. Smith of Ari-zona, relative to the education of Indians, and especially the Apaches, at the Indian schools of the east. In the course of his speech, he said that it was possible to kidnap Indian boys and girls and send them to school at Carlisle and Hampton, but they would wander back to the reserva tion and become worse than they were be The A. P. A. matter was again brought up and caused a slight ripple on the sur-

HISSES FOR O'ROURKE. Crowd Didn't Like the Manner In Which

Boston, June 14.-Anson put Griffiths in the box, and he proved altogether too clever for the champions. Lovett was in good form, too, and not a hit was made until the fifth inning. Umpire O'Rourke made himself more unpopular than ever, because of his unreasonable roasting on balls and strikes. Herman Long returned to criticise one of his decisions and was promptly fined and given five minutes to leave the field. Ganzel took his place, while O'Rourke was hooted and hissed the rest of the afternoon.

WOMAN IN THE CASE.

William Delaney, a Prominent Buffalo Politician, Is Murdered.

He Had Been Drinking With Female Companions.

BUFFALO, June 15 .- About 6 o'clock last night, Lawyer William Delaney, excity clerk, one of the best known Democratic politicians in Buffalo, was shot and killed in his room in the Ribble building on Main street.

The rooms in the Ribble building are reached by a hallway, that is used also for the rooms over the Gold Dollar saloon. At about six o'clock one of the bartenders of the Gold Dollar was coming down the stairs from his room on the top floor, when he was met at the landing of the second floor by a man, who asked tributor to various periodicals, and his articles were always of a peculiar merit. He was twice married, the last time bewoman was with the man. She said to the man: "Well, if they are not there, we'll go."

The bartender went on down stairs, and the man climbed up to Delaney's room, which was on the top floor of the Ribble building. Another bartender started up stairs to his room. He heard a shot on the top floor. He quickened his pace, and a few steps from the top of the last flight of stairs met a man rushing down holding a revolver in his hand and trying to put a cartridge into it. "Don't you stop me, or I'll shoot you," yelled the

man with the revolver.

The bartender struck the man's arm and knocked both pistol and cartridge to the floor. The fugitive picked up the re volver and ran on down stairs and disap peared. The woman was not seen by the

second bartender.

The Murderer Surrenders. At 10:30 o'clock last night, George A. Bartholomy, a tallyman at the Ontario elevator, walked into police station No l and told Captain Taylor that he was the man who killed Delaney, and that he wanted to give himself up. He said that Delaney had been intimate with his wife, and that he had gone to his rooms with the express intention of killing him. He refused to say anything more until he

had consulted with a lawyer. The police will not say whether Mrs. Bartholomy was in Delaney's room at the time he was shot. They refuse also to give the name of the woman who was with Bartholomy. Bartholomy was locked up.

Editorial Comment.

THE IDEA of securing a diversity of usiness for Quincy is a new one, but Mayor Hodges is fortunate in having a City council who have picked it up. Mayor Porter in his opening inaugural said "Our great industry is that of granite cutting and working. It is the backbone of our prosperity and to its success we owe in a great measure our steady progress." But he made due recommendation. Three years later, in his inaugural of 1892, Mayor Fairbanks advanced the idea. He said :

"The rapid increase of our population dmonishes us that we should be on the alert to welcome to our midst legitimate and desirable enterprises, so that home employment may be found.

appoint a committee who would be in readiness to meet all inquiring manufacurers, furnish them with city statistics, oformation as to land, and the prospect of sistance from our financial men.

"Such a committee would also represent he city in the efforts to obtain better railroad facilities and more suitable depots."

The City Council of that year did not act on the suggestion. Mayor Hodges has again revived it, and President Bass has appointed a special committee of the Council to consider that part of the inaugural, "Our city is unfortunate in the fact that

t depends almost wholly upon one industry. The granite business is our main stay, and whatever affects that, affects all our gymnasium and interests. Owing to the troubles of 1892 including these. and the depression of 1893, very little work s being done and the consequence is that all our tradesmen feel the effects. EVEN IN this Congressional district the Republicans scent victory the coming fall, and thus early we find in the field a arge array of candidates. Among these are ex-Councilman Shaw and ex-Representative Graham of this city; Jediah P. Jordan of Ward 20, Boston; ex-Representative Bond of South Boston; ex-Representative Frederick W. Bliss of Dorchester; H. H. Atwood, the defeated andidate of last year; Michael J. Murray and A. E. Pillsbury. The last mentioned has recently moved into the district, and has the advantage of being well and favorably known. Of course Quincy's first choice would be Messrs. Shaw or Graham, one of its own citizens. Mr. Jordan formerly resided at Wollaston and many recognize in him an energetic Republican. Mr. Atwood's candidacy is not looked upon with much favor, but any of the others would be acceptable to the party.

RED LETTER DAY,

The Y. M. C. A. After New Members and Subscriptions

The Young Men's Christian association of Quincy haev set apart Saturday as a special "Association day" for the accomplishment of a three-fold purpose as an an nouncement states: "To increase the interest of the public in this great work for young men. 2d-To add to the membership of this world-wide organization. 3d -By means of generous contributions to place the Association on a strong and substantial basis."

The plan of campaign is, in brief, as follows: The members and friends of the Association will, so far as possible, make a personal canvass, both for memberships and money. They will be provided with envelopes to be given to whoever will take them, and the suggestion will be made that a day's pay be given to the Association.

Sunday, the 17th, there will be special services in many of the churches, addressed by prominent Association men.

As an extra stimulus, Mr. Henry H. Faxon, who has already done such practical good for the young men by driving out the of June. saloons, has made the following offer to the Association: He will contribute \$250 if the ladies of the city will assist in securing evening. fifty new \$5.00 memberships. The payment of \$5.00 for a membership, therefore, will really amount to \$10.00 to the Association, or \$500.00 in all if the conditions are met. Any young man of good moral character, regardless of class, creed, or color can become a member.

The privileges of membership include the use of the reading room, parlor, with piano and library, (all of which are open "I would therefore recommend that you every day of the year); game room; gymnasium, with services of an instructor; bathroom, including shower, tub and sponge baths, with hot and cold water; Young Men's Congress; receptions; entertainments; talks; men's meeting and Bible classes for those who care for them.

In addition the directors have voted to start evening educational classes in October, provided a sufficient number will make application. These classes will include clay modeling, monumental drawing, comprising both mechanical and free hand; also classes in English for foreign speaking young men.

The fees are \$2.00 per year without gymnasium and baths, and \$5.00 per year

JED'S INVENTION.

It Poes Good Work and Receives Favorable Consideration

The invention of Mr. J. F. Gleason, superintendent of construction of the Quincy Water department is attracting favorable attention at the convention of the New England Water Works Association, being held this week, at the United States hotel, Boston, where it is on exhi-

Mr. Gleason's invention is known as the star pipe jointer, and is an anti-c'ay pipe sealing device for running lead joints. It consists of a brass band to which is fa tened a li en packing. When a joint is to be made the jointer is placed about the pipe close to the flange and secur. ly fastened by a crank, the molten lead is then poured through a gate in the jointer for that pur-

The common way of running these joints has been to place a coil of rope and clay about the pipe. This has, however, often prove unsatisfactory to good work, especially in cold weather and when it was necessary to lay the pipe in water as it consumed much valuable time. Certainly the poor princess had strug-

gled conscientiously to resist the ardent supplications of Alexis Petrovitch. But he was 25, and she was only 20. The grave caresses of her husband suggested to the princess what the infinite joys of young love might be, with at a dollar each as souvenirs. They are Lost Manhood and vigor quickly restored. Varicocele, hences Naver yet led show a restored variety of the restored variety o

es? And what promises she read in the eyes of Alexis!

The princess did not stop to analyze either her preferences or her aversions. She loved Alexis; that was enough. Love at 20 has a spark of divinity in it. It does not even care to understand it-

One day Alexis swore to the princess that he would only put his lips to the hem of her gown, but carried on by the torrent of his youthful love he kissed her passionately. She fled to her favorite blue salon, which she never allowed And they hied to the artist and found that any one to enter. There she permitted the count to join her.

After that they sat there whenever they were alone together. So it was that, seated on a divan opposite the long window, the princess saw kneeling before her him who was

not yet her lover, but to whom she felt already that she entirely belonged. "Ah, my life, how I love you!" he

was saying.

His arms were about her. Drawing her closer to him, he sought her lips. She was uneasy and made as if she would release herself, when, suddenly conquered by the convulsion which rent her heart, she closed her eyes, and her lips met his.

Yann Barsouck watched. Before those wo young creatures rapt in an ecstasy of love he smiled. This love, what was it? A pit into

which man led woman, and she ran to it blindly, careless of her fate. Yann understood this love. No one could imitate as he could the moaning love lamentations of the otter to his mate. How many had he shot, to save

them from their "doom," as he expressed it. Meanwhile, his eyes fixed on the count, Yann silently leveled his carbine. Inflamed by the long, voluptuous embrace and moved by the strength of his passion, Alexis arose. Little by little he pressed closer against him the slight form lying so unresistingly in his arms. With his impatient fingers he tore aside

the silk folds of her gown. But the princess stood erect. The adorable modesty of her gesture, the look of amazement in her eyes, accompanied by so much love, so much fear, reminded Alexis of his promise. Fall-

The Kuffmanns lived in a two-story frame house on the outskirts of the town. They moved from Trenton three weeks ago. The family consisted of the father and mother, a baby girl about 1 month old, and boy twins, aged 5. Kuffmann was out of work most of the time, only outting in a few days at the Kensington ugar refinery. He was very poor, and his failure to secure a permanent position and consequent suffering from the actual ne essities of life probably caused insanity. He was about 50 years of age. They then went into the next room. Lying on her face was found the body of Mrs. Kuffmann with her head nearly severed from her body. Blood was on the walls and furniture, showing that the woman had made a brave fight for life. With ashen faces, the men next went up stairs to where the three children were known to have slept. The first object that met their gaze was the body of the baby. Its head hung to its body almost by a shred.

In the next room, on the bed, was found the bodies of the twins, 5 years of age. They also had their throats cut. No papers were found in the house that might give an insight into the motive for

Important Pension Decision. WASHINGTON, June 15 .- The pension able status of deserters is announced in a decision which will result in the drop-ping of a large number of names from the colls as illegal. The decision is that where a claimant for pension has deserted from his first service and enlisted in another organization, and the war department refuses to remove the charge of de-sertion or recognize the legality of the econd service, but holds him to be in a continious state of desertion, the claimant has no pensionable status.

New South Wales suggests that the colonies of Victoria and New South Wales first unite, and that afterward the colonies of South Australia and Queensand enter into the union. Mr. Dibbs considers that the colonies of Victoria and New South Wales are prepared to unite (according to the Canadian precedent), which, in his opinion, will enable the Australians eventually to become a really united people.

Promises to Be Fought to the Bitter End by Both Sides.

EAST WEYMOUTH, Mass., June 15.-Indignation is pictured in the countenances of the shoemakers here over the employment of Italians in the factory of M. C. Dizer & Co. They are indignant because they think that preference in employment should be given to taxpayers and citizens of Weymouth.

The indignation promises to take pub-lic expression at a meeting to be held in the Opera house next week.

There are only 100 shoe lasters directly interested in the lockout, as it is called, of the union workmen, but fully 2000 shoemakers in the town are hoping that the 36 union lasters who have been em ployed by the Dizers may triumph finally. The employment of 17 Italians to oper ate machines which were heretofore oper-ated by representatives of organized labor is the cause of all the difficulty.

Only six of the 36 union men have been asked to return. They have not done so, and persistently refuse, unless their asso ciates go back with them.

The situation from present indications looks like a fight to a finish. The Lasters Protective union is considered the most powerful labor organization in New England. It has the membership and a finan cial backing, which means, according to the claims of the leaders, persistence in a contest for organized labor. Bristol's Blaze.

PROVIDENCE, June 15 .- Fire broke out ng caught from a spark from a hoisting engine. The fire spread to the Providence roller shade works, the mills of the Richmond Manufacturing company, Wardwell's planing mill, Nathan M. Cole's lumber yardand a large tenement house. The damage amounted to \$35,000. Captain Andrews of the King Philip fire company was standing by one of the burning buildings when the wall blew out, and he was buried in the ruins and fatally injured.

Lucky His Aim Was Poor. DOVER, N. H., June 15 .- John McCabe, while drunk, fived several shots from a revolver at people near him. He killed a dog, and one shot went through the hat of a man who was passing. It is said that McCabe was firing at Ann McGlone against whom he had a grudge. He will be arraigned under a charge of assault with intent to kill Ann McGlone.

Seven more are to be came to the side of the 11 others upon the agreement that mercy should be recommended for Mr. Wiman. The jury was

At precisely 4:30 o'clock, after being out one hour and 55 minutes, the jury re-entered the courtroom. Foreman George Murray was at their head. Mr. Wiman, who had been conversing with friends, instantly wheeled about in his chair, and gazed anxiously at each jnror. His face, naturally very florid, assumed a deeper hue, and intense emotion was depicted thereon. The jury answered to their names, after which the clerk asked: "Gentlemen have you agreed upon a

A partial canvas of the house shows they will vote against the proposed duty on sugar, even though such action would defeat the bill. The men who talk in this strain are radical tariff reformers. Many of them are from the west, and they claim they will be sustained at home in such action.

There are many southern representatives who talk in the same strain. They point to the fact that they have been de eated on two vitally important questions -free silver and the repeal of the state bank tax-by the northern representatives, and they are not in a frame of mind to aid their northern allies to pass any neasure that will make the rich richer and the poor poorer.

Richardson Denies Charges.

The dullness of yesterday's proceedings in the house was in marked contrast to the excitement of Thursday's session. An event somewhat out of the ordinary was a personal explanation by Mr. Richardson, in reply to allegations made in a Washington newspaper that he had been using his position as a member of the committee on the District of Columbia to further the interest of an overhead trolley syndicate, to whom he (Richardson) had sold real estate indirectly. NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Crepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventory and A

tions, design patents, trade marks, labels, copyrights, interferences, infringements, validity reports, and gives especial attention to rejected cases. It is also prepared to enter into competition with any firm in securing foreign patents. Write for instructions and advice. JOHN WEDDERBURN,

A SHORTAGE OF FUEL

Likely to Compel a Further Suspension of Manufacturing.

GENERAL BUSINESS IS NARROW.

Woolen Mills Are Finding but Little to Do.

New York, June 16.-R. G. Dun & Co.'s Weekly Review of Trade says: The strike of coal miners will end Monday wherever the authority and advice of their general organization can end it, and there is little room to doubt that the coal famine will then begin to abate. Some ime must elapse before supplies of fuel will enable all works to resume that have no other reason for suspending produc-

Meanwhile, the demand for products is so slack that it seems questionable whether so many hands will find employment before the end of June as were em ployed in April.

The actual output of pigiron weekly since June 1, was only 62,517 tons, against 126,732 April 1, and 174,029 a year ago, but the reduction of 248,552 tons in insold stocks indicates that a quantity nearly double the output has been taken for consumption.

A sale of 25.000,000 pounds of lake copper at 9 cents seems to mark a new policy on the part of the producers, and tin is weaker, with heavy receipts. Woolen and Cotton,

The woolen mills are closing rapidly. It is asserted that scarcely any have orders to occupy them beyond July 1 in men's wear, but in the demand for dress goods a somewhat better tone is per-

Sales of wool in two weeks have been 5,626,583 pounds, against 3,627,176 last ear, and 11,520,100 in 1892. The New York and Philadelphia markets are dull, and at Boston a slight decline is seen in prices, with a large sale of territory wool at 30 cents scoured. Western holders appear to be expecting higher prices than can at present be realized in eastern mar

Further concessions have not enlarged the demand for cotton goods, and the recent report that production has been close to last year's is said to be based upon returns from only the more fortunate mills. That goods are accumulating is evident, out sales have been distinctly improved with the weather.

Wheat and Cotton Crops. Wheat is only a fraction higher, the exports and ordinary consumption for the year having already exceeded the government estimate of last year's crop by 124,000,000 bushels. Western receipts for the week have been 1,474,404 bushels, against 2,101,974 last year, and Atlantic exports only 908,996 bushels, against 3,223,087 last

year.

Cotton has yielded a fraction, and the report of acreage by The Financial Chronicle indicates an increase of 2.06 per cent, with prospects decidedly more avorable than a year ago.

While business is narrow, it is compara tively free from loss by failure, for the li-abilities reported in failures for the first week of June were only \$2,507,228, of which \$476,118 were of manufacturing and \$1,872,261 of trading concerns. The aggregate liabilities thus far reported in failures in May were but \$13,514,760, of which \$5,146,025 were of manufacturing and \$6,912,302 of trading concerns. The number of failures this week has een 232 in the United States, ag last year, and 40 in Canada, against 34

Croker Intends to Sojourn In Europe For an Indefinite Period,

QUEENSTOWN, June 16. - Richard Croker, with his two sons, arrived here last evening on board the steamer Umbria. Mr. Croker said that he had come to Europe for his health.

Asked in reference to the investigation of the New York city police department by a committee of the state senate. Croker said that he had not been summoned to appear before the committee but he would be glad to give the cor mittee any assistance in his power, should they desire it. He said that he was out of politics now and did not purpose to take any part again in the administra-tion of the Tammany Hall organization. FITZ HAD THE BETTER OF IT. His Opponent the Possessor

Boston, June 19 .- Beneath the glare of 10,000 lights at the Boston theater last night, Bob Fitzsimmons, champion middleweight of the world, and challenger of Jim Corbett, turned an almost certain defeat into a glorious victory. Had not the police interfered it was 10 to 1 that he would have finished Joe Choynski in another punch. As it was the match was declared a draw, but no one present will ever claim that Choynski is a foeman worthy to combat with the lanky Aus-

of Great Courage.

No less than 3000 cheering, howling men enjoyed the battle, the like of which has never been seen in cultured Boston

Choynski was the first to appear, and in his wake came a retinue of handlers and seconds. The Californian was attired in a red breech clout and looked fit to battle for his life. His general bearing was one of a college athlete rather than a prize fighter.

Fitzsimmons followed shortly after. The Australian was also in fine fettle, but he looked a trifle heavier than his opponent. After a formal introduction to the audience by Referee Daly, Timekeeper Murphy sounded the gong for the first

The Battle.

Round 1-Both men sprang nimbly to the center, and circling one another seemed bent on allowing his opponent to be the first to lead. Fitzsimmons did this, missing a left-hand swing and going over Choynski's back when the latter ducked out of reach. The Australian again led, landing his left lightly on Choynski's chin and receiving an tap on the stomach in return. Honors were even when the round closed.

Round 2-Fitz had evidently sized his man, for no sooner had he reached the center than he tapped him twice in the HEALTH! Now universally face with his left. This seemed to waken the Californian, for, with a smile, he let go his right and left, the latter landing dicinal properties. The benefit the medical knowledge of ten centuwith good effect on Fitzsimmons' body. Twice did Fitz miss left-hand swings, but toward the finish he got Choynski in a ries and more, in every country under corner, and in an upper cut grazed Joe's jaw. A clinch followed, and the pair walked to the center only to be sent to their corners by the gong.

Honors Even. Round 3-Fitzsimmons was first to reach the center of the ring, and as hovnski neared him he measured the distance. He feinted and Fitzsimmor of disease. It is all medicine, and to his feet. Fitzsimmons was dazed. Joe was after him red hot and time and again iseases of the Blood, Stomach, Liver, did he land his left and right. He always landed on the red-head's topknot, however, as Bob never missed an opportunity to clinch Joe's neck. Daly broke them apart time and again. Choynski was rapidly tiring himself out by his efforts, while the man from Australia was just as rapidly recovering his bearing. The round came to a close with both men just staggering around, each trying hard to get in a final blow, which seemed about all that was needed to

inish either one. Round 4-Here was where Fitz's wonlerful recuperative power asserted itself. hoynski was leg weary and slow in Choynski was leg weary and slow in answering the summons, while Fitz looked and acted as fresh as when the contest began. Senate Makes Substantial Progress on the Tariff Bill.

Administrative Sections Not Likely to Cause Delay.

WASHINGTON, June 20.-The Republicans achieved practically their first open victory in the consideration of the tariff bill, when, by a vote of 23 to 20, just before adjournment last evening, quick-silver was stricken from the free list and placed on the dutiable list at 7 cents a

pound. Mr. White (Dem., Cal.) was instrumental in securing the aid and vote of Mr. Hill (N. Y.) for this pro position, and Mr. Stewart (Nev.) rallied the Populists' support so that the motion was carried. Mr. Hill went so far as to pair Mr. Irby (S. C., Dem.), who was not in the chamber,

The progress with the free list yesterday was very rapid, 245 paragraphs (about 24 pages of the bill) being disposed of. Nothing of especial moment occurred in the debate, the opposition to the items on the free list (except as regards quick-sil-\$2.00 ver), being of a formal character, most of them having been touched upon during the consideration of the dutiable list.

Before the consideration of the free list

in favor of the proposition.

began, Senator Jones, on behalf of the Democratic side, accepted several amendments suggested by the Republican senators, chief among which was one striking out the reciprocity provision in paragraph 190, admitting buckwheat, corn, wheat, flour, etc., free of duty from countries which impose no import duty on like products from the United States.

Another amendment, placing eggs on the dutiable list at 3 cents a dozen, was \$2.00 accepted. The reciprocity provision was warmly defended by the Democrats when it was before the senate, but the amendment striking it out was agreed to without a word of explanation.

Paragraph 608, salt, had been reached

when the senate adjourned. Nine pages of the free list are yet to be disposed of before the administrative features of the bill are reached. Concerning the Final Vote.

The Democratic managers are prophesy-

ng that the bill will go through the enate and reach the house within 10 days. Such rapid progress as this is hardly expected, however, and if they see the bill safely before the house one week from Saturday the senatorial gnardians of the measure will be fully satisfied.

The free list covers 32 pages of the bill. Most of the articles embraced in this list are free under the existing law, and a considerable number of them have been transferred to the dutiable list. When the wool paragraph is reached, the discussion on that commodity may again break out, but in view of the time already spent upon the question, the managers of the bill are hopeful that the paragraph will be disposed of without protracted debate.

May Be Signed Aug. 1. Members of the house who are more especially interested in the result of the tariff issue say that if the bill reaches that body in 10 days, they expect to see it signed by the president before Aug. 1. That would allow considerable time for delay in conference, and in the final adoption of the conference compromises in both houses.

The administrative sections follow the free list and cover 47 pages of the bill. Comparatively little new matter is included in this portion of the bill, and while there will be considerable contention over the new features introduced, it is probable that the entire 48 sections will be disposed of without much delay, thus bringing the senate to the income sec-PENOBSCOT SALMON tions, upon which the debate will be general and protracted. It is intimated by the managers that if the administrative portion is likely to lead to much delay, they will allow these sections to be has been reached in this matter.

Regarding the amount of time which will be required by the conference, opinions differ widely. It is placed all the way from 10 days to three weeks, with the impression that it is more likely to be the latter. There seems to be a great desire to get the bill out of the way as soon as

Councilman Moxon asked what guaran-

if annexed to church. Councilman Holden contended it was not to be annexed to church. It was part of the old "training field." John Q. A. Field then opposed the

scheme. The church had held no meeting to consider project and no one was authorized to appear for church. He critised the petition.

Councilman Holden said Mr. Anderson had appeared for church in favor.

Mr. Field did not know that Mr. Ander on was the church. Two or three years ago an article in warrant had been voted down by church. He opposed closing the highway. Believed church had no title to land on north. Had opposed location of fountain. Was a bad position. To close driveway would increase danger of dodging teams at fountain. Was opposed to a resting place about the fountain. The better way would be throw green into street and make Washington street at this point as wide as possible. Traffic demanded it.

Henry H. Faxon opposed closing the driveway. It was a handy short cut to depot for Quincy Point and Hought Neck. Did not consider the fountain a nuisance but a blessing. Then, the title of the property was mixed. The church did not take care of the property it had, and couldn't get a vote in favor of contemplated

Ex-Councilman Fallon thought the location of the fountain was a mistake. Was glad to hear it was public property, as two or three years ago when he wanted to locate public scales there he was told it was church property. A wide street was needed here, and green spot should be thrown into street.

Mr. King thought people would not trespass if green was well kept as a few years ago. Mr. Joseph T. French was about the only man to be inconvenienced.

Mr. Field opposed limiting the rights of people. Things had changed since location of fountain and street railway here. E. H. Dewson wanted to effect compromise between the people, the city and the church and secure an improvement.

It had been pending 35 to 40 years. He had noticed the general encroachment of the public on the property. Thought title was not clear, and that Mr. Marsh had not satisfied many. Had no doubt church would care for the land annexed. Councilman Moxon still questioned if

city could close driveway for any such

Councilman Anderson explained the situation as he viewed it.

H. M. Federhen was opposed to plan. Encroachment, so called, showed that there was a demand for wider street. When there was no car on Washington street he often drove to depot by Saville street, but generally used the cut off as nine out of ten did. The petition as he understood it, was for the public good, not Mrs. F. B. Foy of Everett is the guest of pairs on Adams street. To Committee on a compromise. He would leave square

Conflagration Narrowly Averted This Morning.

GOOD WORK BY DEPARTMENT.

An Unused Barn Destroyed but Adjoining Buildings Saved.

The first fire of any importance for some time took place early this morning and in one of the worst places for a fire to get a good start in the city. It was shortly after 3 o'clock when Pat-

rick Simes, who was engaged in cleaning out a cesspool in the rear of Keating's lumber yard, discovered that the barn owned by the heirs of Ebenezer Bent and All Color and Sizes, until recently occupied by A. F. Hall, was on fire. He rushed to Box 25 at the corner of

Newcomb street and gave the alarm, but ne was excited and unaccustomed to giving alarms of fire, and the result was that he used so much strength that he broke the mechanism of the box. The result of this was that but one round was sounded and one blow on the second round.

The central station apparatus was not bothered any and they responded.

They found that the barn was a seething mass of flames and owing to its close proximity to the store in front, the buildings and lumber of Mr. Keating in the rear, and the high wind that was blowing the flames in the direction of the lumber yard that a conflagration was probable.

The department however got to work and by hard work succeeded in extinguishing the flames, but not before the barn had been gutted and the end of one of Mr. Keating's buildings burned.

Several of the buildings in the vicinity ook fire, but were extinguished before they had made any headway, by the willing work of outsiders who rendered good ser-

Officer McKay was early at the fire and did good work in looking after books and papers of Mr. Keating. The cause of the fire is not known, but

t looks very much like an incendiary. The loss on the barn is in the vicinity of 800 and Mr. Keating's loss about \$100. Had the fire been a few days later, Mr Keating's buildings would have been filled with shingles and his loss would have been greater.

DR. H. P. MERRILL, the wonderful specialist of Augusta, Maine, after giving it a thorough trial in his practice, writes the following convincing letter of praise:

GENTLEMEN:-I have of late been using some of your medicine in my practice with the most pleasing and satisfactory results. I find that it acts like a charm upon the whole nervous system, and in scrofula and all cutaneous diseases. Its curative properties are fully equal to the claims made for it, and I do not know of one instance where it has not fulfilled all its claims. In cases of General Debility and Nervous Prostration it has proved itself invaluable. It also gives quick relief in Dyspepsia and Canker of the stomach, and is a remarkable fine restorative remedy. It is a great pleasure to be able to recommend such a remedy, as the esults following its use are so wonderfully satisfactory. One great thing in its favor is its freedom from superfluous

WEATHER AND CROPS

Apparent In New Hampshire.

WARM WEATHER HELPED CORN.

Mostly warm and pleasant weather has prevailed in Maine during the week just passed, and most crops have felt the influence of the high temperature and sunshine. Corn and potatoes especially are pushing ahead fast.

In Aroostook county the moderately late planted potatoes are doing the best. On some fields, where it was thought much seed had rotted, later developments show that most of it is coming, though rather unevenly. The potato bugs are re-ported thicker than ever known before and in almost countless numbers. Squash bugs are doing quite a good deal of damage. Fruit prospects continue fine. The strawberry crop pi ises very large in Aroostook county. New Hampshire.

Corn is growing very fast in New Hampshire and potatoes are showing well; bugs are very plenty in northern sections. Wild or field strawberries are very scarce in southern counties. The hot weather has taken the moisture from the soil very fast, and rain is needed on dry soils. Grass is feeling the want of rain very much and is maturing fast on light land. The hay crop at present promises rather poorly in this state. In Coos county the crop is not up to the average; in Grafton county it is looking light and promises to fall short one third; in Sullivan county it is reported light, and the damage by frost becomes more and more apparent as the season advances; in Cheshire county the timothy grass heads out very low and but little clover seems to be blossoming, the crop promises very small on light land in Rockingham county it is maturing very fast, and cut worms and dry weather

least one-third. In northern Vermont, in Orleans county, it is feared that the hay crop will be light unless very favorable weather obtains; but farther south in Orange county the correspondents report that the grass is doing as well as one could wish. They say it is uneven; there are a good many fields of light grass with sorrel, etc., but on new, well stocked land, well established, the crop will doubtless be heavy. The weather has been favorable to most crops, and all are growing fast now. Corn is reported very poor in places, because so much seed rotted, but in others, though backward, it is showing good color and growing well

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and olitical change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing de-ficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiv-ing the remedy to overcome existing dis-ceptancia. The great care cannot be evercrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel and especially is this advice amplicounsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their siness to this class of attorneys do so at mminent risk, as the breadth and strength of the patent is never considered in view of a

quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. Wednesday was very cold along the coast in Massachusetts, and on Thursday morning the thermometer dropped to 3: degrees in Plymouth county, and ice was ormed in some few places. Strawberries and other tender crops were slightly injured. We have no report of damage to the cranberries. The weather and sun-shine of the last part of the week have pushed the crops along wonderfully, so fast that potatoes, grain, etc., was rilting and being somewhat injured or of disease. Clover Bitters is com-pounded by the formula-of an experiof the season. The report of grass is a little better in this state than in New Hampshire, although here old fields have he endorsements of many eminent objections. It is all medicine, and suffered. In Bristol county the hay prospect is about the same as last year; in Plymouth county the grass is thickening up at the Lottom; in southern Worcester liseases of the Blood, Stomach, Liver, up at the Lottom; in southern Worcester county some having has been done, but there is a slim and light crop. Connecticut and Rhode Island A thunder shower on the evening of the 12th was accompanied by hail in Fairfield county, Coun., doing considerable field Hill reports that the hail came in streaks. At his station no hail fell, but both east and west gardens were destroyed, field crops badly cut up, rye broken down, fruit trees stripped and

strawberries ruined. The week has been very favorable for growth in this state as well as in Rhode Island, although rain is needed in generally reported a fair crop of straw-berries and cherries. It is stated that the former are coming in all at once, and that the last picking will be small. Haying has begun in some of the southern counties. An average crop is assured in mos sections and in some places larger than last year. It is filling up fast and im-

proving on heavy soils. To summarize: The weather has been generally favorable for all growing crops during the week just passed. Cool the first two days, with light frosts in southern sections, and unusually hot and dry all the last part of the week, except local thunder showers.

Late planted potatoes are doing best in the north, and early ones in the south. The lack of rain is being felt most especially by grass on all light soils. Haying has begun in the extreme south. It is suggested that all correspondents make a full report next week of the conditions and prospects of the hay crop.

Mr. Allison intimated that the wish of New York and Boston stores, and the secretary of the treasury was to place the new tariff bill in force under the operation of the present administrative law, and if defects were found to correct them later on.

The contest over the income tax, which promises to be extremely interesting, if not sensational, will now begin. It is the general expectation that it will occupy at

The opponents of the pending bill on | name. the Democratic side of the house are criticising many of the provisions of the senate bill, and comparing it with the Wilson bill. The latter measure, they say, would have given the country free coal, free wool, free lumber, free ore, and free sugar, besides saving the consumers many millions of taxation on manufac-tured products. It would have been a tariff imposed without discrimination and entirely free from the influence of

Most of its important schedules have been doctored, and in its present form it is the result of a secret agreement between opposing political senators and trust expert advisers, with more or less scandal. This kind of talk is frequently heard on the Democratic side of the house, and unless there is a decided change of sentiment among them, the senate tariff bill will have a hard road to travel before it \$2.00 is finally disposed of.

There has been so much complaint on the part of certain manufacturers of \$2.00 woolen and carpets that the Democratic managers have indicated a willingness to make some further modifications. They have requested the parties interested in articles complained of to submit the changes and modifications desired on their part. This they have done and have laid it before the Democratic managers,

THE REMONSTRANCE to the proposed changes in Fountain Square were not as strong as anticipated, but is sure to develop at the adjourned hearing. The closing remarks of Mr. Dewson opened the eyes of people more than anything. We would not oppose an improvement, but convenience is to be considered quite as much as beauty. It is impolitic to decrease the size of the outlet of Washington the season. street. The street will not be widened any between the fountain and the street railway building, but it is proposed to close the driveway and increase the travel at this congested point, where cars and teams are

invariably standing. The city should let the existing church lines remain where they are, leaving all changes to be made by the church. The green, which is now an eyesore, is public property and should be thrown into the street and become a good roadway. Then turn attention to improvements on the south side of the fountain. Construct a large platform to include the tree. Raise it some inches above the street level and curb it witheldgestone. Asphalt some of it, and if possible have a few square feet of grass in the south corners. HE DIDN'T BUY A SENATE SEAT.

Invites the Governor to Make Specific Charges.

CHARLESTON, June 21.-The peace which has characterized the senatorial campaign in South Carolina was abruptly dispelled yesterday. A bitter speech was made by United States Senator Butler which created the greatest excitement.

The cause of the eruption dates back to a meeting at Rock Hill, where Mr. Butler's supporters were in a large majority, as lively as in years past they will be and the Tillman forces charged that the lively enough to satisfy the average cottage | Butler contingent was composed of aliens, carried there by the superintendent of the Richmond and Danville railroad.

Yesterday the campaign meeting was held at Chester, and Senator Butler made Cambridge; J. J. Wyeth, Sharon; Henry L. Governor Tillman's statement the text of Cobb, Arlington; William Bullard, Savin his speech. He was excited and aggressive, and made a deep impression by the manner in which he resented Governor Tillman's insinuations. He indignantly repudiated the suggestion that he had a corruption fund from Wall street or else where, with which to buy his seat in the senate, and, turning toward Governor Tillman he said: "I say in reply that if Governor Tillman or any one else makes that charge against me, he is an in-Stupefied the Crowd.

The crowd was dumbfounded. It looked at Senator Butler and Senator Butler looked at Governor Tillman, and every-

thing was as quiet as the calmest sea, when all of a sudden there was an outburst of applause, with mingled cheers for Butler and Tillman. Senator Butler continued: "When he

has charges to make against me, let him make them like a man of courage and truth; let him specify and not indulge in the innuendo of a blackguard and bully. The man has never lived and never will live who imputes dishonesty to me. [Cheers for Butler and Tillman.]
"Mr. Tillman may go to the senate,

but he shall not go there slandering me. Let him go there on his own merits and not by villifying, lampooning and misrepresenting better men than he is.' Senator Butler criticised Governor Tillman's administration in plain terms. There is general thankfulness that there was no disturbance at the meeting today, and efforts will be made by conservative

SCATTERED ROSES.

A little maiden strayed one day Where roses bloomed along the hedges, Where dancing daisies decked the way,

She heaped her little wooden cart
With the bright blooms to overflowing,
Then turned to go, her little heart Unconscious where her feet were going.

A hillside lay along before.

With every step the child ascended,
She spilled her roses more and more
Till all were gone, and day was ended. And when the maiden came not back

The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing de-ficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiv-ing the remedy to overcome existing dis-crepancies. Too great care cannot be exercrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength mminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obduck endeavor to get an anowance and obtain the fee then due. Heavy Penalty For Wiman. NEW YORK, June 21.—Erastus Wiman appeared before Justice Ingraham, yesterday, to receive his sentence for forgery. The ex-millionaire beed rather wan, and was poorly dressed. General Tracy pleaded eloquently for mercy for the aged prisoner. The justice said he should impose a sentence conformable with the evidence, saying: "Your previous good character and great works entitle you to consideration, but I shall not feel justi-fied in making the sentence less than five years and six months in state prison. General Tracy asked for permission to apply for a certificate of reasonable doubt. This was granted. The sentence with the commutation off will amount to three years, 11 months and 15 days.

Death of Ex-Senator Perkins. WASHINGTON, June 21. — Ex-Senator Bishop W. Perkins of Kansas died here suddenly yesterday afternoon of cholera morbus, contracted in Indian Territory a few days ago. He leaves a wife, two daughters and a son, all of whom were present at the deathbed. Mr. Perkins was born in Rochester, O., in 1841. He was elected to the Forty-ninth congress as congressman-at-large, and was also a member of the Fiftieth and Fifty-first congresses. In January, 1892, he was appointed to the United States senate to succeed Preston B. Plumb, deceased.

FOR INVENTIONS. Equal with the interest of those having claims against the government is

that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney. With the view of protecting inventors from worthless or careless attorneys and of seeing that inventions are well protected by valid patents, we have re-

tained counsel expert in patent practice, and therefore are prepared to Obtain Patents in the United States and all Foreign Countries, Conduct Interferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to

BAY STATE LEGISLATURE.

The Meigs Bill-The Boynton Bicycle Railway and the Subway Act, Boston, June 22.-The senate spent the intire afternoon upon the Meigs bill and

adjourned without taking action. The senate reconsidered the rejection of the bill requiring specifications to be furnished in cotton, worsted and woolen fac-tories; amended it so that it shall apply

only to cotton factories, and then ordered it to a third reading.

The senate refused to reconsider its reference to the next legislature of the bill relative to the purchase of gas and

electric plants by cities and towns. It also refused to reconsider its rejection of the order relative to the Roxbury

grade crossing.

The Boynton bicycle railroad bill for a line to Lowell was engrossed in the house, and the bill to repeal the Boston subway act of 1893 was ordered to a third

reading.

The bill providing for a board of prison commissioners was referred to the next

general court. The 54 hour bill, as applied to women and minors in manufacturing and mechanical establishments, was rejected by a yea and nay vote.

For the bill to incorporate the Boston, Somerville and Lowell Street Railway mar schools on Tuesday, and the High company, to operate under the E. Moody school graduation occurs next Thursday Boynton patents, Mr. Dennis offered substitute, incorporating E. Moody Boynton and others as the Boston and Lowel Bicycle Railway company with a capital of \$3,000,000, to construct and operate an elevated and surface bicycle railway under the Boynton patents, between Bos-and Lowell. The bill was substituted by a nearly unanimous vote.

Governor Greenhalge nominated C. H. Walcott of Concord for member of the board of arbitration and conciliation. H. C. Perham of Lowell was confirmed by the council as commissioner of the unemployed. The nomination of A. J. Bartholomew of Southbridge for judge of the Second district court of Worcester was referred to the advisory committee of the council.

Boston will be called upon this year to pay a state tax of \$731,500; Brookline, \$46,500; Cambridge, \$62,280; Chelsea, \$18, 720; Arlington, \$5220; Everett, \$7300; Hyde Park, \$6680; Malden, \$17,560; Medford, \$10,160; Melrose, \$6580; Milton, \$13,120; Nahant, \$4920; Newton, \$36,640; Quincy, \$12,460; Reve e, \$4620; Salem, \$24,120 Somerville, \$31,380; Swampscott, \$4840; Wakefield, \$4280; Waltham, \$14,480; Watertown, \$6620; Wellesley, \$5340; Winthrop, \$3060; Woburn, \$8120.

M. C. Dizer & Co. and the Lasters Union Both Firm and Determined.

The war between captal and labor goes merrily on and the outlook promises a hot fight until some agreement is reached. The interview between Mr. Dizer and the representation of the Laster's Protective Union was entirely barren of results. Mr. 9.40, 10.26, P. M. Dizer stated that these non-union men were in to stay, and that others of the same kind could be expected in a short 8.40, 9.20, 10.00, 10.45 P. M. time. The union propo es to fight it out on this line if it takes all summer as they are assured of the aid of their fellow workmen as well as the townspeople. Mr. Dizer on being asked by the representative of the LEDGER for some expression of his position on the question, said that he did not want to talk about the matter in any way, although he had good reasons for any way, although he had good reasons for talk and talk about the matter in any way, although he had good reasons for any way, although he had good reasons for talk and the action he has taken. Ask the grocer who attempts substitution, why he tries to sell an imitation when people call for that pure, palatable and popular vegetable shortening, COTTO-LENE? Perhaps you can guess.

Why should not YOU use COT-TOLENE, instead of Lard for all cooking purposes? It has the highest possible endorsement from Physicians as to healthfulness; from Cooking Experts as to superiority; from housekeepers as to economy. Use COTTO-LENE and stick to it.

A TERRIBLE FIGHT.

It Was In the Stokeroom of the Steamer New York on Her Recent Trip. When the big New York was cutting her way through a thick bank of fog Friday night a few miles off the Hook,

Third Engineer Raum climbed down into the stokeroom and told Chief Fireman Hinz that he should get up more steam. The engineer spoke in such a commanding tone that the chief fireman got nettled and replied that, in his opinion, the steam pressure under which the ship was then working was sufficient for the required speed.

The engineer became enraged and with a curse grabbed a 12 foot poker, the handle of which was protruding from one of the immense furnaces, and was about to run the redhot iron through the body of the chief fireman when Fireman Wagner threw himself upon him from behind and bore him down, thus saving the life of Hinz.

Then commenced a terrible life and death struggle between Wagner and the ngineer. The men were on a platform from which the coal is shoveled into the furnaces. Both men are of powerful build, with muscles of steel. They gripped each other where they lay and rolled over and over. Each tried hard to push or roll the other into one of the blazing furnaces. About 40 coal passers and firemen stood around, but could not interfere, as the chief fireman told them to keep aloof. Wagner had the advantage of being naked to the waist, wihle the engineer's movements were somewhat hampered by his close fit-

ened his grip until the engineer's eyes bulged from their sockets. Then he let him go. Raum was almost dead. A bucketful of water was dashed into his face, and he revived sufficiently to drag himself to the elevator and be hoisted on deck.

Two hours later Fourth Engineer Peters came down the stokeroom and wanted to see him. The fireman went up to one of the coal bunkers, where the machinist was said to be waiting. Here Wagner was attacked by Peters and knocked down and almost beaten to death. He says that the first blow struck was by Peters, who hit him on CALL AND SEE BARGAINS, struck was by Peters, who hit him on the right temple with a brass knuckler, in consequence of which he almost lost consciousness. Then the two fell upon him mercilessly.

Wagner made no complaint to the captain or any of the officers, believing, he said, that he would not get justice against a superior officer. He went before United States Commissioner Shields when the New York came into port and swore out a warrant against the two engineers setting forth the facts related. They were arr sted by United States Solomon. Their examination was post-poned until June 23.—New York World. Uncle Sam is the name of a

HOUNDS AND PUPPIES

Titles Applied by Governor Tillman to His Opponents.

SILENCE AT BUTLER'S REMARKS

Was Due, He Says, to His Desire to Prevent Murder.

CHARLESTON, June 22.-The campaign meeting at Lancaster vesterday was accompanied by some excitement, although it was not so lively as had been expected in view of Wednesday's occurrence at Chester. The gubernatorial and congressional candidates had the opening, and were followed by Senator Butler and Governor Tillman.

Governor Tillman was received with much cheering. He said that his office had not been sweet to him; that the wheels of state had dragged along a stumpy road. At Chester he had not opened his mouth in reply to the indignities heaped upon him by General Butler, which were fouler and blacker than had been made against any man. Yancy Sherward, who was out in the crowd, cried out:

"You took them." Couldn't Afford to Create a Row. Several hundred men at ouce sprang to their feet in expectation of a row, and Governor Tillman shouted back in reply: Yes, I tell you, you cowardly hound, why I took them, and I'll meet you whenever you want to! I took them because I, as governor of the State, could not afford to create a row at a public gathering and

have our people 'murder each other like Sherward answered, but his reply could not be heard. The men around the stand were all in commotion and velling for Tillman, while the women in the audience began to run away. Tillman, Butler, the chairman and others called to the ladies to come back as the trouble was over, and they did so.

Governor T Ilman waved his hands to the crowd to sit down and then cried out: "A few puppies around here can have their tails or necks cut off if they want to or both." He then continued his speech in reply to Butler.

Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength Lawyer Carpenter, who fought so nobly for Lizzie, was the only one in the courtroom who shed any tears at Lizzie's conviction. GIVE YOUR STOMACH A REST. RAMAPO THE WINNER.

Indigestion is caused by a tired stomach just as a sore back after working is caused by tired muscles. The remedy in either case is rest. Rest is the rational cure for every ache and disorder that is caused by overwork. There is but one way to rest your stomach and other digestive organs without starving, and that is by resort to the use of artificially digested foods. Taral's Mount Carries Off the Great Suburban Handicap Prize.

A CLOSE AND EXCITING RACE.

The Dutch Jockey Is Probably Richer by \$5000.

and that is by resort to the use of artificially digested foods.

Processes have been discovered whereby meat and vegetables can be digested outside of the body and thus fitted for immediate absorption without further change.

Paskola is such a food, but Paskola is something more than a food. It not only strengthens and nourishes the body, but it aids the digestion of other foods.

By its use the dyspeptic will find himself able to eat and enjoy those things which have heretofore caused the most frightful distress. NEW YORK, June 22 .- Suburban Day at the Coney Island Jockey club track set in property loss exceeds \$30,000. The wonderful secret of health and disease is hidden almost entirely in the food we eat. If we take care of our digestion, if we eat proper food, the chances are we shall always be well. If we fall sick we should take all hot, but just as the horses went to the post a cool air from the sea made the heat trifle more bearable.

The bookmakers were too few in number for such a day, and they were stiff in the more care for what we eat.

Sickness can be cured by food more easily than by medicines. Paskola is one of the most important discoveries of our age. Here is the evidence of what it can do for you. their odds, for they knew that they could get all the money they wanted to hold. When the big race was announced the plunge was terrific.

At 4:45 the 12 horses which were to contend for the valuable prize were all at count of the Mella affair. Gentlemen:—After being under the care of my physician for a long time and trying most every remedy known to science, I was induced my friends to try Paskola as a last resort to health. the post, waiting for the signal to be off. In the second break they were all caught in motion and sent away to a fine start, I felt a great improvement and benefit bewith Kinglet in the lead, closely followed fore I had consumed the first 50c bottle, and had no trouble to retain it on my stomach, quet, Comanche, Ramapo, Sir Walter and the others. Past the grand stand as all other preparations nauseated me.

I now have a ravenous appetite and can eat the most hearty food and know I am they flashed, with Griffin urging Kinglet to the utmost and with the positions of the others but slightly changed. Paskola may be obtained of any reputable druggist. A pamphlet on food and digestion will be mailed free, on application to The Pre-Digested Food Co., 30 Reade St., N.Y.

The first quarter was run in 25 seconds, and then Kinglet had a length the best of t, while Banqu et was taken into second place by Simms, only half a length in front of Ramapo, on whom Taral had a gentle pull. The wily Dutchman could see then that Banquet was the horse he had to beat. Half a length behind him was Pickpocket, still a contender. Henry of Navarre, or which so much was expected, dropped back into fifth place, King Lee close behind, and Sir Walter following, with Sport absolutely last.

The half-mile pole was passed by the flying Kinglet in 501-5 seconds, but he was already hanging out signals of distress. Banquet was still half a length in front of the next horse, but Pickpocket had changed places with Ramapo and looked exceedingly dangerous. Henry of Navarre was still fifth, but could not get any nearer to the flying leaders. The others were changing places like the glasses in a kaleidoscope, and in the mixup Sport had got up into 10th place. At the three-quarter Banquet passed he pole first in 1:16 1-5, leading Kinglet by head. Kinglet was then two lengths ahead of Pickpocket, he in turn two lengths ahead of Henry of Navarre, Taral having let the 3-yea:-old pass him at that point. Sir Walter was running strongly in sixth place, while the others were running in relatively the same order.

The time to the mile post was 1:41, and Kinglet had got the first place by a head from Banquet, but it was the last effort of a badly tired horse. Sport was be-ginning to show some life and was up in the eighth place. Pickpocket was still third, but by only a head over Henry of Navarre, he in turn being a neck in front of Ramapo, on whom Taral was begin ning to ride; Sir Walter was still running in the sixth place, King Lee going well in seventh, while the others, summer work. The three ran close together until the last 50 yards, when the persistent spurring and flogging of Tarel gradually drove Ramapo's head in front. Banquet's nose was beside him and it was all over. When Will It Pass?

The question, will the tariff bill pass? is senate chamber; it is now when will the bill pass?

It is known that the Republicans have abandoned all hope of being able to defor delay.

For some days the effort has been made to the floor, to ascertain how Messrs. Allen and Kyle, the two Populists who sit on the Democratic side of the chamber, will vote, and it is understood that the Republicans are assured that they will vote for the bill. This being the case, there is no hope of its ultimate defeat.

Entertainment and Good Time at Mee ing Thursday Evening.

The members of Merry Mount Lodge, No. 55, I. O. G. T., held a very successful basket party and entertainment Thursday evening in Doble's hall, about 200 being \$2.00 present. The following programme was rendered in such a manner that called forth expressions of appreciation and encores in every instance :

> Merry Mount Musical Club (5 pieces) Mr. Frank Craig Miss Beatrice Porterfield greatly increase the value of the taxable Reading Banjo and Guitar. Mr. and Mrs. Foster

Mandolin and Piano. Miss Lulu Brackett and Mr. Geo. Brackett. Duett. Miss L. Burrell and Miss B. Fletcher

Miss E. I. Miller and Mr. F. W. Miller. During the intermission the baskets were sold at auction. Fairly good prices were obtained, and in numerous instances the bidding became lively and interesting. Too much praise cannot be given to the ladies of the lodge for the effort they made BROS. to make the party a success. Most of the baskets being works of art, it must have given the makers great satisfaction to see how quickly and enthusiastically the young men realized and appreciated their endeavors by sending the prices to a point that must have made the ladies feel that their labors had not been in vain. Odd Fellows Visitation.

Manet Encampment, I. O. O. F., received an unexpected visit last evening from about twenty members of Wompatuck encampment of East Weymouth. The visitors came by the electric cars, enjoying the ride very much. They were also delighted with the hospitality extended, as they were regaled with ice cream and cake, and entertained socially. Come again, were the parting words, and a close friendship is thus cemented by the electric cars.

Commissioner Cavanagh informs the LEDGER that the income from the water works this year will probably amount to \$45,000, an increase from \$28,000 in three vears. The commissioners deplore the fact that aside from the extensions voted there is little or no money available for even short extensions. It see, sthat the city government has no authority to negotiate loans for water in excess of the amount already appropriated, and that it must wait for the Legislature of 1895 for permission. ANOTHER VICTORY.

Joe Walcott Easily Disposes of Mike

Harris, One of Gotham's Pets. Boston, June 23.—Seeming discouraged at the shouts of 2000 spectators, or pos-sibly by the blows of Joe Walcott, which seemed to land so fast that the crowd could hardly distinguish one from another, Mike Harris, the much lauded "conqueror" of the colored man, sank to the floor last night and failed to rise be-fore the allotted 10 seconds were up, and the pride of Boston's colored population

was again a victor. The scene was the Casino, and the fight was the long-looked-for battle between Joe Walcott and Mike Harris of New York, who at one time received a verdict over the dusky lad. Walcott had all his own way from the

start. Even the best that can be said for the New York man is that he is tricky. but he lacked the sand that is essential to a good pugilist, and from the time time was called seemed anxious to lie down and run around rather than fight. The first round was all in favor of the black man, and after this it was only a question of how long Harris would stand the "gaff." He slipped to the floor three good work in cleaning out the crowd of

times, but always managed to get up in the required 10 seconds. Neither man did much execution, but whatever was done was on the darkey's side. It looked in the fifth as though Harris his knees without being hit. He succeeded, after getting three or four punches on the jaw and face, in keeping out of the negro's way until the call of

the timekeepers sent them to their cor-

The sixth and last round was short and sweet. O'Rourke told his man to bring the thing to a close, and this the little fellow, who was fully a foot shorter than Harris, did with a rush. He followed Harris about the ring, landing right and left very rapidly, so fast, in fact, that the spectators couldn't count them. Harris was getting quite a hammering, and, after Walcott hit a stiff one on the jaw, he fell to the floor, and remained there until Mr. Kelleher said "out."

Tore the Banner Into Shreds. HINTON, W. Va., June 23.-Colonel W. P. Breckinridge passed through here en route home from Washington. About 800 citizens assembled at the depot and made calls for him. He appeared at the crowd. Cheers were deafening. One man, not friendly to Breckinridge, pinned up a banner: "Protection to the American Women," which was torn into shreds by the congressman's admirers.

ALLEIN PAKILLA SARSAPATHE SARSAHONEST KINI

Receives the Highest Praise from the Best Physicians.

DR. H. F. MERRILL, the wonderful specialist of Augusta, Maine, after giving it a thorough trial in his practice, writes the following convincing letter of praise:

I have of late been using some of your medicine in my practice with the most pleasing and satisfactory results. I find that it acts like a charm upon the whole nervous system, and in scrofula and all cutaneous diseases. Its curative properties are fully equal to the claims made for it, and I do not know of one instance where it has not fulfilled all its claims. In cases of General Debility and Nervous Prostration it has proved itself invaluable. It also gives quick relief in Dyspepsia and Canker of the stomach, and is a remarkable fine restorative remedy. It is a great pleasure to be able to recommend such a remedy, as the

results following its use are so wonderfully satisfactory.

One great thing in its favor is its freedom from superfluous

alcohol, and all injurious ingredients. DR. H. F. MERRILL. PROF. W. H. MORSE, M. D., P. B. S. Sc. of Westfield, N. J., author of "New Thera peutical Agents", the standard text book of the newer materia medica. Consulting Chemist and Therapeutist, one of the most widely known men among the medical profession gives it his highest endorsement, as testified by the following voluntary statement: "Allen's Sarsaparilla commends itself to me thera-

peutically, chemically and clinically. Its therapeutical power, physilogical activity, and chemical purity, are all noteworthy; and the reason is to be found in the fact that it is true to its name, or honest, as the word goes. That is, it is vegetable alterative, and tonic. Perhaps the highest praise that may be given it is that its action represents that of mercury, less the faults of that drug; for, has not Pereira said, "A perfect mercury would be a perfect

THE EXPORTS OF GOLD

Caused a Depressed Feeling In the Business World.

COAL STRIKE IS ALSO A FACTOR.

Anticipated Improvement Has Failed to Materialize.

NEW YORK, June 23 .- R. G. Dun & Co.'s Weekly Review of Trade says: The week has been rich in promise, but poor in performance. It was confidently promised that exports of gold would cease, but they have not. It was promised that the end of the coal strike would bring immediate recovery of industries, but partial resumption of work discloses comparative scantiness of demand for products.

during the week, notwithstanding continued and more liberal sales of exchange. Operations in wheat advanced the price 18-4 cents, though western receipts were only 1,381,510 bushels, against 2,269,185 last year, and Atlantic exports only 555,931 bushels, against 2,502,098 last year Corn advanced, but again receded with small exports and fairly large receipts. Cotton declined 1-16th, but recovered. The visible stock of American here and abroad is 2,512,990 bales, against 2,582,573 last year, and there is every reason to expect an increased yield.

The exports of gold have been \$7,750,000

Textile Trade Is Dull,

It was confidently expected that the settlement of tariff on textiles by the senate would improve the condition of textile manufactures. But there is scarcely any evidence of such a result as yet, the large sales of cottons being distinctly traceable to more seasonable weather and larger retail sales, and to farther conces-

sions by sellers.

The stock of unsold print cloths at Providence, Fall River and Boston is over 1,000,000 pieces, but the accumulation continues. The orders for fall are limited. and staples are irregular in price.

Wool is active, with sales about equal to half a full consumption, 3,252,541 pounds, against 2,989,800 for the same week last year, and 5,413,550 in 1892. For three weeks of June the sales have been 8,789,124 pounds, against 16,933,650 in 1892 Prices Weakening.

There is much disappointment that the partial termination of the coal strike does not promptly enlarge the demand for iron narrow as yet to support much increase of semer pig selling a \$10.90 at Pittsburg, beams at \$1.30 and angles at \$1.20.

Western orders are comparatively liberal, though much smaller than in other years, but no improvement is seen at Philadelphia, while in the central region the continuing coke strike and grave uncertainty about the July settlement of iron workers' wages causes much

DOCTOR AND LAWYER

Engage in a Heated Controversy on Religious Questions.

THE LAWYER'S STRONG LANGUAGE

Called Forth a Protest In a Boston Theater.

Boston, June 25 .- There was a heated religious discussion at the Boston theater last night, between ex-Representative Coffey and Dr. J. Van Elderen, a dentist. The debate was attended by exciting scenes and interruptions. Lawyer Coffey figured in the uproar in the People's church two weeks ago yesterday, where, he alleges, the A. P. A. tried to do him bodily harm. The meeting last night was called by

him, and was only fairly attended. His subject was: ["Resolved, That the Roman Catholic church is the parent, protector and propogandist of civil and religious liberty in America," and that "A. P. Aism, native Americanism, knownothingism and organism are the secret and treasonable foes of liberty in America." Coffee denounced the Peo-ples' church, and termed Justin D. Fulton, Mrs. Sheppard, Rev. C. C. Lorimer and Dr. James B. Brady as vagabonds. cepted. Coffee accused Dr. Lorimer, pastor of Tremont Temple, of stealing one of Spurgeon's sermons bodily. praised Mrs. E. T. Hill for saving him from "a mob of Orangemen," as he termed the congregation at the Peoples' church.

During the speech of Coffey Dr. Van Elderen occupied the platform. He be-came impatient at his opponent's lengthy speech and copious extracts read from to leave the platform, but the uproar from the audience was so great that Coffey immediately gave him the floor. The marks, and counter cheers and hisses were thrown at Coffey for interrupting. Police Were Busy.

the police were obliged to go down the aisles and in the galleries to restore order. The doctor charged lawyers of living on the fat of the land. This enraged Coffey, and he ordered the doctor to leave the stage, and called him a coward and a traitor. The audience yelled and shouted, and finally the doctor left the stage and took up a position in one of the aisles. Coffey then resumed his speech and called Van Elderen "a soulless white-livered anarchist." This so enraged the doctor that he climbed over the orchestra rail on to the stage and confronted Coffey. Hot words ensued, until the latter

8 following, and took his seat with the Left and had himself inscribed as a member of the party known as the Republi-can Left, of which section he became secretary, and voted for all the measures which tended toward the definite establishment of the republic.

Sadi-Carnot presented himself at the general elections of Feb. 10, 1876, as a candidate for the chamber of deputies in the Second division, or Circonscription of the Arrondissement of the Beaune, and was elected by an overwhelming ma-jority. He followed the same political course in the new chamber, of which he

was elected secretary.
In the election of Oct. 14, 1877, Sadi-'arnot was re-elected. A decree of Aug. 1878, appointed Sadi-Carnot as under eretary of state of the ministry of pub-lic works in the Duffaure ministry. He retained this position under Premier Waddington when the latter formed his cabinet on Feb. 5, 1879, after Marshal Mc-Mahon had been succeeded as president of the French republic by M. Jules

He was re-elected deputy from the Second Circonscription of the Beaune on Aug. 21, 1881, and left the ministry, with the other members of the Ferry cabinet, on Nov. 10, 1881. M. Sadi-Carnot was elected one of four vice presidents of the Democratic Left chamber, and again received the portfolio of public works, and passed, a few days later, to the ministry finance, replacing M. Clamageran. Later, he was elected to the chamber of deputies as a Republican.

M. Carnot retained his portfolio in the cabinet reconstructed by M. DeFreycinet, Jan. 7, 1886. He definitely left the ministry with the DeFreycinet cabinet in cember 1886, and was again elected member of the budget commission.

His Election to the Presidency. Previous to the presidential crisis of the end of the year 1887, which forced M. Jules Grevy out of power as a result of the financial and judicial scandals which affected his family, M. Sadi-Carnot was not reckoned among the numerous candidates for the succession.

But on Dec. 3, in the midst of parlia-

mentary intrigues, his candidacy was spontaneously produced and recom-mended by the dignity of his character and the honesty of his life. He polled 303 votes out of 852; M. Jules Ferry polled 212; General Saussier, 148; M. DeFreycinet, 76; M. Floquet polled 5 votes.

Upon the second ballot M. Carnot was elected president by 616 votes, against 188 cast for General Saussier, and 25 votes scattered among other candidates.

From the day he became president, M. Carnot has personally taken the greatest interest in all public functions and in all public affairs, doing everything possible to spread and strengthen the sentiments of concord and confidence in the repub-

A Pawtucket Youth Fatally Wounds His Drunken Stepfather.

PROVIDENCE, June 25 .- John Chadwick was brought to the Rhode Island hospital from Pawtucket yesterday, having been fatally shot by his stepson, Thomas Buck ley, 16 years old. Chadwick went hom at 3 o'clock Sunday morning badly into icated. Wnen he entered the house h began to abuse his wife, and seizing heavy iron stove poker commenced to beat her about the body. He sprang upo her and seized her by the throat, chokin her and swearing he would kill her. Th noise of the struggle and the cries of the woman aroused the boy, who was sleep ing in the next room. He broke the doo in. His mother cried to him to save her and taking a revolver he shot Chadwic twice, one ball lodging in the stomac and the other just over the heart. The boy was arraigned in the district cour and pleaded not guilty to the charge of assault with intent to kill. He was bound over to the grand jury.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and ventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the the American inventor, who, being on the alert, and ready to perceive the existing de-ficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiving the remedy to overcome existing dis-crepancies. Too great care cannot be exer-cised in choosing a competent and skilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice appli-cable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, country, was instituted to protect its patrons from the unsafe methods heretofore em-ployed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepares and prosecutes applicative power of France has been a source of strength to the republic. A PORTLAND SENSATION.

Pastor Hughes Makes Sweeping Charges of Municipal Corruption.

PORTLAND, Me., June 25. - In Chestnut Street Methodist church, yesterday afteroon, Rev. Matt S. Hughes preached a sermon which has created great excitement in this city. It was on the line of charges made by The Evening Express and Boston Herald against Sheriff Cram and his deputies and the police force of Portland.

Mr. Hughes said that the fact that rumsellers in the city were paying hush money to liquor deputies and police force is well known and can be easily proven. e demanded the discharge of certain liquor deputies, who are suspected of accepting bribes, and their arrest and imprisonment. He denounced Mayor Baxter and City Marshal Trickey and accused them of wishing to protect rumsellers.

He called upon all good citizens to de OLD COLONY SYSTEM.

this county and city, he said, dave been prostituted by corrupt officials, and unless something is done to put an end to this nefarious practice of buying grand juries, so that they will not find indictments for the illegal sale of liquor, and believe officers sworn to enforce the this county and city, he said, have been bribing officers sworn to enforce the as follows: (See note of explanation at liquur laws, we shall soon be governed by bottom.) law-breakers, and not by tax-payers.

Mr. Hughes' remarks were frequently interrupted by long and loud applause, and, although delivered in a church, he was even cheered. Public excitement is becoming so great that Governor Cleaves will be prevailed upon to convene a special session of the legislature, and proceed to hold a legislative investigation.

As the cortege passed slowly along, the streets were remarkably silent. Almost | financial standing to be discredited. the only sounds that could be heard were the trampling of the horses and the rumbling of the gun carriage.

Populace Became Furious No sooner had the cortege gone by, howthe crowd. The people, who had heretofore stood reverent and mute before the to government expenses, more than \$53, nation's martyr, now gave vent to their pent up excitement and rage. Everywhere could be heard cries of "Long live Carnot," "Death to his murderer." The scene was one that will not be speedily

forgotton by those who witnessed it.

The sudden transition in the feelings of the crowd boded ill for the resident Italians, and when some of the more hotheaded men in the crowd proposed that an attack be made upon the Italian quarter, the proposition was received with wild cries of approval.

In almost less time than it takes to tell our favor of \$127,512.608. it, an enormous mob, at the head of which was carried a French flag, was en oute to that part of the city given over o the Italians. Before the police could intervene to prevent the trouble, the mob had attacked all the shops belonging to the foreigners and sacked them. The proprietors and their families were forced to flee for their lives.

In the meantime another large band marched through other streets, and by threats compelled every Italian who kept a cafe to close his place of business. The crowds in the Rue de la Republique became threatening, and refused to obey the orders given them to disperse. It was finally found necessary to command the cuirassiers to charge the crowd in order

to clear the street. The mob last evening set fire to several of the Italian cafes. A commissary of police begged the crowd to respect the affliction of Mme. Carnot, but the rioters replied with shouts of "We will avenge Carnot." The most intense excitement prevailed throughout the city.

The streets are strewn with debris of every description. During the night a total of 300 arrests

Many of the anarchists are fleeing from the town.

The police are particularly anxious to find a hair dresser named Marius Violly, who is said to have repeatedly predicted that President Carnot would be murdered in his carriage on arriving here. An Italian woman, who proves to have been Violli's mistress, and one of Violli's associates named Roux, have been ar-

The Senate's Sentiment.

The senate was crowded when, amidst much emotion displayed by the senators, President M. Chalmel-Lacour made an address expressive of the senate's feeling at the death of President Carnot. In so doing, he eulogized the dignity and upright, unassuming, irreproachable conduct of the dead man. "Europe," he said, "is appreciating the nobleness and the exhalations from the trees. strength of his character, and shares in France's grief." The speaker then voiced the senate's condolence with the famimy, remarking:

"If any man's innate goodness should have guarded him from hatred and fanaticism, it was President Carnot. The crime has strengthened our energetic resolve to defend the fundamental laws of society, and to protect outraged humanity. The coming congress will show unshaken confidence in the abiding character of Republican institutions, and its choice will be ratified by a great majority of Frenchmen, who are solely concerned in ensuring abroad the honor of the state and within its borders peace."

In the Chamber of Deputies. The chamber of deputies was thronged citement when President Cassimir-Perier entered. The president read M. Dupuy's letter, making the formal announcement of the death of President Carnot, and adding that the whole of France was stupefied by the abominable crime.

Dupuy in his letter also said: "From all parts expressions of emotion and sorrow are arriving. France weeps at the

the national flag, and who awakened in Europe feelings which show how great is the ordeal through which we are now passing. The republic will ever remem-ber President Carnot. All our sympa-thies are with the family which mourns

M. Cassimir-Perier, after he had finished reading the premier's letter, said: "The chamber of deputies and France associate themselves with these words. Let us bow respectfully before the tomb, which closes over a life of devotion to the fatherland and to the republic."

Santo's Record. Rome, June 26.—The man known as Santo, who murdered President Carnot,

If Boston wishes to become prosperous it must adopt some such system as the one proposed in the bill before the Senate. He had always been a consistent advocate of elevated railroads for his district and for Boston, and if a road is ever to be built it must be through a fairly liberal charter.

He had examined the bill carefully, but failed to detect the iniquity with which it was said to be charged and he declared that he would vote for any fair, honest amendment, but would not vote for any amendment offered for the purpose of defeating the object of the bill.

The party whip, he said, had been brought into requisition to compel the Republican members to vote against the bill. "I will yield to no man on the floor of this chamber in my Republicanism, said Mr. Merrill, "but I do not see why politics should be brought into a purely business proposition, and I enter my protest against such methods."

He appealed to the Senate to give Boston a chance for development, and implored his colleagues to pass a bill which will afford the relief so urgently prayed for.

Mr. Harvey of Worcester, moved that debate on the bill be extended until 3 o'clock this afternoon. The motion was

WATER INSIDE FOUR MINUTES.

Recall Sounded in Fifteen Minutes-Hydrant Streams Used.

An alarm from Box 26 always collects a crowd in a hurry but those who arrived five minutes after the alarm Monday evening did not witness the grand exhibition of the firemen from the central station. A blaze had obtained considerable headway in a stable occupied by E. B. Souther in the rear of his news stand when the department arrived, and was bursting through the doors. Within four minutes, however, from the alarm a powerful hydrant stream was turned on the building, and so quickly did the flames go out that the crowd cheered. It shortly after burst through the roof but another line of hose had been laid and the second stream quelched the

In just 15 minutes the "all-out" signal was given, and what had promised to be a conflagration had been averted. Several buildings are but a few feet distant, and a disastrous fire might easily have occurred but for the prompt and efficient work of our fire department.

The Wollaston hose made a quick run, arriving in 12 minutes, but the Quincy Point hose did not put in an appearance until after the recall.

The fire is thought by Mr. Souther to have been of incendiary origin. The exact loss by the fire is rather hard

to determine. The stable is charred all over but is not burnt much, but will have to be shingled as all the shingles on the north side were torn off by the force of the water. It is thought \$200 will cover the In the stable there was a lot of fancy

pigeons owned by Henry L. Souther. These were all roasted and he places his loss at \$100. There was also stored a lot of goods in boxes owned by Edward Souther and the exact loss on these cannot be estimated. J. F. Merrill had 400 barrels of flour in the stable of John W. Nash, not ten feet

away, and this building connects with the store on City Square. All in all it was a very fortunate escape. Hook and Ladder 1 and Hose 1 were called out on a still alarm at 9.45 o'clock to extinguish a fire that had rekindled in

the stable.

They Enter Tirrell & Son's -The Careless ness of Business Men.

The Quincy police are on another still hunt after burglars. This time the place entered was the wheelwright shop of Tirrell & Son, which was entered sometime between Saturday night and Monday morning. It was reported to the police, who, however did not give it out until Monday

The goods secured were 2 hammers, 2 spoke shavers, 2 planers and 1 chisel. The same place was also entered a week

ago and property taken. Burglars were about South Quincy again Monday evening but as far as known only one place was entered, that of a partially furnished house on Penn's Hill, owned by Mrs. Jennie Owens, where the party or parties broke open a tool chest of Charles L. Lewis and stole \$30 worth of carpenters' tools.

These breaks furnish an opportunity to remind storekeepers that they should be more careful about locking their premises at night.

Recently Officer McKay has found two places that would not have given burglars much trouble. In one case he found a side window wide open and the location was such that hundreds of dollars worth of goods could have easily been taken away. In the other case the officer found the key in the outside door and went all through the store to see that everything was all right. A burglar in this case would have had no difficulty in going in and locking the door and then watched his opportunity to slide out with goods.

The indignation meeting held in Jackson Square Monday night was well attended and was addressed by General Secretary Daily of Lynn, Charles McMorrow and Vegetation In General Is In a Flourish-Nelson W. Gardner. The meeting was called to order by Thomas Tobin, who in a few words gave the reason for holding the meeting and introduced N. W. Gardner RAIN IN THE NORTHERN STATES as chairman. Mr. Gardner spoke in censure of the firm of M. C. Dizer & Co., who had displaced good industrious men, citizens of East Weymouth, who had labored for him for twenty or thirty years, for men imported from Italy to work for the sum of \$1.50 per day. The principal speaker, Mr. Dailey followed with a lengthy argument in favor of labor unions, giving the history of the labor movement for the 1894: last thirty years and ascribing much of the distress of the laboring man to the corrupt hot weather, with considerable sunshine, ways of the political parties. He advocated except in southeastern Maine, in the a boycott of all goods not bearing the blue vicinity of Eastport, where it has been lable of a trade union.

DEMOCRATS OF MAINE

Say Republicans Are to Blame For the Business Depression.

DENUNCIATION OF PROTECTION.

Chairman Moore Also Says Something About Hawaii.

LEWISTON, Me., June 28 .- Democrats of the Pine Tree state opened their convention here today. Hon. Joseph E. Moore of Thomaston was chosen chairman.

The resolutions favor a resubmission

of the prohibitory amendment to the people and favor a 58-hour law, support President Cleveland's administration and ariff reform. Chairman Moore outlined his party's

riews as follows: Gentlemen of the Convention: We meet today, when the business depression gives the maligner and croaker a pretext for upbraiding the Democratic party, and an opportunity, by misrepresentation and falsehood, to make the unthinking and illogical believe that party responsible for it. The Democratic party is not in the slightest degree responsible for its origin or continuance. The cause lies at the door of the Republican party entirely and completely, from whom we received

it as an unwelcome legacy.

Money and misrepresentation they believe the most potent instruments to assure success and continuance in power; and they have used both without stint. In government policy, in politics, in any great moral and religious reformation, it is not possible to specially arouse the friends of a cause to activity without also arousing its enemies, and so in the radical move of the Democratic party for tariff reform, every trust, every special industry, singly and in combination, that were fattening at the expense of the masses, came to the aid of the Republican party; their natural allies poured money into its treasury, threatened and frightened their employes, and the elec-tion of 1888 seemed temporarily adverse to the reform.

No New Organizations Needed. New political organizations are formed to wage war against class legislation; but if rightly viewed, they are unnecessary. The true remedy is to join with the Democratic party in its war against granting special privileges, do away with paternal-ism in the government, and give the largest individual liberty consistent with order and a proper maintenance of government, and if all the ills they suffer are not thus cured, they will be reduced to a minimum. Protection is egoism; free trade is

altruism; the one is selfish, the other un-selfish. Protection seeks the aid of the government for personal aims and gains. The thorough going protectionist is most likely to be a man who has something of his own he wants inflated. He usually wants protection on what he manufac-tures, and free trade in what enters into the composition of the article.

Combinations are formed to this common end, and the Republican party is the medium. They influence legislation, or try to, by shutting down manufactures on the pretext that proposed tariff legision will ruin them, and so compel their help to sign protests. They produce suffering that they may make greater gains. For political effect these Repub-ican protectionists encourage, if they do not organize, what they term industrial armies, and then point to them as the product of industrial depression, from reatened tariff reduction, knowing its falsity, and that such armies are made up, not of honest laborers seeking employment, but mainly of men who "toil

ot, neither do they spin." The Income Tax. Now there are different views as to an income tax, and much has been said for and against it. Like other forms of taxes. those who have to pay it object most. It is the easiest tax paid, for it is on a person's known ability. Give me the income

and I'll not quarrel about the tax. Be not impatient at the delay of congress. An important question is involved in the Wilson bill, and he who thinks it can be passed in haste by Democratic will has not duly considered its magnitude of detail, nor the obstacles that a hostile minority can place in the way, and have, to their disgrace and the country's injury. Republicans are only filibusters, and the Republicans of Maine endorsed

The governor and lesser lights an athematize the Democratic and applaud the Republic in party for treatment of the soldier. They expect soldiers to forget that Republican bosses in Maine sustained them in the field with paper credits when lives were at stake, that they might put money in their purses. How many soldiers have been in the United States senate or national house from Maine? How many years did Veteran Cleaves have to wait before he could be recognized? My memory tells me that when there was a contrast between Veteran Cleaves and Civilian Burleigh, the veteran had to step aside. Veterans, they say, are good voters, but poor officehold-

About Hawaii. Non-intervention in the affairs of foreign countries is a Democratic doctrine, and has been observed. We have been saved the disgrace that would have attached to us by the abduction of Hawaii, under Harrison's so-called treaty of annexation, made with a revolutionary government first established and then cognized by that administration for

that purpose. Its wrong was confessed by offering to pay the deposed queen. Ex-Minister Stevens had the ill-breeding to charge, in an open letter, the sovereign with whom he had had diplomatic relations with licentious conduct. How did he know? If by virtue of his offl. ial position, he was base to state it, and if from rumor, baser still. His letters, read impartially, condemn him. The course of the president and Secretary Gresham in Hawaiian matters has

been too honorable to tolerate the conduct of Stevens, and if they could not right the wrong, they would condemn it, as they did. Our flag is never properly hoisted to inaugurate or sustain a revolutionary government in a foreign country, and when so found, it should be hauled lown.

We are here to name a candidate for governor and organize a vigorous campaign. The usefulness of perfeet organ-Quadrant Bicycles last year was \$150.

TWENTY YEARS AGO.

Twenty years ago, pills, portions and the surgeon's knife were the only resource in the treatment of disease. Science had not as yet turned her fall light on to the problems of life. She had not shown that foods are more valuable than drugs, when things are not running just right in that complicated piece of mechanism known as the human hedy.

more than the pills and portions of his fore-fathers.

Paskola is a step forward in the line of foods specially designed for the cure of dyspepsia and other diseases which are directly traceable to some derangement of the digestive organs. Its novelty lies in the fact that it is artificially digested. In other words, it has been prepared for immediate absorption without requiring work of the poor, tirel stomach that needs rest.

Further than this, it contains principles which are active in the digestion of other foods. Therefore it at once nourishes and at the same time relieves the disagreeable the symptoms which are the chronic dyspeptic's st. Louis.

Oswego, N. Y., May 21, 1894.
Gentlemen:—The bottle of Paskola received a week ago today and I immediately commenced the use of it, in connection with Poland water. I am feeling very much betaling the polarical province. INSTANTLY KILLED.

Unknown Man Kills a Female Bookkeeper and Then Commits Suicide CHICAGO, June 26.-Mrs. Carrie Reid, who was employed as bookkeeper in an office at Blackhawk and Cherry avenue, was shot amd killed yesterday afternoon by an unknown man, who immediately after shot and killed himself.

The murderer rushed into the office ing his victim outside the office, a short and excited conversation ensued. The man suddenly fired five shots at Mrs. Reid, killing her instantly, and then sent two bullets into his own brain. The only clew to his identity is the name Hunt, found on his underclothing, and the fact

that Mrs. Reid called him "Fred". Mrs. Reid's husband, who is said to be a fugitive from justsce and a defaulter for about \$20,000, is said to be in Bismarck, S. D.

TROUBLE SPREADING.

New Bedford Weavers Think It Is Time For Another Strike. NEW BEDFORD, Mass., June 26.-The backboys in the Columbia mill came out on strike yesterday afternoon. Their grievance is the cleaning of machinery. There is every indication that the strike at the Wamsutta mills, which has been on for 18 weeks, will spread to other mills in the corporation before the expiration of the week. A shop meeting of No. 4 mill weavers was held last night, and after a long discussion on the wage question, it was the sense of the meeting that a strike be inaugurated. Definite action will be taken on the matter Thursday night. If No. 4 mill comes

The leaders of this demonstration procured a ladder, fixed it to the balcony of the Italian consulate and several of the rioters entered the consulate, tore up the Italian flag, smashed the escutcheon, broke the furniture, threw the statuettes upon the floor and kicked them to pieces, and finally seizing upon two large and handsome oil paintings, representing King Humbert and Queen Margherita of Italy, they threw them into the street.
Soldiers then charged upon the mob.

After a short conflict the rioters were driven out of the consulate and out of the street in which it is situated. The prefect made an apology to the Italian consul for the outrageous manner in which the rioters had behaved.

as the news of the arrest of the ringlead ers became known, and finally matters assumed such a serious aspect that the prefect was compelled to summon the troops of the garrison.

The military authorities occupied all the public squares and boulevards with infantry, cavalry and artillery, and Grenoble was to all intents and purposes in a state of siege. The officers in command of the troops were given orders to take stern measures to prevent rioting.

Widow Bears Up Bravely Mme. Carnot returned to Paris from Lyons with the remains of the president coffined in plain oak. The civil and police authorities received her, but no time was spent in vain compliments.

On June 20 the prefect of Herault tele graphed the minister of the interior that a dangerous Italian anarchist named Santo had arrived at Cette. This intimation was also ignored, with the Lyons tragedy for the consequence.

M. Brisson, who has been a candidate twice already, has some chances. M. Casimir-Perier would just now be dangerous, because he is repugnant to the industrial working classes. Waltham Man Believed to Have Beer the Victim of at Assault.

Boston, June 27.—Henry Cain, 25 years old, is charged with assaulting Daniel Connelly, 26 years old, a Waltham baseball player, on Monday night. Connelly, while under the influence of liquor, engaged a room at Hotel Royal, and upon eing assigned a room he went out. About 11 o'clock he was brought into the hotel in a dazed condition. Two men who were with him said he had been as saulted by a man on Alden street, who had run away. Dr. Thompson ordered him to the city hospital, where he died yesterday morning. Cain confessed that he had struck a man Monday night in self defense, but said that he did not know that he had injured the man. Cain is held to await an autopsy on the deceased to determine what was the cause

JACOBITE PERIOD DESIGN.

Modern Treatment of the Style of Long Ago. Waste Space Avoided. [Copyright, 1894, by Palliser, Palliser & Co Architects, 24 East 42d st., N. Y.]

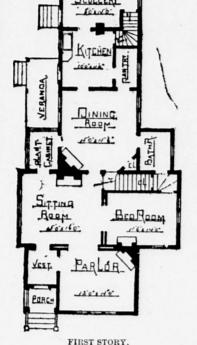

The simplicity of plan and the simple nanner in which the design expresses it are fairly shown in the picturesque exterior here illustrated. Its constructive features are fully represented in the gables, cresting, finials, chimneys and porches. The house stands on a brick underpinning and is a good example of one of the half timber and tile designs of the Jacobite period, though, unlike its prototype, shingles cut to a pattern are substituted for tiles from

the second story up. The first story shows what has the appearance of a timber construction, although it is only formed in the ordinary manner of finishing frame buildings, by continuing the belts through and connecting them with angle boards,

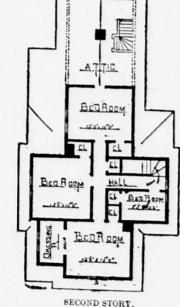

being clapboarded with narrow clapboards between, in the customary manner on frame buildings, the frame being first

The second story is arranged so as to form a hood over the first, being furred out by a molded cornice about 8 inches, at which the shingles are curved outward There are also a similar cornice and curve at the head of the second story window casings, coming out flush with the window casings, which project 6 inches, thereby giving a deep recessed window on the inside. The first story windows have stained glass transom lights, which are filled with foliated centers and gothic borders in leaded frames, which lend a charm to the interior not otherwise obtainable. The floors in vestibule, conservatory bathroom and dining room are of ash and walnut. The doors have pine stiles and rails, with butternut panels. Architraves

The general plan suggests itself as being very economical, there being no waste of room, as everything is fully taken up and used to the best advantage. The attic room over kitchen and scullery will be found useful for stores. The roofs room, as everything is fully taken up and found useful for storage. The roofs are shingled and painted black. OVERHEARD AT RECESS.

Good Byes Said by the Grammar School Graduates and Teachers.

The graduates of the Quincy school at Atlantic were entertained by the principal Mr. Merrick, on Monday evening, at his residence. The house and grounds were illuminated. There was an entertainment of music, recitations and games, and the principal told a ghost story. Refreshments were served. The class surprised Mr. Merrick by presenting him with a beautiful pair of brass andirons.

The Washington school graduates presented Principal Pollard with a set of orange spoons and fruit knives. Miss Dearborn's gift desk at the Codding-

MARRIAGE BETWEEN WOMEN.

Trial In a London Court Reveals a Plo Worthy of the Dime Novel.

The legal world of London is much exercised over the complications likely to ensue from revelations made in a trial success which it has met in my house warrants the belief that it meets and which has been had before Mr. Justice Chitty. It appears that in a marriage contracted in 1865, which up to the present time was thought to be valid, \$1600 to \$1500 at South Weymouth, and both parties were women.

In the year mentioned Mrs. Rachel Elizabeth Cullener, a widow, was harassed by creditors who wanted to attach the income she derived from the will of her husband. This income, the will, she would lose if she married again. She had living with her a son and daughter, together with Miss Sophia Newland, a cousin of Mrs. Cullener's late husband.

The whole family was suffering for ored, he has bright and sparkling want of food, when it was suggested by water equal if not superior to spring the daughter that her mother marry again, after which her children would collect to income and support her. It was diment to find a husband who could be trusted. So Mrs. Cullener, in man's clothes, under the name of James Stanley, was married in due form to Miss Sophia Newland, who at the marriage ceremony took the name of Mrs. Cullener.

Both signed their borrowed names in the register of the parish, and Mrs. Newland lived with Mrs. Cullener until 1883. Both have testified on the trial to the facts here narrated. Mr. Justice Chitty refused to believe the witnesses and dismissed the case, holding that a woman who has, by her own admission, been of welcome. ROGER DRURY'S TREE.

Planted by the Boy, It Furnished the Boards to Make the Man's Coffin. Fifty years ago Roger Drury of Webster county, Ky., then 10 years old, planted the stone of a cherry that he had eaten on the farm of his father. It took root and in a few years became a prolific tree and was known by the family as "Roger's plant." From year to year the lad collected and sold the product, invariably hoarding the money received, even after he had attained manhood, was married and had children of his own, who aided in the management of the farm bequeathed by his father.

Last summer, in his sixtieth year, Roger Drury's health declined and be came seriously impaired, and at the same time the cherry tree manifested unmistakable evidences of decay, when the old man had it cut down and sawed into boards, from which he had his coffin constructed, for utilization when tl final summons came. Three weeks ago he was compelled to resort to his bed, when he sent for an undertaker and gave final directions for the coffin's trimmings, expiring shortly afterward. The funeral expenses were defrayed from the fund saved by the sale of the cherries of the tree planted in his boyhood time. - Henderson (Ky.) Correspondent.

Encores C. O. D. Only.

An Italian impresario has discovered a way out of the "encore" difficulty that is not open to the objections made to Mr. Hermann Vezin's proposal that they should be forbidden by the public authorities. The impresario in question controls a small operatic theater in Milan, and he has absolutely forbidden his singers to repeat any of their songs, but at the same time he has placed the following notice in the vestibules: "Those persons who wish for a repetition of any numbers from the opera, or of any part of the ballet dancing, are begged to hand in their names at the box office. At the end of the performance they will enjoy the encores demanded on paying for their seats over again." Since this measure was first adopted no one has but a few pennies a day to run. Our prices today are the lowest or money refunded availed himself of the privilege thus granted, and the performances have not been interrupted by demands for en-

REPUBLICAN LEAGUE

Will Declare Itself Against Free Coinage and Woman Suffrage.

TICKET OF MAINE DEMOCRATS

Has Charles F. Johnson's Name at the Head.

DENVER, June 27 .- Standing room was at a premium at the spacious Broadway theater when the Republican National league convention assembled. The number of strangers in the city is estimated at 6000, of whom about one-third are dele-

The committee on resolutions, the mem bers of which are appointed by the states, held a caucus which developed a strong najority in favor of frowning down all ssues, such as free coinage of silver at 16 to 1, and woman suffrage.

The Texas delegation will attempt to have the basis of representation of the colored vote in the league of the southern states changed so that the power of the colored men will be cut down one-half. The New York delegation is pushing Colonel E. A. McAlpin for the presidency, but the Illinois delegation insists that President William Tracy shall have a Opening of the Session.

Dr. Kerr B. Tupper of the First Baptist church of Denver opened the session with prayer. President Tracy then introduced F. C. Goudy, president of the State Repub-lican league of Colorado, who welcomed the delegates to Denver and the state. The Nebraska Glee club sang a brand new campaign song, and President W. W. Tracy of Springfield, Ills., then de livered his annual address.

A motion was adopted that the president and secretary be authorized to pre-pare and transmit to Mme. Carnot and the republic of France the sense of the league on the assassination of President Carnot. A resolution was adopted that the chairman of each delegation prepare list of names for each of the committee A mass meeting was held last night, at which addresses were made by General D. H. THE LITTIG MURDER

Mrs. Butchman Said to Have Made an Incriminating Statement,

NATICK, Mass., June 27 .- The mysterious murder of Jacob Littig at Wellesley on June 1, 1893, was, it is reported, suddenly recalled on Sunday last at the Cape district, the German colony on the line between South Natick and Wellesley. It is stated that on that date Mary, the wife of Fritz Butchman, the engineer at Pfeiffer's shoeshop, over-indulged in

When Fritz attempted to upbraid her she became furious, and a battle ensued, in which the woman had two ribs broken. In this condition she is said to have rushed into the streets, yelling at the top of her voice: "You have killed Littig, and now you want to kill me!" She was placed under a doctor's care, and is reported as convalescing. It is expected that Butchman will be brought up for

Jacob Littig, with the back of his head battered in as if with a stone or a club, was found on the Wellesley boundary line, a few rods from Butchman's house. Butchman was held for investigation but discharged subsequently, as his wife refused to testify against him. The last time Littig was seen alive he

was seen leaving Butchman's house Half an hour afterward Charles Georke heard sounds of a scuffle in front of his house, and heard Littig's groans, but was afraid to go out, and waited till the morn ing, when the body was found near the fence on the roadside. Butchman told a straight story and

was released from castody. Of late he has been acting as a special police officer in Wellesley. Littig's was the sixth murder in almost as many years in this section, and nobody has ever been brought to punishment for the crimes.

As president of the chamber again he was more powerful than ever, and there is no Republican in France who has a stronger hold on the Conservatives. In politics he is an Opportunist of the same type as the late Jules Ferry. On economic questions he is a protectionist and an advocate of the Meline tariff. Soldierly in bearing, he wears the cross of the Legion of Honor for his gallantry under fire in the Franco-Prussian war. His grandfather was a famous premier under Louis Philippe. Points of the French Constitution.

The French constitution contains no such provision as that of the United States organic law by which the executive succession descends at once in the case of the death of the president. Under the French law the government remains in the hands of the ministry, and the national assembly is charged with the election of a new president. This duty must

A Coal Barge with 1453 Tons Sunk on Tuesday. The New York dispatch to the Globe

The steamer H. M. Whitney of the Metropolitan line arrived Wednesday from Boston with Capt. Woodhouse and the crew cents. Single copies, 2 cents. Advertising of the coal barge Shamokin which the Whitney ran down in a fog on Tuesday afternoon off Pollock rip lightship.

The ocean tug International had the Shamokin and Hercules in tow. The Shamokin was from Philadelphia, had 1453 tons of coal aboard and was bound for Quincy, Mass. The International passed the Whitney in

thick fog. A few minutes later there was a crash astern of the big tug, a sharp jerk on the towing hawser, and the International's pilot knew that the Shamokin had been hit.

He tried to find the steamship, but couldn't. The Whitney struck the barge in the starboard bow, and made a big gap in her, into which the sea rushed. The barge sank in a few minutes.

Capt. Woodhouse and his crew of three men launched a boat and rowed to the Whitney, which lowered her lifeboat. The barge's men were taken aboard the Whitney.

The International In Boston

Capt. Taylor of the tug International reported the loss of the Shamokin when the tug arrived in Boston, Wednesday with the remaining barge of her tow, the Hercules, bound for Newburyport. His story was substantially the same as that of the Whitney's captain, reported from New York.

A FRESH VIEW OF THE AMERICAN REVOLUTION.

How It Differed From All Others That Liberty-A Marvelous Inspiration-The Gonfalon of Progress.

The United States has celebrated its profusion of firecrackers, both Chinese and rhetorical. Grownup folks, a little weary perhaps of the resounding racket, while watching the urchin at work with punk and powder, will ask themselves, 'What makes the Revolution of 1776 tower like an Alpine peak among historic revolutions?" One cannot answer this by saying that the immediate result was the biggest fact which the historic yardstick measures. That was their good luck, growing out of the vast unknown resources of the continent, to which the colonies were as blind as were George III and his parliament. One cannot settle it by saying that the Declaration of Independence was the greatest charter of human rights ever penned. That Declaration contained nothing essential but what had been fairly written before in declaration and proclamation and protest, each paper of which had been sealed blood red with thousands of lives. It was just the old story inscribed afresh with a pen of fire by a mind of consummate sagacity.

The celebrated Russian musician, Rubinstein, once said to the writer: "You Americans will never have a distinct" national style of music. Only nations with a childhood can ever have this. Your people never had a childhoodyou were born full grown." This last sentence packs an essay in 10 words and cuts close to the bone. The time had come in the evolution of things for the Anglo-Saxon hive to swarm. There was not enough elbow room in the old political hive at the beginning of that bees determined to set up fresh houseily. They had inherited all the traditions, the customs, the accumulated exare at the Maryland, and have as a guest perience, the instinct for self government, inherent in a race which has beaten the world in the keenness of its political genius.

It was but the difference of 5, 10, 20 years or whatnot. If it had not been "navigation laws," "writs of assist-ance," "stamp act," "tax on tea," at which the colonists grumbled savagely, Bates college. like true Englishmen, it would have been something else a little later. These things were wrongs, to be sure, but they would have been ultimately righted in the natural course of things and were not a whit worse than many afflictions which beset the man of Yorkshire or Kent. The American colonist, on the whole, was as free in the enjoyment of social and political privilege as any king's subject that then walked the

green earth-perhaps even had larger liberty. His large measure of freedom indeed made the homespun yeoman on this side of the Atlantic, whose fathers had shot the arrow flights which won Cressy and Agincourt, and who had charged in Cromwell's ironsides at Naseby and Worceslike epigram, "No taxation withou in a magnificent system of home rule biform in its relation to state and fed close as possible to him, in fact. Englishmen over the sea have been swarming off from the parent hive ever since. But of all they have bequeathed to humanity nothing blossoms with promise so rich as that tree of liberty which bourgeons into 44 commonwealths. Its object lesson is an incarnate fact, exemplifying the truth that every political community and every individual in that community is entitled by God's birthright to the fairest, most unfettered field of self development. "And the Should be Advertised leaves of the tree shall be for the healing of the nations." That is the gonfalon of the progressive world today. That was the practical work of July 4, G. T. FERRIS.

Receives the Highest Praise from the Best Physicians.

DR. H. P. MERRILL, the wonderful specialist of Augusta, Maine, after giving it a thorough trial in his practice, writes the following convincing letter of praise: GENTLEMEN:-I have of late been using some of your medicine in

y practice with the most pleasing and satisfactory results. I find that it acts like a charm upon the whole nervous system, and in scrofula and all cutaneous diseases. Its curative properties are fully equal to the claims made for it, and I do not know of one instance where it has not fulfilled all its claims. In cases of General Debility and Nervous Prostration it has proved itself invaluable. It also gives quick relief in Dyspepsia and Canker of the stomach, and is a remarkable fine restorative remedy. It is a great pleasure to be able to recommend such a remedy, as the results following its use are so wonderfully satisfactory. One great thing in its favor is its freedom from superfluous alcohol, and all injurious ingredients.

PROP. W. H. MORSE, M. D., P. B. S. So. of Westfield, N. J., author of "New Thera peutical Agents", the standard text book of the newer materia medica, Consulting Chemist and Therapeutist, one of the most widely known men among the medical profession gives it his highest endorsement, as testified by the following voluntary statement: "Allen's Sarsaparilla commends itself to me therapeutically, chemically and clinically. Its therapeutical

power, physilogical activity, and chemical purity, are all noteworthy; and the reason is to be found in the fact that it is true to its name, or honest, as the word goes. That is, it is vegetable alterative, and tonic. Perhaps the highest praise that may be given it is that its action represents that of mercury, less the faults of that drug; for, has not Pereira said, "A perfect mercury would be a perfect

> CAMBRIDGE, Mass., June 28 .- Two things made the commencement of 1894 at Har. vard unique. It marked the close of President Eliot's 25 years of service at the head of the university-an event suitably commemorated at the alumni dinner by the presentation of a gold medal to the president by Joseph H. Choate on behalf of

> The day also marked the first commencement upon which, by vote of the president and fellows, punches and distilled liquors had been prohibited within the college rooms. Aside from these two points, the day presented no departure from the many similar occasions in former years. At the anniversary exercises of the Phi

> Beta Kappa Alpha of Massachusetts, Senator Lodge delivered the following Mr. Lodge's Address.

My purpose today is to speak of a lib-FAMOUS OIL RANGE eral education in its broadest and truest sense without any reference to recent controversies over the study of what are misnamed the dead languages. To understand, however, the real relation of a lib-eral education to our American life we must have the true as well as the conventional definition.

The first expression that we get as to he purposes of our own university is iven in "New England's First Fruits," published in London in 1643. It is there said: "One of the next things we longed for and looked after was to advance learning and perpetuate it to posterity, dreading to leave an illiterate ministry to the churches when our present ministers shall lie in the dust."

The later charters of the college all proposed as its purpose that it should fit perous for the church and for civil employ ment. It was the object of the college, as the Puritans looked at it, to perpetuate learning, which was at once the badge and guide of civilization, but it was also and equally the object of the college to fit the students for life. The early found ers mentioned only one field of work, that of the ministry. The clergy were then the most powerful, and, to the Puritan mind, by far the most important class in the community.

Fifty years later the views had widened and the expression of the purpose of a college is defined as the preparation of men, not only for the church, but the civil employment, or in other words, for the service of the state. This idea has gone on broadening ever since, until now the true conception of the highest duty o a great university is, or ought to be, to fit its scholars for the life which lies before them when they go out into the world. Good Citizenship.

The great function of a liberal education is to fit a man for the life about him, and to prepare him, whatever profession or pursuit he may follow, to be a useful citizen of the country which gave him birth. In the United States this is of peculiar moment, because here every man has imposed upon him the duties of a sovereignty, and in proportion to his capacity and opportunities are the responsi-

bilities of that sovereignty. If a man is not a good citizen it boots little whether he is a learned Grecian or a ound Latinist. If he is out of sympathy with his country, his people and his time the last refinement and the highest accomplishments are of slight moment. he is in sympathy with his country, its needs and aspirations, the rest will follow, and it is precisely at this point that there seems to be a real danger in our uni

THERE Was never a time in the history of our country when the demand for inventions and improvements in a nearts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing delert, and ready to perceive the existing delert. lert, and ready to perceive the existing de- on the second point the danger is that dealing largely with the past the university will alienate its students from the

These are the qualities which have carried the dominion of the English-speaking people across continents and over ocean to the very ends of the earth. It is the same in every field of human activity. The men who see nothing but the lions in the path, who fear ridicule and dread mistakes, who behold the faults they may commit more plainly than the guerdon to be won, win no battles, govern no states, write no books, carve no statues, paint no pictures. BOWDOIN'S CENTENNIAL

Chief Justice Melville W. Fuller Delivers the Oration of the Day. BRUNSWICK, Me., June 28.-Hundreds

crowded the lecture hall at Bowdoin college today in attendence upon the annual commencement exercises and the celebration of the 100th birthday of the institution. Visitors from all parts of the state and graduates who have not been here for years are present. The exercises in commemoration of the anniversary were elaborate and in-teresting. The eloquent address of Chief Justice Melville W. Fuller of the United States supreme court was the featare of the exercises, and was warmly applauded. His address in brief was as

The name which our college bears is aspicturesqueness all its own. Doubtless the people of the district of Maine, possessing distinctive characteristics derived from the situation, nature and capabilities of the province, desired their own establishment for the acquisition of higher education. When that desire took formal shape is a matter of speculative interest, but the movement is said to have begun before the revolutionary war. We know that the attempt in 1787 was earnestly renewed in the fall of 1788, after which the legislative journals show un-

remitting effort to attain the end. When, finally, on June 24, 1794, Samuel Adams approved the charter of Bowdoin college, he must have recalled the ancient friend | Men's White Yacht Bais. and Oxfords. with whom for so many years he had been associated in the struggle for American liberty and American independence The annals of the time record the Ladies' White Yachting Shoes. harmonious action of these two patriots as respectively members of the Massachu- Tennis Shoes, in all colors. setts council and the house of represetts council and the house of representatives. They were elected together to the Continental congress, family sickness preventing Bowdoin's attendance, Base Ball Shoes. thereby giving Hancock the opportunity to sign the Declaration of Independence in his place,

The Past and the Present. Bowdoin's Huguenot descent; his eminent public career, so largely contributing to successful resistance to arbitrary power to the union of the colonies and to the formation of the new government, especially the part he took in respect of the grant to congress of that unifying power, the regulation of commerce with foreign nations and between the several states; his distinction in the cultivation of science and letters, his intimate relations with Washington and Franklin, his unaffected piety and his Christian death, these things carry their own lessons, and give cause for felicitation that they are inseparably connected with the day we celebrate.

James Bowdoin, the son, succeeded to close terms of friendship with Washington. But the second Bowdoin, although filling responsible public positions, must always be chiefly remembered for the wise munificence with which he sought to advance the cause of letters in the perpetuation of his father's memory and the family name.

We are told by his eulogist that at the annual commencement of 1812 he formed his collection of minerals and metals and the models of crystallography, and deposited them for the use of the college, and he endowed a professorship of mathematics and natural and experimental philosophy. Yet he could hardly have anticipated that the first American work on mineralogy would carry the name of Cleveland and of Bowdoin throughout the civilized world, or that the college ould boast in its centennial year, in the Searles science building, of better facili ties for teaching the sciences than any college of its size possesses.

The Nestor of the old faculty, Professor Cleveland, appeared at the first com-mencement, and Packard, Smythe, Upham, Newman and Goodwin came later. No mist separates the memories of these early laborers in the vineyard from the later time. They live not simply in the published works by which most of them won great distinction, but in the sweet remembrance of those daily lives of faithfulness to duty through which precept received its chiefest value from example. This college is not, and has never claimed to be, a university in the sense of a place of universal instruction, or of a cramming, rather than a teaching, body, nor is it a school of science or of profes-sional training, but it is a school whose scheme of discipline and culture aids to fit the student for the pursuits of practical life, or to advance in any line further development, whether in the professions, in letters or in science.

The storm in respect to classic culture passed over its head undisturbed, and it has adhered to the mathematical and classical curriculum from the first, but broadened to embrace every department, whether in the cultivation of the humanities, or of the phenomena and laws of nature, or of economics, according to the advancing standards of the time. What Has Been Accomplished.

And now, glancing back over the years that have gone, to what extent have the alumni of the college indicated the trainalumni of the college indicated the training they have received and the influence by which they were surrounded during the formative period of their lives? Obviously, a roll of alumni upon which appear a president and nine senators of the United States, a speaker of the national house, 25 members of congress, many governors, foreign ministers and mem bers of state legislatures attest marked adaptation to participation in political affairs, and the consequent acquisition of prominence in that direction, in respect of which, it may be added, there has re-

diminution. In the coming years, the higher education will play the most efficient and saving part in the preservation of institutions nd in the leadership essential to prevent or to control whatever crisis may be threatened or arise.

NEGATIVE PLEA. Mr. Thompson made the following

In this question, which is one of the greatest problems of the present day, three points may be considered which tend to

show the superiority of man to woman. 1st. Women seldom fight the nation's battles. A few examples of help from women are found as in the case of Philippa It was under the kind and loving guidance or Joan of Arc, who were incited by some of the teachers that the class of '94 had great cause. These cases are so rare that been able to complete their High school they form only a small part of history. course; and though the class must part Man is pre-eminently the fighter and winwith the teachers, yet the ties of friendship ner of battles.

VIRTTUS MILLIA SCUTA:

[Continued from First Page.]

England if it were not for her masculine advisors? We owe the catastrophe of the to the standard of the old, and make it French revolution to a woman's attempt at among the educational institutions of

Political questions are settled best by men, whose sphere is the world, rather than by woman, whose sphere is home. The male sex have alone made the laws because laws must be backed by force, and the force of the community is masculine.

Women are not a class but a sex. In regarding physiological facts, if any reason should be found for supposing the quality of the female brain superior to that of the male, if for instance the convolutions were deeper, the cells in the gray matter more numerous, we would acknowledge the superiority. Unfortunately, not only is there an absence of such evidence. but in regard to all points specified, the quality of the female brain, as well as the quantity, is found to be deficient.

NEGATIVE CONCLUSION. The remarks of my opponents should not be passed by too quickly, but should be reconsidered. One of the first was a state ment about woman's aid in war times as a nurse. Was it anything more than fair that woman, if she was not able to assist in battle, should offer her assistance as nurse to those who had offered their lives for women? Could any superiority be seen here? Man could have assisted, as many did, if it had not been for a more urgent call to fight. Examples of the general ability of man to surpass woman even in her own sphere are found in the fact that the greatest dressmakers, milliners and even nurses and attendants are men. What do the deeds of Joan of Arc amount to against the wonderful and famous exploits of Napoleon and other generals? What does the talent of Rosa Bonheur or Harriet Hosmer count for against that of

the great English and American poet? Her Majesty Queen Victoria has been mentioned as an example of woman's superiority. But what does her power amount to? She has a veto power which she dares not exercise, and, as she is guided almost entirely by her cabinet and parliament, the credit of ruling belongs to man. If such a woman were placed in the Presi-Best work guaranteed. All kinds of Shoes dent's chair at Washington with the same amount of power and business that our President has, nobody could tell what would become of the country. It has been said that man has his way smoothed for him. This statement is by no means correct. Man and woman were given the same advantages and placed on an even footing, but by constant toiling, man has won his superior position of today. From these facts it can clearly be seen that man is morally and intellectually the superior

AFFIRMATIVE REPLY.

My fellow debaters also think that a woman's vocation is that of wife and mother. But there are just as many women proportionately who are capable of doing their duty in the home and making their mark in the world as there are men who are capable of doing so.

As for the gossipping part, the men can

It was said, "That a woman's brain is the smaller, and thus must have less power. "Small in quantity but large in quality," is the proverb for us.

men, will fail.

Women ought not to be called masculine and is in no danger of becoming so, even if she does take part in the activities of the work. Mrs. W. L. Dunagan, Bon-aqua, smoothly and steadily through the water,

If time would permit, I would like to ask about the catastrophe of the French Revolution. In conclusion I would say, woman's sphere is not only the home but her country's welfare. If men would make themselves more useful in the home, perhaps they would be less frequent visitors at the saloons

Women, be strong and patient, kind, oving mothers and sisters, and you will yet be recognized as superior to men.

The Old High School and the New-

Miss Helen Sweeney, in her essay on 'The Old High School and the New." spoke as follows: On this last day of our school life at the Quincy High school, our thoughts are both retrospective and prospective. Our minds are occupied not only with the old building which we are leaving, but also with the new from which hereafter all the pupils will be graduated. The old High school was open May 12, 1852, with Mr. Asa Wellington as principal. During the forty-two years which have passed there have been many Principals, among whom may be mentioned Mr. Putnam, Mr. Keith, Mr. Lull, Mr. Horne and Mr. Tupper. Much progress has been made. The Golden Rod, which has been a great incentive to literary activity among the students has been well maintained.

As our old building could not hold all the pupils that came September 7, 1893, we are obliged to have two sessions, until our new building is completed. Through the united efforts of the Mayor, the Council, the School Committee, the Superintendent, and the Principal, work on the new building was begun Monday, November 27, 1893. The structure is built of brick and Quincy grapite, and will be finished September, 1894.

The new building will have one large assembly room, two rooms opening out of the large one, several other rooms on different floors, two laboratories, drawing rooms, a lecture room, and rooms for the Principal and the teachers. The curriculum, if the committee so decide, will comprise a complete preparatory course, with Greek, a general course, and an English course in which special attention will be given to business. Typewriting and shorthand will be features of this course.

Although the class of 1894 will not parti-

cipate in the advantages which will be offered to the future pupils, yet, having an interest in the welfare of the school, they earnestly hope that the members of the school will keep the new High school up Quincy, a source of pride and a model to

Translation from the French.

Miss Ellen Granahan had the translation from the French. She said: "The emperor Charlemagne who amused himself by assembling in his palace at Aix-la-Chapelle, sages from every country, had also gathered near him the most valiant warriors of his time, whom he called his Preux, that is to say, his brave and faithful ones because he had tested their courage in battle as well as their devotion to his service.

These preux were intrepid captains, who widows and orphans, and to defend the Yale defeated Harvard in these events on poor and church-folk. Among these preux | the Thames, while Harvard has had only was Roland, who oftener than any of the six victories on this course. With one others, overwhelmed the enemies of France, or punished the powerful men who had committed evil deeds. He was Charlemagne's own nephew. Roland had only to show himself to terrify all those whose consciences upbraided them for some misdeed. When the Saxons, Lombards and other enemies of the emperor perceived him in battle, they ran away at once, crying that they had seen Roland.

One day when Roland was returning to Charlemagne, after he had conquered the Saracens in more than one hundred engagements, he found himself followed by a little band of knights in a narrow pass called the Valley of Roncevaux, among the Pyrenees between Spain and France. Roland did not know fear, but he could not refrain from an emotion of surprise, at the sight of a multitude of Saracens who were covering all the surrounding mountains. This cowardly enemy threw a great quantity of rocks and trunks of trees upon the Christians, so that all but Roland perished. In the midst of this struggle with one man against a whole army, he remembered a horn which he carried and drew from it a sharp sound, which smote the Saracens with so much terror, that they ran away at once, but before departing they threw upon the hero so great a quantity of rocks that Roland perished,

buried under this enormous mound. A long time after his death they used to show in the Valley of Roncevaux, enormous blocks of stone heaped up in disorder, which they called "Roland's Sepulchre," and in order to recall this adventure, they composed a song, which for many years the French soldiers were accustomed to shout in battle to arouse themselves to imitate the bravery of Charlemagne's nephew."

HARVARD MADE A POOR SHOWING

The Columbia Freshmen Finished a Good Second.

NEW LONDON, Conn., June 29.-Harvard was defeated by Yale in their annual eight-oared four-mile straightaway boat race, because Harvard was not so good in were always ready to protect with the sword personnel or system. Eleven times has tests with Harvard for nine years past

the exception being in 1891. The conditions of Harvard's crew when they reached their boathouse, as compared with that of the Yale men, constitutes an emphatic commentary either upon the methods of selection of men or the methods of training them after they have been chosen, and possibly both.

Two of the Harvard lads were supported in an exhausted condition into their boathouse, while all the others, save thre, were not in as good condition as any man in the victorious boat. The solution of the problem is not one of muscle, but of particular muscle and particular methods.

All Ready. It was six o'clock when the tug Manhanset, with every available space on board crowded by newspaper men, started up the river to view the beginning of the great contest, and to follow the racing boats until they had passed the finish line. With her went the United States revenue cutter Dexter and the tur America.

The boats arrived at the starting point at 6:15, and lay there waiting for the rac ing shells to put in an appearance. The sun had sank beneath the level of the clouds and threw a strong line of blinding light across the river. The water was not quite smooth, but its surface was unbroken, even by a wind flaw. At 6:28 the Yale boat shot out from its

boathouse, a half-mile above the starting point, and began to cross the stream, Immediately afterward the Harvard men picked up their shell and placed it in the into it. Yale had crossed clean over to Gale's Ferry, opposite her boathouse, and then came down with the current. She reached the starting point only a moment after Harvard, and the two boats were quickly in place, side by side, ready for

When it came both sets of oars struck the water together, and the boats darted forward. As had been expected, Harvard started in with a fast stroke, 40 to the minute, hoping to break Yale's heart in

Yale responded gamely with 38 strokes. and kept right abreast of Harvard. For a furlong, perhaps, the boats rowed nip and Yale drew away from the straining Harvardites. At the half-mile she was already five seconds ahead, a full boat's

length, and her lead steadily grew. At the mile Harvard's stroke had

Both crews here began to reduce their in my stomach; one third of a bottle of this to 34. But while Yale's strokes were deep Harvard's work was ragged. At each stroke the Harvard boat would jump forward with a perceptible jerk, which would be repeated when the next stroke

After the first half Harvard's men were but a few pennies a day to run. Our prices never in perfect stroke. They all feathered well, but their work in the boat was very bad. If they had been perfect oarsmen, however, they would still have lost the race for their steering. From the mile flag on the Harvard boat zigzagged across the stream in the most extraordinary

manner. Coxswain Day's Error. As the two boats approached the 21-2 mile flag, Yale was 40 seconds in the lead. The Harvard boat went nearer and on the press and judge's boat went up a sort of murmur: "Coxswain Day is going Hard Wood. to hit!" Hit it he did, the starboard oars catching the flagstaff three feet from

Harvard men from their seats, and for a moment it looked as if their part in the race was to end right there. Nothing shows how game they all were better than the quick recovery from this unde served disaster and the way in which they closed up what the momentary stop had lost them. For a moment they almost seemed to gain upon Yale. They Stores, Land, Rooms, Offices were 48 seconds behind at the three-mile flag, and at the fourth they were only 46

It was a game and splendid effort, but it could not last. Their stroke, which was 36, dropped to 32, while the heavy way in which they handled their oars showed that they were very tired. So, too, were the Yale boys, but they showed it less being happy in the victory so near at The first three miles of the race were

made in almost absolute silence, but

when the boats entered the long sea line,

on both sides of which the assembled vachts and steamers were waiting, it seemed like a change into a new world. Yale Must Have Felt Happy. First the steamer Chelsea gave a shriek of her whistle, then a little white yacht let off a cannon nearly as big as herself, and then pandemonium began. As the boats rushed along, the clamor of ap-

plause from human and metallic throats grew louder and louder. As Yale crossed the line, 23m. 47s. from the start, the assembled boats seemingly achieved the impossible. They made a louder noise than any that went before. The victorious crew rowed on toward their float, and a vast shoal of small boats, coming from nowhere in the most startlingly sudden manner, skurried out and gathered around both the racers.

TWENTY YEARS AGO. *

Twenty years ago, pills, portions and the surgeon's knife were the only resource in the treatment of disease. Science had not as yet turned her full light on to the problems of life. She had not shown that foods are more valuable than drugs, when things are not running just right in that compli-

Today, one may almost say that the higher the standing of a physician in his profession, the less medicine he employs. He has found that due attention to diet will accomplish more than the pills and portions of his fore-fathers.

Paskola is a step-forward in the line of

foods specially designed for the cure of dyspepsia and other diseases which are directly traceable to some derangement of the diger traceasite to some deringement of the ages-tive organs. Its novelty lies in the fact that it is artificially digested. In other words, it has been prepared for immediate absorption without requiring work of the poor, tire I stomach that needs rest. Further than this, it contains principles

which are active in the digestion of other foods. Therefore it at once nourishes and at the same time relieves the disagreeable symptoms which are the chronic dyspeptic's Read the following statement of one who

NOTICE TO INVENTORS.

THERE Was never a time in the history A of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the later, and ready to perceive the existing de-land had rejected the addresses of the inficiences, does not permit the affairs of government to deter him from quickly conceiv-ing the remedy to overcome existing discrepancies. Too great care cannot be exer cised in choosing a competent and skilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have

beer 'ost and destroyed in innumerable in-stances by the employment of incompetent counsel, and especially is this advice appli-cable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore emloyed in this line of business. A Highly Interesting Railroad War In Fall River Suburb.

FALL RIVER, Mass., June 29 .- An interesting war is in progress here between the New York, New Haven and Hartford railroad and the Dartmouth and Westport electric railroad between here and New Bedford. At one point, a short distance over the line between this city and Westport, the electric road crosses the tracks of the New York, New Haven and Hartford branch between this city and Fall River. The latter company refuse to allow the crossing unless a decree

is secured from the courts. The electric road is completed for running, except for the frog at the crossing. It arrived yesterday, and an attempt was made to put it in last evening, and to prevent this a locomotive was kept running back and forth over the place where the frog was to go.

The men working on the electric road became greatly enraged, and were with difficulty prevented from attacking the New York, New Haven and Hartford men with spikes and tools. The electric

MR. PULLMAN SPEAKS

Says He That Did All In His Power to Aid His Employes.

WARNING FROM PRESIDENT DEBS

Friends of Labor.

CHICAGO, June 30. - George M. Pullman, president of the Pullman Palace Car company, has issued a comprehensive statement to the public with regard to the efforts of the company to keep its works open and give employment to its men. Among other things he says:

At the commencement of the serious depression last year we were employing at Pullman 5816 men and paying out in wages there \$305,000 a month. Negotia tions with intending purchasers of rail-way equipment that were then pending for new work were stopped by them, orders already given by others were can celled, and we were obliged to lay off a large number of men in every department, so that by Nov. 1, 1893, there were only about 2000 men in all departments, or about one-third of the normal number.

renuous exertions to procure work immediately, without which there would be great embarrassment, not only to the employes and their families at Pullman, but also those living in the immediate vicinity, including between 700 and 800 employes who had purchased homes and to whom employment was actually

necessary to enable them to complete

I canvassed the matter thoroughly with the manager of the works, and the sion was a revision i piece work prices, which, in the absence of any information to the contrary, I supposed to be acceptable to the men under the circumstances. Under these conditions, and with lower prices upon all materials, I personally undertook the work of the letting of cars, and by mak-ing lower bids than any other manu-facturers, I secured work enough to gradually increase our force from 2200 up to about 4200, the number employed, accord-

ing to the April payrolls, in all capacities at Pullman. This result has not been accomplished merely by reduction in wages, but the company has borne its full share by eliminating from its estimates the use of capital and machinery, and, in many cases, even going below that and taking work at considerable loss. During the night of May 10 a strike was decided upon, and accordingly next day about 2500 of the employes quit, leaving about 600 at work, of whom very few were

skilled workmen. As it was found impracticable to keep the shops in operation with a force thus diminished and disorganized, the next day those remaining were necessarily laid off, and no work has since been done in the shops. The payrolls at the time amounted to about \$7000 a day, and were reduced \$5500 by the strike, so that during the period of a little more than six weeks, which has elapsed, the employes who quit their work have deprived them-selves and their comrades of earnings of more than \$200,000.

ALL ASKED TO JOIN

In the Railway Union's Fight Against Railroad Companies, CHICAGO, June 30.-President Debs has

issued the following appeal to the railway employes of America: The struggle with the Pullman company has developed into a contest between the producing classes and the money power of the country.

We stand upon the ground that the workingmen are entitled to a just proportion of the proceeds of their labor. This the Pullman company denied them. Reductions had been made from time to time, until the employes earned barely sufficient wages to live, not enough to prevent them from sinking deeper and deeper into Pullman's debt, thereby

Up to this point the fight was between the American Railway union and the Pullman company. The American Railway union resolved that its members tions came to the rescue and declared to the world that they would go into partnership with the Pullman, so to speak, and stand by him in his devilish work of starving his employes to death. The American Railway union accepted the gage of war, and thus the contest is now on between the railway corporations united solidly on the one hand and the

Every railway employe of the country

lost corporations will have despotic sway, and all employes will be reduced to a

condition scarcely removed above chattel slavery, but the fight will not be lost. Corporate power, drunk with its own excesses, has presumed too far upon the forbearance of the American people, and, notwithstanding a subsidized press (to which there are many noble exceptious), public sympathy is with the strikers, who are merely contending for the right of their fellow toilers to receive living wages

I appeal to strikers everywhere to retrain from any act of violence. Let there be no interference with the affairs of the companies, and above all let there be no act of depredation. A man who will de-stroy property or violate law is an enemy and not a friend of the cause of labor. The great public is with us, and we need only to maintain a dignified, honest, straightforward policy to achieve victory. An Act of Violence.

CHICAGO, June 30.-The engineer and fireman of an Illinois Central suburban Violators of Law Are Not the train were driven from an engine yesterday afternoon by a mob of 200 men, who pelted them with rocks and bricks and chased them away. The train was stopped near the crossing at Burnside station. One striker drew the coupling pin connecting the locomotive with the rain, and 12 others boarded the cab and forced the engineer and firemen to jump out. As they did so the mob began to pelt them with stones. The engineer

and fireman fled for their lives, pursued by a portion of the mob, while others packed the engine into a roundhouse, close at hand, leaving the cars standing on the main track. A short time later orthbound surburban train appeared, and it, too, was stopped, the engine detached and taken to the roundhouse, and the cars left standing on the northbound tracks. The news was sent to the police station, and a force of 25 men hastened to the scene and scattered the mob.

Meat May Go Up. CHICAGO, June 30 .- Many of the com mission houses at the yards regard the situation as serious, and have notified their clients in Iowa, Kansas, Nebraska, Missouri, Texas and other states not t ship stock unless the railroad companies agree to deliver the shipment and to be esponsible for long delays or responsibl f there are any losses on account of deay. The result is that the shipments have been stopped in many instances and the price of meat is expected to take a rapid jump upward before many days. Extended to Stock Yards.

CHICAGO, June 30 .- All the trainmen at the Union stock yards struck last night, in obedience to Debs' order calling out all American Railway union men. The number of strikers is only 300, but no cars can be switched in or out of the yards, and all are practically at a standstill at the yards. About 6000 men will be thrown out of employment at once. Threats of Strikers.

TOPEKA, June 30.-General Manager J. J. Fry said regarding the situation on the Santa Fe: "One of our train dispatchers was chased by a mob of about 500 men, and he was compelled to leave the city and flee to the hills to save his life. The mob then notified the chief night train dispatcher that if he went on duty they would kill him." Railroad Directors' Attitude.

ST. HIGH SCHOOL PARTS.

Class History in Chapters, Essay and Statistics.

(Continued from Friday) The abstracts of the individual parts at he High school graduation begun yester-

day, are continued below: Class History-Chapter I.

Miss Forrest had the first chapter of the class history. The following facts were mentioned: Wednesday, Sept. 8, 1890, proved an eventful day for the members of the class of 1894, as on that day they entered the High school. They thought themselves very important, until arriving in the school-yard the dignified glances of the seniors immediately proved the insignificance of the new pupils.

After the scholars had assembled in the large hall, and the usual exercises had been held, all but the seniors, were requested to go out into the yard again for short time.

The time was pleasantly occupied in istening to anecdotes about the teachers. In the midst of a charming account of a certain engagement, the bell was rung thus interrupting the account.

In the assembly hall there were certificates to be presented, books to be given COURT ROOM BUILDING. out, and seats to be assigned. After all had been satisfactorily arranged, and the pupils counted, it was found that the class numbered seventy-six.

On that day their trials began. There were algebra to master, history and grammar to grapple with, to say nothing of the drawing lessons, essays and declama-

In the middle of the first term they were called upon to mourn the loss of two of their classmates, Annie E. Stancombe and Mary E. Menhenick. Ere they had fairly started in school-life, they were called into that school "where each no longer needeth our projection, and Christ himself doth

At the Christmas holidays those pupils who were considered sufficiently learned in grammar were allowed to take Latin. In those good old days there were neither

football nor baseball teams. Yet the boys would play ball. Time after time the ball was thrown into a neighboring orchard, specially when the fruit was ripe. How ould the boys help it, if the grapes were torn from the vines and the pears became scarce? Some people are so inconsiderate. Thus the time fled. Before the pupils were half ready for vacation the seniors were preparing for graduation. With their graduation the scholars advanced step from the chrysalis state of Freshmen

to the butterfly existence of Sophomores. The Class History-Chapter II. Miss Walsh in giving the history of th second year, recalled the September morning when a band of fifty-three girls and boys returned as members of the class of

CLASS RECEPTION.

The Class of '94, Q. H. S., Have a Ho at Faxon Hall,

For many years it has been the custom of graduating classes of the Quincy High school to wind up their school days, and take final parting of their teachers and \$1.50 classmates at a reception held the evening following the graduation.

The Class of '94, not to be out done by other classes, held its reception Friday evening at Faxon hall, and a pleasant occasion, long to be remembered, it was. The weather which had been oppressively hot for the past week was apparently in league with the class or desired to show them some favor, for it was quite cool considering the time of the year.

Light costumes were a rule with the young ladies and a very pretty picture they made contrasted with the more somber dress suits of the gentlemen, the whole forming an ever moving picture.

On the front of the platform was a row of handsome potted plants and on the right of these was a large bowl of ice cool lemonade, from which the dancers refreshed themselves.

The graduates and their friends began to arrive shortly after 8 o'clock when they were received by the ushers: Messrs. Joseph Callahan, George Holden, William Chubbuck, Bartlett A. McLane and John Estabrook, and escorted to where the teachers were seated and presented. These same gentlemen also officiated as

floor directors. It was nearly 9 o'clock when Monk's orchestra started the ball in motion with a march, which was led by Mr. James Cashman and Miss Forrest, who were followed by thirty-five or more couples, the

march ending in a waltz. Quadrilles, and round dances followed in rapid succession without intermission East Milton. until midnight when wraps were put on classmates the class of '94, turned their over his eye. faces homeward, not without a remembrance of the many happy days the 45th Regiment Association at its 19th spent within the walls of the old High School building.

WEYMOUTH,

Graduating Exercises of the North High-Town Notes.

"Loyal en tout" was the motto sus pended in red and white letters across the front of the lecture room of the Union church last evening. It was the motto of the Class of '94 of the North High school, which had completed the course of four years in that institution, and were about to take their farewell departure from Weymouth's public schools and take a place in the busy throng of life.

Old Weymouth had done her full duty to them, and last evening launched them upon the sea of life, with sails spread and streamers flying. About 1000 persons were present and they applauded liberally the

After the overture, which was rendered by the East Weymouth orchestra, prayer was offered by the Rev. Mr. Evans, and the "Bridal Song" was sung by the four classes of the school. The French salutatory, delivered by Miss Alida M. Denton, was very correct, both in accent and pronunciation. The recital: "The March of Mind," by Miss Mary Hopkins, was well given and well applauded. Joseph A. Nolan delivered a stirring oration on James G. Blaine.

Following this was the class history in two parts. Miss E. Alida Allen chronicling entertain at Houghs Neck, Sunday, from the first two years, and Miss Emma W. 3 to 5 and from 7 to 9. FOUGHT TWENTY ROUNDS. The Dixon-Griffo Contest at Boston Ende

In a Draw. Boston, June 30.-Five thousand spectators last night witnessed at the Casino one of the prettiest fights ever held in this city. Dixon was in grand shape, and presented a strange contrast to the burly Gr ffo. The latter seemed over fat. His heavy form created the impression that Dixon would not be in it with him, but here was where the colored lad again proved that he is a grand ring general Richards have gone to Brant Rock for two and game as a pebble. He was cuffed and slapped and cut about the face by his heavier opponent, but fight on he did, and on more than one occasion during the 20 rounds fought it looked as though his left hand would surely land a coup

> d'etat. Griffo is a great fighter, and no mistake, but the impression gained from the battle of last night is that at anywhere near even weight the colored boy would win. Griffo tipped the beam at not one ounce less than 135 pounds, while the newspaper men present were informed that Dixon weighed 123 pounds. The darky fought a great battle. Time and again he would miss his famous "onetwo" blow with the left hand, and slap would go Griffo's glove across his nose Back again he would come, and generally succeeded in his determination to land on The battle was even enough, and had

fust enough slight advantages at times The five-cent store and D. E. Wadsworth in favor of one or the other of the men to arouse the greatest enthusiasm. As the affair progressed, so did Dixon's chances of success increase. He was the short horse in the early part of the contest, but his body blows told in the end, for Master Griffo lost his strength, and the latter half of the battle can easily be scored in favor of Dixon.

BAY STATE LEGISLATURE. Twenty-Seven Senators Supported the

Meigs Elevated Railway Bill. Boston, June 30.-The Meigs bill was passed to be engrossed by the senate by a vote of 27 to 10.

The amendments to allow the use of ompressed air and electricity were de feated. The provision permitting the use of other systems except the Manhattan was defeated, and an amendment allow Mr. Charles H. Spear lost on Thursday ing the granting of street locations in towns at town meetings was rejected. Senater Fitzgerald's substitute for the roposed subway, the alley route scheme of 1893, was rejected.

By a vote of 8 to 29, the senate refused to refer the bill to the next general court, and the till was engrossed, 27 to 10. The senate at the night session concurred with the house in passing to be engrossed the restricted Bell telephone bill. An amendment to limit the increase of stock to \$19,000,000 instead of \$30,000,000 was defeated by a vote of 7 to 22.

The house engressed the senate bill

relative to gaming and the illegal keep-ing and sale of intoxicating liquors by incorporated clubs. The bill providing for an investigation by the municipal court of the ward 17 frauds was passed to be engrossed. The Meigs bill is before the house, but no decision was reached last night, both

branches adjourning until today at noon. Married In Mexico. Boston, June 30. - The Herald says that Hon. Moody Merrill is a recent benedict. The event was solemnized

Statistics-First Half. Alice M. McLean gave the first half of necessary to have two statisticians in order that the place of statistician was a position not to be envied by any one. Referring to the past records of the class she found that the large number of seventy-four entered September 5, 1890. Disregarding all previous members, she considered only the

members of the graduating class which umbered twenty-four, twenty-two young adies and two young men. Of the ward delegations, ward two sends he largest, seven young ladies. She finds the average height to be five feet three inches, and the average weight to be one hundred and sixteen pounds. She thinks the height would be greater, if the distance from shoulder to shoulder according to the prevailing fashion, were measured. She is not surprised that a new High School building is needed if the class of 1894 is a fair example of the weight the school has

had to sustain since the year 1852. The average size of gloves worn by the young ladies is six. The size of those worn by the young men is perhaps larger. The class feels highly favored by fortune in having with them that noted American, 'Webster;" it has, moreover, a "Ball"

Miss McLean's statistics were obtained with as much care and accuracy as possible. She left to Miss Thompson, her fellowstudent and statistician, the pleasure of giving the remaining statistics of the class

Statistics-Second Haif. With much difficulty Miss Thompson

was able to obtain the following statistics:

The oldest is twenty and the youngest is seventeen, although the average is nineteen years, three months. She found in averaging the ages that some of the young ladies haven't grown much older since they left the grammar schools. In order to obtain the different sizes of the shoes, she found it necessary to investigate the sizes of the "rubbers" and found the largest worn by a young fady was number 7, while the smallest number 2 1-2 was worn by the young lady who also has the honor of being "la plus petite." In investigating the pedal coverings of the male portion of the house, she found that number 8, with

COMPLETED AT LAST.

The Democratic Tariff Bill Favorably Reported to the Senate.

THE PRESIDENT WANTS CHANGES.

Said to Demand Free Coal, Sugar and Iron Ore.

WASHINGTON, June 30.-The considera-

tion of the tariff bill, which was begun by the senate in the committee of the whole on April 2, is at last completed, and at 5:45 last night the bill was favorably reported to the senate as amended. In view of the fact that senators asked ome little time to examine the bill as amended, and on account of the general desire for a short respite from the long siege to which they had been subjected, the senate then adjourned over until Monday, when the final struggle over the bill will occur in the senate. This was not done, however, except against the protest of Mr. Harris, the floor manager of the bill. No unusual incident marked the close of the consideration of the bill

Some of the Changes.

Several changes were made in the bill. On Hoar's motion, section 94 had been amended so as to admit free of duty alcohol used in the arts and manufactures. The senate had agreed to the amend ment to section 104 abrogating reciprocal treaties. The section now repeals the third section of the McKinley act, and provides that "nothing herein contained shall be held to abrogate or in any way affect such reciprocal commercial atrangements as have been heretofore made and now exist between the United States and foreign countries; except where such arrangements are inconsistent with the provisions of this act."

Mr. Hoar appealed to the finance comnittee to admit a paragraph putting a duty of 10 per cent ad valorem on sea noss or Iceland moss. He asked it in the interest of a few meritorious and hardworking men on the coast of Massachu-

Mr. Harris (Dem., Tenn.) joined in the appeal, and Mr. Jones on behalf of the finance committee said that he could not resist the united appeal. The paragraph was, therefore, inserted.

Will the President Interfere? It is stated that President Cleveland will, when the tariff bill gets into conference, indicate very important changes that he desires made, and that he will intimate in no uncertain terms that if they are not made the bill will not receive his approval. He will, it is understood, demand that sugar, coal and iron ore be placed on the free list.

It is understood that the senate conferees will yield on the whisky schedule and that the tax will be fixed at \$1 a gal-lon, and the bonded period five years.

Black Gets His Seat, With the exception of a short time, the day in the house was consumed by a filibuster over the contested election case of Watson against Black of the Tenth Georgia district. The filibuster was led by Representative Pence, who contested every inch of ground, even after the aid L of our country when the demand for inventions and improvements in the arts and of the common rules had been invoked. sciences generally was so great as now. GROUP OF FRENCH STATESMEN. Premier Dupuy has received a telegram from Motta Visconti, northwest of Pavia, Italy, saying that the authorities, the inhabitants and even the families of the infamous Cesario Santo express profound indignation at the crima.

The American colony has opened sub-

scriptions for a wreath to be placed upon the coffin of the late President Carnot. Over \$250 has already been subscribed. Great progress has been made in investigating the murder of President Car-not, and it is now clearly established that a regular plot, in which a number of people were concerned, existed to assassinate the president. It has been ascertained that the final meeting of the conspirators took place at Cette, and that Cesario Santo was there chosen by lot to commit the actual murder. The arrest of Santo's accomplices is expected hourly.

An anarchist named Pie has been arrested at Chalona. Two days prior to the murder of President Carnot he stated that the president would either be destroyed by a bomb or stabbed to death during his visit to Lyons. Pie, at the last general election, contested a seat in the chamber of deputies against M. Bour-

PITCHERS' POOR WORK

Allowed the Bostons to Scoop Another Game From St. Louis. St. Louis, June 29.-The Browns lost

another game to Boston by ineffective pitching of the former's twirlers. Eightteen hits were made off Breitenstein and Hawley up to the eighth inning, when Ely was put in the box, and kept the champions down to one hit. In the last inning the Browns partly retrieved themselves by making a remarkable triple play.

PATENTS

FOR INVENTIONS. Equal with the interest of ti ose having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys and of seeing that inventors from worthless or careless attorneys have re-

and of seeing that inventions are well protected by valid patents, we have retained counsel expert in patent practice, and therefore are prepared to Obtain Patents in the United States and all Foreign Countries, Conduct la terferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to Scope and Validity of Patents, Prosecute and

Defend Infringement Suits, Etc., Etc. If you have an invention on hand send a sketch or photograph thereof, to gether with a brief description of the important features, and you will be at once advised as to the best course.
